## Field Service Manual

## Important Safety Notices

## Prevention of Physical Injury

1. Before disassembling or assembling parts of the copier and peripherals, make sure that the copier power cord is unplugged.
2. The wall outlet should be near the copier and easily accessible.
3. If any adjustment or operation check has to be made with exterior covers off or open while the main switch is turned on, keep hands away from electrified or mechanically driven components.
4. The copier drives some of its components when it completes the warm-up period. Be careful to keep hands away from the mechanical and electrical components as the copier starts operation.
5. The inside and the metal parts of the fusing unit become extremely hot while the copier is operating. Be careful to avoid touching those components with your bare hands.

## Health Safety Conditions

1. Toner and developer are non-toxic, but if you get either of them in your eyes by accident, it may cause temporary eye discomfort. Immediately wash eyes with plenty of water. If unsuccessful, get medical attention.
2. The copier, which use high voltage power source, can generate ozone gas. High ozone density is harmful to human health. Therefore, the machine must be installed in a well-ventilated room.

## Observance of Electrical Safety Standards

The copier and its peripherals must be serviced by a customer service representative who has completed the training course on those models.

## WARNING

- QKeep the machine away from flammable liquids, gases, and aerosols. A fire or an explosion might occur.

[^0]not recharge or burn the batteries. Used batteries must be handled in accordance with local regulations.

## Safety and Ecological Notes for Disposal

1. Do not incinerate toner bottles or used toner. Toner dust may ignite suddenly when exposed to an open flame.
2. Dispose of used toner, the maintenance unit which includes developer or the organic photoconductor in accordance with local regulations. (These are non-toxic supplies.)
3. Dispose of replaced parts in accordance with local regulations.
4. When keeping used lithium batteries in order to dispose of them later, do not put more than 100 batteries per sealed box. Storing larger numbers or not sealing them apart may lead to chemical reactions and heat build-up.

## Laser Safety

The Center for Devices and Radiological Health (CDRH) prohibits the repair of laser-based optical units in the field. The optical housing unit can only be repaired in a factory or at a location with the requisite equipment. The laser subsystem is replaceable in the field by a qualified Customer Engineer. The laser chassis is not repairable in the field. Customer engineers are therefore directed to return all chassis and laser subsystems to the factory or service depot when replacement of the optical subsystem is required.

## WARNING

- Use of controls, or adjustment, or performance of procedures other than those specified in this manual may result in hazardous radiation exposure.

## WARNING

- WARNING: Turn off the main switch before attempting any of the procedures in the Laser Optics Housing Unit section. Laser beams can seriously damage your eyes.
- CAUTION MARKING:

## Warnings, Cautions, Notes

In this manual, the following important symbols and notations are used.

## . WARNING

- A Warning indicates a potentially hazardous situation. Failure to obey a Warning could result in death or serious injury.

## $\triangle$ CAUTION

- A Caution indicates a potentially hazardous situation. Failure to obey a Caution could result in minor or moderate injury or damage to the machine or other property.

## *)Important

- Obey these guidelines to avoid problems such as misfeeds, damage to originals, loss of valuable data and to prevent damage to the machine.

## 」) Note

- This information provides tips and advice about how to best service the machine.

## Symbols, Abbreviations and Trademarks

This manual uses several symbols and abbreviations. The meaning of those symbols and abbreviations are as follows:

|  | See or Refer to |
| :---: | :--- |
| (3) | Clip ring |
| S | Screw |
| S | Connector |
| E | Clamp |
| SEF | Short Edge Feed |

## Guidance for Those Who are Familiar with Predecessor Products

Machine D086/D087 is a successor model to Machine D023/D025. If you have experience with the predecessor products, the following information will be of help when you read this manual.
Different Points from Predecessor Products

|  | D086/D087 | D023/D025 |

## 2. Installation

## Installation Requirements

## Environment

1. Temperature Range: $10^{\circ} \mathrm{C}$ to $32^{\circ} \mathrm{C}\left(50^{\circ} \mathrm{F}\right.$ to $\left.89.6^{\circ} \mathrm{F}\right)$
2. Humidity Range: $15 \%$ to $80 \%$ RH
3. Ambient Illumination: Less than 1500 lux (do not expose to direct sunlight)
4. Ventilation: 3 times/hr/person or more
5. Do not let the machine get exposed to the following:
1) Cool air from an air conditioner
2) Heat from a heater
6. Do not install the machine in areas that are exposed to corrosive gas.
7. Install the machine at locations lower than $2,000 \mathrm{~m}(6,560 \mathrm{ft})$ above sea level.
8. Install the machine on a strong, level base. (Inclination on any side must be no more than 5 mm .)
9. Do not install the machine in areas that get strong vibrations.

## Important

- Do not leave the toner bottle in a place directly exposed to sunlight.
- The toner bottle must be kept at a temperature of $35^{\circ} \mathrm{C}\left(95^{\circ} \mathrm{F}\right)$ or less. Be careful not to leave the toner bottle in a hot place when transporting or storing it.

## Machine Level

Front to back: Within 5 mm (0.2")
Right to left: Within $5 \mathrm{~mm}\left(0.2^{\prime \prime}\right)$

## Machine Space Requirements

## $\triangle$ CAUTION

- This machine, which uses high voltage power sources, can generate ozone gas. High ozone density is harmful to human health. Therefore, the machine must be installed in a well-ventilated room.

A: Over $100 \mathrm{~mm}\left(3.9^{\prime \prime}\right)$
B: Over $100 \mathrm{~mm}\left(3.9^{\prime \prime}\right)$
C: Over $100 \mathrm{~mm}\left(3.9^{\prime \prime}\right)$
D: Over 750 mm (29.5")
Put the machine near the power source with the clearance shown above.

## Power Requirements

## $\triangle$ CAUTION

- Insert the plug firmly in the outlet.
- Do not use an outlet extension plug or cord.
- Ground the machine.

1. Input voltage level:

$$
120 \text { to } 127 \mathrm{~V}, 60 \mathrm{~Hz} \text { : More than } 12 \mathrm{~A}
$$

220 V to $240 \mathrm{~V}, 50 \mathrm{~Hz} / 60 \mathrm{~Hz}$ : More than 8 A
2. Permissible voltage fluctuation: $+8.66 \% /-10 \%$
3. Do not put things on the power cord.

## Copier Installation

## $\triangle$ CAUTION

- Make sure that the image transfer belt is in its correct position (away from the PCDUs) before you move the machine. Otherwise, the image transfer belt and the black PCDU can be damaged.

## Power Sockets for Peripherals

## $\triangle$ CAUTION

- Rating voltage for peripherals.
- Make sure to plug the cables into the correct sockets.

## Installation Flow Chart

This flow chart shows the best procedure for installation.

You need the optional paper tray unit or the LCT if you want to install the finisher (B408 or B793) or 1200sheet LCT (D539).

The punch unit is for the booklet finisher (B793).

## Installation Procedure

## $\triangle$ CAUTION

- Remove the tape from the development units before you turn the main switch on. The development units can be severely damaged if you do not remove the tape.

Put the machine on the paper tray unit or the LCT first if you install an optional paper tray unit or the optional LCT at the same time. Then install the machine and other options.

## Note

- Keep the shipping retainers after you install the machine. You may need them in the future if you transport the machine to another location.

## Tapes and Retainers

1. Remove all the tapes and retainers on the machine.
2. Remove all the tapes and retainers in trays 1 and 2 , and then take out the power cord from tray 1 (if applicable).
3. Remove the scanner unit stay $[A]$.
4. Open the front door $[B]$, and then remove the jam location sheet $[C]$.
5. Keep the scanner unit stay $[A]$ inside the front door $[B]$.
6. Reattach the jam location sheet.
7. Close the front door.

## Developer and Toner Bottles

1. Open the front door $[\mathrm{A}]$.
$\rightarrow$ GSA model (-57) and EU modets (-27) do not require-steps from 2 to 7. Skipto-stop-8-if you Delete
imstallthese modets.
2. Remove the stopper $[B](\hat{\xi} \times 1)$.

## Note

- This stopper locks the drum positioning plate lever.

3. Release the image transfer unit lock lever [C], and turn the drum positioning plate lever [D] counterclockwise.
4. Open the drum positioning plate $[E]$.
5. Remove all tapes [F] from the four development units. RTB 17: Remove from K only

## Note

- When you remove the tape from the development unit, hold the development unit with your hand, and then pull the tape.

6. Close the drum positioning plate. Then lock the image transfer unit lock and turn the drum positioning plate lever clockwise.

7. Shake each toner bottle five or six times.

8. Install each toner bottle [G] in the machine.

## Note

- The black toner bottle is unique for the D086/D087 models. The black toner bottle for the previous models (D023/D025) cannot be used in the D086/D087 models.
- The other color toner bottles are common with the previous models.

10. Close the front door.

## Paper Trays

1. Pull each paper tray out. Then adjust the side guides and end guide to match the paper size.

## Note

- To move the side guide, first pull out the tray fully. Then push down the green lock at the rear inside the tray.

2. Pull out the feeler [A] for the output tray full detection mechanism.

## Emblem and Decals

1. Attach the correct emblem [A] and the cover [B] to the front door [C] of the machine, if the emblem is not attached.
2. Attach the correct paper tray number and size decals to the paper trays [D].

## Note

- Paper tray number and size decals are also used for the optional paper tray or the optional LCT. Keep these decals for use with these optional units.

## Initialize the Developer

1. Plug in the machine.
2. Make sure that the platen or ARDF is closed and the main power is turned off.
3. Turn the main power switch on. The machine automatically starts the initialization procedure. The Start button LED (©) turns green when this procedure has finished.
4. Make copies of image samples (text, photo, and text/photo modes).
5. Do the Automatic Color Calibration process (ACC) as follows:
1). Print the ACC test pattern (User tools > Maintenance > ACC > Start).
2). Put the printout on the exposure glass.
3). Put 10 sheets of white paper on top of the test chart.
4). Close the ARDF or the platen cover.
5). Press "Start Scanning" on the LCD panel. The machine starts the ACC.
6. Check that the sample image has been copied normally.

## Settings Relevant to the Service Contract

Change the necessary settings for the following SP modes if the customer has made a service contract.

## Note

- You must select one of the counter methods (developments/prints) in accordance with the contract SP5-045-001).
- The SP operation sound can be turned on or off. For details, see "SP Operation Sound On/Off Setting" below.

| Item | SP No. | Function | Default |

## SP Operation Sound On/ Off Setting

d086i120

## To turn off the SP Operation Sound

1. Enter the SP mode.
2. On the top menu screen $[A]$, hold down the "Clear/Stop" button until you hear a beep sound. This turns off the SP operation sound.
3. No SP operation sound can be heard in all levels $[B]$ (SPx, $S P x-x x x$ and $S P x-x x x-x x x)$ of the $S P$ mode.

## To turn on the SP Operation Sound

1. Enter the SP mode.
2. On the top menu screen $[\mathrm{A}]$, hold down the "Clear/Stop" button again until you hear a beep sound. This turns on the SP operation sound.
3. $S P$ operation sound can be heard in all levels $[B]$ ( $S P x, S P x-x x x$ and $S P x-x x x-x x x$ ) of the $S P$ mode.

## Settings for @Remote Service

## Note

- Prepare and check the following check points before you visit the customer site. For details, ask the @Remote key person.

## Check points before making @Remote settings

1. The setting of SP5816-201 in the mainframe must be "0".
2. Device ID2 (SP5811-003) must be correctly programmed.

- 6 spaces must be put between the 3 -digit prefix and the following 8 -digit number (e.g. xxx $\qquad$ xxxxxxxx).
- ID2 (SP5811-003) and the serial number (SP5811-001) must be the same (e.g. ID2: A01 $\qquad$ 23456789 = serial No. A0123456789)

3. The following settings must be correctly programmed.

- Proxy server IP address (SP5816-063)
- Proxy server Port number (SP5816-064)
- Proxy User ID (SP5816-065)
- Proxy Password (SP58 16-066)

4. Get a Request Number

## Execute the @Remote Settings

1. Enter the SP mode.
2. Input the Request number which you have obtained from @Remote Center GUI, and then enter [OK] with SP5816-202.
3. Confirm the Request number, and then click [EXECUTE] with SP5816-203.
4. Check the confirmation result with SP5816-204.

| Value | Meaning | Solution/ Workaround |
| :---: | :--- | :--- |
| 0 | Succeeded | - |
| 1 | Request number error | Check the request number again. |

## VM Card Installation

The App2Me application must be enabled before it can be used. The VM SD card including App2Me is provided with the main machine.

Do the following procedure if a customer wants to use "App2Me".

1. Turn off the machine if it is in use.

2. Remove the SD slot cover $[\mathrm{A}](\hat{\boldsymbol{\theta}} \times 1)$.
3. Insert the VM SD card $[B]$ in slot 2 .
4. Attach the SD slot cover $[\mathrm{A}](\hat{8} \times 1)$.
5. Turn on the machine.

## Enabling App2Me

The following procedure basically should be done by a customer.

1. Press the [User Tools] key on the operation panel.
2. Touch the "Extended Feature Settings" button twice.
3. Touch the "App2Me" line under the Startup Setting tab.
4. Touch the "Extended Feature Info" tab on the LCD.
5. Touch the "App2Me" line.
6. Set "Auto Start" to "On".
7. Touch the "Exit" button.
8. Exit the "User Tools" settings.

## Important

- Do not remove the VM card from Slot 2 (lower slot). The VM card must remain in the machine.

## Moving the Machine

This section shows you how to manually move the machine from one floor to another floor. See the section "Transporting the Machine" if you have to pack the machine and move it a longer distance.

1. Remove all trays from the optional paper feed unit or LCT.

## Transporting the Machine

## Main Frame

1. Do SP 4806-00 1 to move the scanner carriage from the home position. This prevents dust from falling into the machine during transportation.
2. Remove the toner cartridges. This prevents toner flow into the toner supply tube, which is caused by vibration during transport. This can also cause the tube to be clogged with toner.
3. Make sure there is no paper left in the paper trays. Then fix down the bottom plates with a sheet of paper and tape.
4. Empty the toner collection bottle. Then attach securing tape to stop the toner bottle from coming out.
5. Do one of the following:

- Attach shipping tape to the covers and doors.
- Shrink-wrap the machine tightly.

## 4) Note

- After you move the machine, make sure you do the "Auto Color Registration" as follows. This optimizes color registration.
- 1. Do the "Forced Line Position Adj. Mode c" (SP2-111-3).
- 2. Then do the "Forced Line Position Adj. Mode a" (SP2-111-1).

To check if SP 2-111-1 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-10 to - 12 .

- Make sure that the side fences in the trays are correctly positioned to prevent color registration errors.

## Paper Feed Unit PB3080 (D387)

## Accessory Check

## Installation Procedure

## . CAUTION

- Turn off the main switch of the copier and unplug the power cord before you start the installation procedure.
- You need two or more persons to lift the copier. The copier is highly unstable when lifted by one person, and may cause human injury or property damage.
- Do not lift the copier with the paper feed unit installed. The handle and grips may be damaged.

## Note

- The one-tray paper feed unit must be installed on the caster table (D446). Prepare the caster table first before installing this unit.
- The Envelope Feeder EF3000 (D547) cannot be used in this unit. Do not install the Envelope Feeder EF3000 (D547) in this unit.

1. Remove all tape on the paper feed unit.
2. Remove the paper tray and remove all tapes and padding.

3. Grasp the handle $[A]$ and grips $[B]$ of the machine.
4. Lift the copier and install it on the paper feed unit [C].

## Note

- Hold the handle and grips of the machine when you lift and move the machine.

5. Remove tray 1 and 2 of the machine.
6. Fasten the spring washer screw [D].
7. Reinstall all trays.
8. Attach the securing brackets $[E]\left(M 4 \times 10 ; \hat{\theta^{3}} \times 1\right.$ each $)$.

## (4) Note

- One of the securing brackets is used as a securing tool (the cutout [F] is used in step 6). But the cutout [G] is for attaching the tray heater. Therefore, attach the securing brackets [E] after installing the tray heater if you install the tray heater.

9. Load paper into the paper feed unit.
10. Turn on the main power switch of the machine.
11. Check the paper feed unit operation and copy quality.

3. Liff the copier or one-tray paper feed unit [C], and then install it on the caster table [D].

## Note

- Hold the handle and grips of the machine when you lift and move the machine.

4. Pull out tray 2 of the mainframe or the tray of the one-tray paper feed unit.

5. Secure the machine or one-tray paper feed unit to the caster table (stud screw $\times 1$ )
6. Reinstall the tray in the mainframe or one-tray paper feed unit.
7. Adjust the five leveling adjustors of the caster table.

## Installation Procedure

## 」 Note

- This tray can be installed in tray 2 of the copier, or tray 3 or tray 4 of the paper feed unit (D537).
- There is no automatic paper size detection in the envelope feeder (D547). Adjust the paper size for the tray where the envelope feeder is to be installed with User Tools.

1. Remove all tape from the envelope feeder.

2. Pull out tray $2[A]$ from the main machine.

3. Install the envelope feeder $[A]$ into tray 2 of the main machine.
4. Press the "User/Tools" key on the operation panel.
5. Enter "Small Paper Size Tray" under "General Features".

- Initial Settings > General Features > Small Paper Size Tray

6. Select "On" for the tray where the envelope feeder is installed.
7. Turn the main machine off and on.

- Unplug the main machine power cord before starting the following procedure.

## Note

- The Paper Tray Unit (D537) or LCT 2000-sheet (D538) must be installed before installing this 1200sheet LCT.

1. Unpack the LCT and remove the tapes.
2. Remove the stand covers $[A]$.
3. Release the locks [B] of the front and rear caster stands.
4. Remove the caster stands [C].

5. Remove the paper path cover [A], connector cover [B] and six hole covers [C].

6. Insert the joint pins $[A]$.
7. Attach the front $[B]$ and rear brackets $[C]\left(\hat{\theta^{\prime}} \times 2\right.$ each).

8. Pull out the front and rear rails $[\mathrm{A}]$, and then hang them on each bracket $[\mathrm{B}]$.
9. Connect the LCT cable [C] to the main machine.
10. Slide the LCT $[D]$ into the main machine.
11. Make sure that the front and rear sides of the LCT are closely attached to the main machine.

## Side Fence Position Change

1. Open the right door of the LCT.
2. Push the down switch to lower the tray bottom plate until it reaches its lowest position.

3. Remove the front and rear side fences $[A, B]\left(\hat{\theta^{\prime}} \times 1\right.$ each ).
4. Install the side fences in the correct position (A4 LEF/ LT LEF/B5 LEF).

5. Pull the end fence $[A]$ for $B 5$ size paper as shown $(\mathbb{3}) \times 1)$ if the side fences are adjusted for $B 5$ size paper.
6. Close the right door.
7. Turn on the main power switch, and then go into the SP mode.
8. Input the correct paper size for the 1200-sheet LCT with SP5181-018.

| 4 | Stud Screw | 2 |
| 5 | Attention Decal - Top Cover | 1 |

## Installation Procedure

## $\triangle$ CAUTION

- Unplug the copier power cord before starting the following procedure.

1. Remove all tapes and shipping retainers.
2. Remove the two screws already installed at the top rear of the machine.
3. Insert the two stud screws [ A ] on the top of the machine.

4. Mount the ARDF $[B]$ by aligning the screw keyholes $[C]$ in the ARDF support plate over the stud screws.
5. Slide the ARDF toward the front of the machine.
6. Secure the ARDF with the two knob screws [D].

7. Install the stamp cartridge $[F]$ in the ARDF.

8. Peel off the platen sheet [G] and place it on the exposure glass.
9. Align the rear left corner of the platen sheet with the corner $[\mathrm{H}]$ on the exposure glass.
10. Close the ARDF.
11. Open the ARDF and check that the platen sheet is correctly attached.

12. Attach the decal $[1]$ to the top cover as shown. Choose the language you want.
13. Plug in and turn on the main power switch of the machine, and then check the ARDF operation.
14. Make a full size copy. Check that the registrations (side-to-side and leading edge) and image skew are correct. If they are not, adjust the registrations and image skew referring to "Copy Adjustments" in the "Replacements and Adjustments" section.

Installation Procedure

## . CAUTION

- Turn off the main switch of the copier and unplug the power cord before you start the installation procedure.

## Preparing before Installing the DF Handle

1. Open the ADF unit.

2. Hold the securing bracket $[A]$ at the location $[B]$, inside the ADF cover.
3. Secure the stud bracket [C] to the outside of the ADF cover at location [D] with two screws ( $\hat{\varepsilon}^{2} \times 2$ : $M 3 \times 8$ ).

## Note

- The two screws must go through the ADF cover and the securing bracket [A].

4. Make two screw holes [E] in the scanner right cover with an $M 3 \times 12$ tapping screw from the accessories.

## Installing the DF Handle

1. Attach the holder $[A]$ to the scanner right cover (Tapping Screw $-M 3 \times 12$ : $\times 2$ ).

- At first, secure the screw at the rear side (away from the operation panel) temporarily and then at the front side temporarily. After that, secure them fully.

b862i513

2. Install the bushing: $6 M M[B]$ in the inside of the handle unit.
3. Attach the handle unit to the stud bracket on the left side of the ADF.

4. In the outside of the handle unit, install the bushing - M6 [C] first, and then the spacer [D].

5. Clean the handle unit with alcohol. Then attach the stud decal [E] at the location that was cleaned.

6. Attach the handle bracket [F] at the front right side on the bottom of the ADF unit (Tapping Screw [Self Binding] $\times 2$ : $M 3 \times 12$ ).
7. Close the ADF unit.

8. Attach the hinge stoppers (left [G] and right [H]) to the left and right hinges (Tapping screw $\times 2$ : $M 4 \times 8$ each).

9. Clean the front side of the duplex unit with alcohol. Then attach the operation decal [I] at the location that was cleaned.

10. Check the operation of the handle unit [J].

## Installation Procedure

## ©CAUTION

- Unplug the copier power cord before starting the following procedure.

If the bridge unit (D386) or side tray (D542) has already been installed in the machine, remove it before installing 1 bin tray unit (D536). This will make it easier for you to do the following procedure.

1. Remove all tapes.
2. Open the right door of the machine.

3. Remove the front right cover $[A](\hat{8} \times 1)$.
4. Remove the inner cover $[B]\left(\begin{array}{l}(1)\end{array}\right.$.

## Note

- Keep this screw for step 5 .

5. Install the 1 bin tray unit [C] ( 1 気 $\times 1$, 包 $\times 1$ [This screw was removed in step 4]).

6. Attach the tray support bar [D] to the tray [E] as shown, and then attach the end-fence [F].

7. Install the tray [G] (with the tray support bar) in the machine $(M 3 \times 16: \hat{8} \times 2)$.
8. Reinstall the front right cover in the machine, and then close the right door of the machine.
9. Turn on the main power switch of the machine.
10. Check the 1 bin tray unit operation.

## Internal Shift Tray SH3040 (D388)

| :---: | :--- | :---: |
| 1 | Shift Tray Unit | 1 |
| 2 | Paper Guide - Small | 2 |
| 3 | Connector Cover | 1 |

## Installation Procedure

## . CAUTION

- Unplug the copier power cord before starting the following procedure.

1. Remove all tapes.
2. Remove the standard tray [A].
3. Remove the inner cover $[\mathrm{B}](\hat{g} \times 1)$.

4. Install the small paper guides [C].

5. Attach the connector cover $[D]$ to the shift tray unit $[E]$.
6. Install the shift tray unit $[E]$ to the machine.
7. Push down the left edge [F] of the shift tray.
8. Turn on the main power switch of the machine.
9. Check the shift tray unit operation.

## Side Tray Type C5501 (D542)

## Component Check

Check the quantity and condition of the accessories against the following list.

| 6 | Frame Cover | 1 |
| 7 | Holder bracket | 1 |

## Installation Procedure

## . CAUTION

- Turn off the main switch of the copier and unplug the power cord before you start the installation procedure.

## Note

- If you will install the 1-bin tray (D536) on the machine, install the 1-bin tray first before installing the side tray (D542). This makes it easier to do the following procedure.

1. Remove all tapes.
2. If the sensor feeler $[A]$ is out, fold it into the machine.
3. Open the right door of the machine.

4. Remove the inner tray [B].
5. Remove the front right cover $[C](\hat{\theta} \times 1)$.
6. Remove the connector cover $[D](\hat{\theta} \times 1)$.

7. Attach the main output tray $[A]$ and sub output tray $[B]$ to the side tray unit.

8. Install the side tray unit $[A]$ in the machine.

9. Open the side tray cover [A].
10. Secure the side tray unit with the knob screw [B].
11. Attach the frame cover [C].
12. Reinstall the front right cover to the machine, and then close the right door of the machine.

## Note

- Open the side tray cover [A] when installing the front right cover. Otherwise, you cannot reinstall it.

13. Install the holder bracket $[\mathrm{D}](\hat{\beta} \times 1)$
14. Turn on the main power switch of the machine.
15. Check the side tray operation.

## Bridge Unit BU3030 (D386)

## Component Check

Check the quantity and condition of the components against the following list.

| 5 | Holder bracket | 1 |
| 6 | Guide | 2 |

## Installation Procedure

## $\triangle$ CAUTION

- Unplug the copier power cord before starting the following procedure.

## Note

- 1. If you will install the 1-bin tray (D536) in the machine, install the 1-bin tray before you install the bridge unit (D386). This will make it easier for you to do the following procedure.
- 2. If you will install a finisher (B408, B804 or B805) in the machine, install the finisher after you install the bridge unit (D386).

1. Remove all tapes.

2. If the sensor feeler [A] is out, fold it into the machine.
3. Open the right door of the machine.

4. Remove the inner tray [B].
5. Remove the front right cover $[C](\hat{\theta} \times 1)$.
6. Remove the connector cover $[D](\hat{\theta} \times 1)$.

7. Install the bridge unit $[E]$ in the machine.

8. Secure the bridge unit with the knob screw [F] and screw $[\mathrm{H}]$.
9. Attach the frame cover [I].
10. Reinstall the front right cover in the machine. Then close the right door of the machine.

## Note

- Open the bridge unit cover [J] when installing the front right cover. Otherwise, the bridge unit cover is an obstacle for attaching the front right cover.

11. Install the optional finisher (refer to the finisher installation procedure).

## Note

- If you will not install the finisher at this time, install the holder bracket [G]. Otherwise, the customer will damage the bridge unit if they pull up the bridge unit tray. When you install the finisher, you will need this bracket during the installation procedure.

12. Pull the extension tray [K] only if the 1000-sheet finisher (B408) is to be installed in the main machine.
13. Turn on the main power switch of the machine.
14. Check the bridge unit operation.

## Installation Procedure

## $\triangle$ CAUTION

- Unplug the main machine power cord before starting the following procedure.

## Note

- Before you install the 500 -sheet finisher, the optional bridge unit (D386) must be installed.

1. Unpack the finisher and remove the tapes.

2. Install the unit holder $[\mathrm{A}](\hat{8} \times 3-\mathrm{M} 4 \times 14)$.
3. Install the support brackets $[B](\hat{B} \times 2$ each: $M 4 \times 20)$
4. Install the support bracket covers [C] ( $\hat{\boldsymbol{\theta}} \times 1$ each: $M 3 \times 8)$

5. Install the 500-sheet finisher [A].
6. Install the holder bracket $[B](\hat{8} \times 1 ; M 3 \times 6)$.
7. Connect the finisher cable [C].

8. Install the shift tray $[A](\hat{\theta} \times 2-M 3 \times 8)$.
9. Turn on the main power switch and check the finisher operation.

## Installation Procedure

## $\triangle$ CAUTION

- Unplug the main machine power cord before starting the following procedure.

If this finisher will be installed on the D086 or D087 copier, the following options must be installed before installing this finisher.

- Bridge Unit (D386)
- Paper Feed Unit (D537) or LCT (D538)

1. Unpack the finisher, and then remove the stopper $[A]$ and tapes $(\hat{\theta} \times 1)$.

2. Install the front joint bracket $[B]$, holder bracket $[C](\times 2-M 4 \times 14)$, and rear joint bracket [D]

## Note

- The holder bracket [C] must be placed outside the front joint bracket [B]. The holder bracket is provided with the bridge unit (D386).

1. Install the grounding plate $[E]$ on the finisher ( $\hat{8} \times 2-M 3 \times 8$ ).

## ( $\downarrow$ Note

- Use the screw removed in step 1 and the screw from the accessory box.

2. Open the front door [F] of the finisher, and then pull the locking lever [G] (1 knob screw - M3 $\times 8$ ).
3. Align the finisher on the joint brackets, and lock it in place by pushing the locking lever.
4. Secure the locking lever ( 1 knob screw $-M 3 \times 8$ ).
5. Close the front door.
6. Install the copy tray $[\mathrm{H}](1$ knob screw - M4×10).
7. Connect the finisher cable [I] to the main machine below the right rear handle.

8. Attach the staple position decal [J] to the ARDF as shown.
9. Turn on the main power switch and check the finisher operation.

Installation Procedure

## $\triangle$ CAUTION

- Unplug the main machine power cord before starting the following procedure.

The bridge unit (D386) and optional paper feed unit (D537 or D538) must be installed before installing this finisher (B793).

1. Unpack the finisher and remove all tapes and packing materials from the finisher.

2. Open the front door $[A]$ of the 1000 -sheet booklet finisher, and then pull out the jogger unit [B].
3. Remove all tapes and packing materials from the inside of the finisher.

4. Attach the cushions [ $C$ ] to the finisher.

## 4. Note

- Make sure that the cushions are placed within 0 to $1 \mathrm{~mm}[D]$ from the edge of the cover or frame.

5. Install the ground plate $[E]$ on the finisher $(\hat{\theta} \times 2 ; M 3 \times 8)$.

6. Attach the rear joint bracket $[F](\hat{8} \times 2, M 4 \times 14)$.
7. Attach the front joint bracket $[\mathrm{G}]$ and the holder bracket $[\mathrm{H}](\mathrm{P} \times 2 ; \mathrm{M} 4 \times 14)$.

## Note

- The holder bracket $[\mathrm{H}]$ must be placed outside the front joint bracket [G]. The holder bracket is provided with the bridge unit (D386).

8. Pull the lock lever [I] (Long knob screw $\times 1$ ).
9. Slowly push the finisher to the left side of the machine, keeping its front door open until the brackets [J] [K] go into their slots.
10. Push the lock lever [I], and then secure it (Long knob screw $\times 1$ ).
11. Close the front door of the finisher.
12. Connect the finisher connector $[L]$ to the machine.

13. Install the upper output tray [M] (Short knob screw $\times 1$ ).
14. Install the lower output tray [ N ].
15. Turn on the main power switch of the machine.
16. Check the 1000 -sheet booklet finisher operation.

## Installation

## $\triangle$ CAUTION

- Unplug the main machine power cord before starting the following procedure. If the 1000 -sheet booklet finisher has been installed, disconnect it and pull it away from the machine.

1. If the finisher is connected to the machine, disconnect it.
2. Open the top cover $[A]$ and then release the guide arm $[B](\sqrt{2}) \times 1)$.
3. Open the front door [C].
4. Pull the hook [D] up then remove the knob [E].
5. Timing belt cover [F].

6. Rear cover of the 1000 -sheet booklet finisher $[G](\hat{(1)} \times 2)$.

7. Cover bracket $[\mathrm{H}](\hat{\theta} \times 1)$
8. Remove the paper guide plate $[1]$ from the rear side $(\times 4)$.

9. Install the punch unit stay [J] from the front side $(\hat{8} \times 3)$.
10. Install the sub-scan registration sensor guide $[K]$ from the top $(\hat{\beta} \times 1)$.

11. Remove the bracket [L] from the punch unit $(\hat{(1)} \times 1)$.

12. Install the punch unit [ $M$ ] along the punch unit stay from the rear side.
13. Make sure to put the punch unit stay pin $[\mathrm{N}]$ through the hole [ O ].

14. Connect the harnesses $[\mathrm{P}]$ to the main PCB .
15. Put the harnesses $[Q]$ through the hole $[R]$ in the rear frame (慁 $\times 1$ ).

16. Install the punch drive motor $[S]$ on the rear frame $(\hat{\beta} \times 2)$.
17. Connect the drive motor harness [ $T$ ] to the harness from the punch unit (傢 $\times 1$ ).
18. Connect the home position sensor harness from the punch unit to the home position sensor [U].

19. Install the sub-scan registration sensor unit $[\mathrm{V}]$ from the rear side $(\hat{(\hat{8}} \times 2)$.
20. Route and connect the harnesses as shown (绿 $\times 2$ ).

21. Install the hopper full sensor arm $[W](\times 1$, spring $\times 1)$.
22. Connect the harness from the sub-scan registration sensor unit to the hopper full sensor $[\mathrm{X}]$.

23. Install the hopper $[\mathrm{Y}]$ from the front side.
24. Reinstall the timing belt cover and knob.
25. Reinstall the rear cover $(\hat{\beta} \times 2)$.
26. Close the front door and top cover.
27. Install the 1000-sheet booklet finisher on the copier.
28. Plug in and turn on the main power switch.
29. Check the 1000 -sheet booklet finisher operation.

## Key Counter Bracket Type H (A674)

## Installation Procedure

1. Hold the key counter plate nuts $[A]$ on the inside of the key counter bracket $[B]$ and insert the key counter holder [C].
2. Secure the key counter holder to the bracket ( $\hat{\boldsymbol{\theta}} \times 2$ ).
3. Install the key counter cover $[\mathrm{D}](\mathrm{e} \times 2)$.
4. Rear cover (174)

5. Cut off the part $[E]$ of the rear cover.

6. Connect the harness to the connector [F] inside the machine.

7. Peel off double sided tape on the key counter bracket and attach the key counter to the scanner right cover [G].
8. Reassemble the machine.

## Optional Counter Interface Unit Type A (B870)

## Installation Procedure

1. Rear cover (174)
2. IOB bracket ( N .309 "Controller Box")

3. Install the four stud stays in the location [A] in the controller box.
4. Install the key counter interface board on the four stud stays in the controller box.
5. Connect the harness to CN 3 on the key counter interface board.

6. Close the IOB bracket and connect the other terminal to $\mathrm{CN} 215[\mathrm{~B}]$ on the IOB.

7. Cut off the part [C] of the rear cover.

8. Clamp the harness from the counter device with the clamp [D] and put it as shown by the blue arrow (晩 $\times 1$ ).
9. Route the harness from the counter device in the same way as the other harnesses [E] (绿 $\times 3$ ).
10. Connect the harness from the counter device to CN4 on the key counter interface board.
11. Reattach the IOB bracket p. 309 "Controller Box").
12. Reassemble the machine.

## USB2.0/SD Slot Type F (D546)

## Accessory Check

Check the quantity and condition of the accessories against the following list.

| No. | Description | Q'ty |
| :---: | :--- | :---: |

| 7 | Bracket | 1 |
| 8 | PDF Direct Card |  |
| 1 | 1 |  |

* 1 : If the PostScript 3 option is used in this machine, this card is not necessary.

## Installation Procedure

d027i111

1. Connect the USB cable [B] to the USB slot $[A]$ in the USB2.0/SD Slot as shown above.
2. Attach the ground plate $[C]$ to the bracket of the USB2.0/SD Slot ( $\times 1$ : $M 3 \times 6$ blue).

3. Rear cover of the machine $(\hat{\theta} \times 8)$
4. Remove the scanner left cover $[A](\hat{8} \times 2)$.
5. Remove the leff frame cover $[B]\left(\hat{\theta^{\prime}} \times 1\right)$ 。

6. Remove the part [A] of the left frame cover with pliers or a similar tool.
7. Reinstall the left frame cover $(\hat{\theta} \times 1)$.

8. Remove the part [A] on the scanner left cover.

9. Make four holes in the scanner left cover with a screwdriver as shown [A].

## Note

- Smooth the four holes in the scanner left cover as shown [B].

10. Route the USB cable [A] through the gaps in the left scanner cover.
11. Secure the USB2.0/SD Slot $[B]$ with the left scanner cover as shown above ( $\hat{(\hat{B}} \times 4: M 3 \times 8$ ).

Note

- Use the screw holes [C] as shown above.

12. Attach the bracket $[A]$ with its two hooks $[B]$ as shown above ( $\hat{\theta} \times 1: M 3 \times 6)$.

13. Put the USB cable [A] through the cutout [B] of the left frame cover.
14. Attach the scanner left cover [C] to the mainframe, and then connect the USB cable [A] to USB-A (front side) as shown above.

## Note

- Make sure that the USB cable is inserted in USB-A (front side).

15. Reinstall the rear cover ( $\hat{\boldsymbol{\theta}} \times 8$ ).

If PostScript 3 is already installed, go to step 25. If not, follow the steps from 16 to 24.
16. Remove the SD slot cover $(\hat{r} \times 1)$, and move the SD card from slot 1 to slot 2 .
17. Insert the PDF direct card in slot 1 .
18. Plug in and turn on the mainframe.
19. Enter the System SP mode.
20. Move HDD Security Applications (HDD Encryption unit and Data Overwrite Security Unit) from the SD card in slot 2 to the SD card in slot 1 with SP5-873-001 "Move Exec".
21. Enter the Scanner SP mode, and then change the setting of SP1013-001 from " 0 " to " 1 ".
22. Enter the Printer SP mode, and then change the setting of SP1110-001 from " 0 " to " 1 ".
23. Exit the SP mode, and then turn off the machine.
24. Remove the $S D$ card in slot 2 , and then attach the $\operatorname{SD}$ slot cover $(\times 1)$.

- Keep this card in the safe place (139 "SD Card Appli Move").

25. Check the operation of the USB2.0/SD Slot.

d027i118
26. Attach the decal $[A]$ to the USB2.0/SD Slot as shown above.

## Testing the SD Card/USB Slot

1. Insert an SD card or USB memory device in the slot.

You can connect only one removable memory device at a time.
2. Close the media slot cover.

If you leave the cover open, static electricity conducted through an inserted SD card could cause the machine to malfunction.
3. Make sure that no previous settings remain.

If a previous setting remains, press the [Clear Modes] key.
4. Place an original on the exposure glass.
5. Press [Store File].
6. Press [Store to Memory Device].
7. Press [OK].
8. Press the [Start] key.

When writing is complete, a confirmation message appears.
9. Press [Exit].
10. Remove the memory device from the media slot.

Do not remove the memory device while writing is in process.

## Card Reader Bracket Type C5501 (D547)

## Component Check

Check the quantity and condition of the accessories against the following list.

| No. | Description | Q'ty |

| 6 | Lower Tray | 1 |
| 7 | Tray Bracket | 1 |
| 8 | Clamp | 5 |

* 1: Not used in this machine

## Installation Procedure

1. Remove the screw [A] on the scanner right cover.

- For this model, use the screw holes marked " 2 " on the table bracket.

3. Attach the lower tray $[A]$ to the tray bracket ( $\times 2: M 3 \times 8$ ).
4. Attach the upper tray $[B]$ to the tray bracket ( $\times 1: M 3 \times 8$ ).
5. Use the clamps as necessary to clamp the cable of the card read/writer device.

## * Important

- The smart card reader must be placed on this card reader table. If not, some antenna or transmitter in the main machine may be interrupted.

## Anti-Condensation Heater (Scanner)

## Note

- This option is provided as a service part.

## Installation Procedure

1. Rear cover ( p .174 in the "Replacement and Adjustment" section)
2. Open the ARDF or platen cover.
3. Glass cover $[A](\hat{8} \times 4)$
4. ARDF exposure glass [B]
5. Rear scale $[C](\hat{\beta} \times 3)$
6. Exposure glass with left scale [D]

7. Move the scanner carriage to the right side by rotating the scanner motor $[E]$.
8. Install the heater $[F]$ in the scanner unit ( $\hat{\boldsymbol{\beta}} \times 1$, hook)
9. Put the connector [G] through the cutout.
10. Connect it to the connector $[\mathrm{H}]$ (blue and red cords) in the frame of the machine.
11. Reassemble the machine.

## Anti-Condensation Heater Type A

## Note

- This option is provided as a service part.

## Installation Procedure

## ©CAUTION

- Unplug the machine power cord before starting the following procedure.
- Do the following procedure not to damage any harnesses.
- Check that all harnesses are not damaged nor pinched after installation.

## For installing the tray heater in the main machine

1. Remove trays 1 and 2 from the machine.
2. Remove the connector cover $[A](\hat{8} \times 1)$.
3. Connect the connector $[B]$ of the heater to the connector of the main machine.
4. Install the heater $[C]$ inside the machine ( $(\hat{s} \times 1)$.
5. Reassemble the machine.

## For installing the tray heater in D537

1. Rear cover $[\mathrm{A}](\mathrm{B} \times 8)$
2. Pull out the two trays in the optional paper feed unit.

3. Install the tray heater $[B]$ in the optional paper feed unit $(\hat{8} \times 1)$.

4. Remove the two securing brackets $[C](\hat{d} \times 1$ each ), and then the rear cover [D] of the optional paper feed unit ( $\overrightarrow{(\hat{\theta}} \times 2$ ).
5. Remove the harness cover bracket $[E](\hat{8} \times 1)$.

6. Pull out tray 2 from the mainframe.
7. Replace the shoulder screw $[F]$ with the washer screw $[G]$, using securing bracket $[H](\hat{8} \times 1)$.

8. Connect the harness $[\mathrm{I}]$ to the connector $[\mathrm{J}]$ of the tray heater.
9. Route the harness [1] as shown and clamp it with four clamps (绿 $\times 4$ ).
10. Connect the harness $[1]$ to the connector $[K]$ of the mainframe.
11. Reassemble the mainframe and optional paper feed unit.

12. Attach the on/standby decal [L] to the right-hand side of the main power switch.

## For Installing the Tray Heater in D538

1. Remove the rear cover of the mainframe ( 1 in For Installing the Tray Heater in D537).
2. Pull out the LCT drawer.

## Note

- If the right tray comes out with the left tray, push the right tray into the LCT.

3. Left tray $[\mathrm{A}](\hat{2} \times 2)$

4. Remove the right tray $[B]$ while pressing down the stopper $[C]$.

## Note

- When reinstalling the right tray, set the right tray on the guide rail and carefully push the tray in, making sure to keep the tray level.

5. Install the tray heater $[\mathrm{D}]$ in the optional $\operatorname{LCT}\left(\hat{\boldsymbol{g}^{\prime}} \times 1\right)$.

b801i251
6. Remove the two securing brackets $[\mathrm{E}]$ ( $\hat{\boldsymbol{\beta}} \times 1$ each), and the then rear cover $[\mathrm{F}]$ of the optional LCT ( ${ }^{(\hat{y}} \times 2$ ).
7. Remove the harness cover bracket $[G](\hat{\theta} \times 1)$.

8. Pull out tray 2 from the mainframe.
9. Replace the shoulder screw $[H]$ with the washer screw [I], using the securing bracket $[J](\hat{m} \times 1)$.

10. Connect the harness $[K]$ to the connector $[L]$ of the tray heater.
11. Route the harness $[\mathrm{K}]$ as shown and clamp it with four clamps (氯 $\times 4$ ).
12. Connect the harness $[K]$ to the connector $[M]$ of the mainframe.
13. Reassemble the mainframe and optional LCT.

14. Reassemble the mainframe and optional paper feed unit.
15. Attach the on/standby decal $[\mathrm{N}]$ to the right-hand side of the main power switch.

## For Installing the Tray Heater in D387

1. Remove the rear cover of the mainframe (tep 1 in For Installing the Tray Heater in D537).
2. Pull out the tray in the optional paper tray.

3. Install the tray heater $[A]$ in the optional paper tray $(\hat{\theta} \times 1)$.

4. Remove the two securing brackets $[B]\left(\hat{\theta^{\prime}} \times 1\right.$ each $)$, and then the rear cover $[C]$ of the optional paper tray ( $\hat{\theta}^{\times 2}$ ).
5. Remove the harness cover bracket $[D](\hat{8} \times 1)$.

6. Pull out tray 2 from the mainframe.
7. Replace the shoulder screw $[E]$ with the washer screw $[F]$, using securing bracket $[G](\hat{8} \times 1)$.

8. Connect the harness $[\mathrm{H}]$ to the connector $[\mathrm{I}]$ of the tray heater.
9. Route the harness $[\mathrm{H}]$ as shown and clamp it with four clamps $\left(\hat{\theta^{\prime}} \times 4\right)$.

## + Note

- Make sure that the harness $[\mathrm{H}]$ is placed below the harness $[\mathrm{J}]$.

3. Connect one harness [K] of the two-way harness to the connector [L] of the mainframe.

Note

- The harness $[K]$ of the two-way harness, which has two binds, is for the connector of the mainframe. The harness [M], which has one bind, is for another optional paper feed unit.

4. Clamp the other harness $[M]$ of the two-way harness as shown $[N]$ if you do not install another optional paper feed unit.
5. Reassemble the mainframe and optional paper tray.

6. Attach the on/standby decal [O] to the right-hand side of the main power switch.

## Controller Options

## Overview

This machine has I/F card slots for optional I/F connections and SD card slots applications.
After you install an option, check that the machine can recognize it (see "Check All Connections" at the end of this section).

## I/F Card Slots

- Slot A is used for one of the optional I/F connections (only one can be installed): IEEE 1284, IEEE802.1 la/g (Wireless LAN), Bluetooth or Remote Communication Gate.
- Slot B is used for the File Format Converter or Remote Communication Gate.
- Slot C is used for Gigabit Ethernet.

## SD Card Slots

- Slot 1 is already occupied by the Security SD Card by factory default, and is also used for optional applications (e.g.: PostScript 3, PictBridge, IPDS unit, PDF direct, etc).
- Slot 2 is used for installing the Browser Unit, VM card or for service only (for example, updating the firmware).

## SD Card Appli Move

## Overview

The service program "SD Card Appli Move" (SP5-873) lets you move application programs from one SD card to another SD card.

If more than one application is required, the applications must be moved to one SD card with SP5873-1 (PostScript 3, Security Application, PictBridge, IPDS unit, PDF Direct, etc.).

## Be very careful when you do the SD Card Appli Move procedure:

- The data necessary for authentication is transferred with the application program from an SD card to another SD card. Authentication fails if you try to use the SD card after you move the application program from one card to another card.
- Do not use the SD card if it has been used before for other purposes. Normal operation is not guaranteed when such an SD card is used.

d088i511
- Remove the cover $[A](\times 2)$, and then keep the SD card in the place $[B]$ after you move the application program from one card to another card. This is done for the following reasons:
- The SD card can be the only proof that the user is licensed to use the application program.
- You may need to check the SD card and its data to solve a problem in the future.
- You cannot move the PostScript or PDF Direct application to another SD card. You have to move the other application (PictBridge, Security Applications, IPDS unit) to the SD card that stores the PostScript or PDF Direct application.

## Move Exec

The menu "Move Exec" (SP5-873-001) lets you move application programs from the original SD card to another SD card.

## * Important

- Do not turn ON the write protect switch of the system SD card or application SD card on the machine. If the write protect switch is ON, a download error (e.g. Error Code 44) occurs during a firmware upgrade or application merge.

1. Turn the main switch off.
2. Make sure that a target SD card is in SD Card Slot 1. The application program is moved to this SD card.
3. Insert the source SD card with the application program in SD Card Slot 2. The application program is copied from this source SD card.
4. Turn the main switch on.
5. Start the SP mode.
6. Select SP5-873-00 1 "Move Exec".
7. Follow the messages shown on the operation panel.
8. Turn the main switch off.
9. Remove the source SD card from SD Card Slot 2.
10. Turn the main switch on.
11. Check that the application programs run normally.

## Undo Exec

"Undo Exec" (SP5-873-002) lets you move back application programs from an SD card in SD Card Slot 1 to the original SD card in SD Card Slot 2. You can use this program when, for example, you have mistakenly copied some programs by using Move Exec (SP5-873-001).

## Important

- Do not turn ON the write protect switch of the system SD card or application SD card on the machine. If the write protect switch is ON, a download error (e.g. Error Code 44) occurs during a firmware upgrade or application merge.

1. Turn the main switch off.
2. Insert the original SD card in SD Card Slot 2. The application program is copied back into this card.
3. Insert the SD card with the application program in SD Card Slot 1.The application program is copied back from this SD card.
4. Turn the main switch on.
5. Start the SP mode.
6. Select SP5-873-002 "Undo Exec."
7. Follow the messages shown on the operation panel.
8. Turn the main switch off.
9. Remove the SD card from SD Card Slot 2.
10. Turn the main switch on.
11. Check that the application programs run normally.
12. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

## PostScript3 Unit Type C5501

The PostScript3 application and fonts cannot be moved to another SD card. However, other applications can be moved onto the PostScript3 SD card.

## $\triangle$ CAUTION

- Unplug the main machine power cord before you do the following procedure.

1. Remove the SD-card slot cover $[A]$ from the SD card slots $\left(\hat{\theta^{\prime}} \times 1\right)$.
2. Move the $S D$ card (security applications) $[B]$ from SD slot 1 to $S D$ slot 2 .

- If the VM card is already in SD slot 2, first remove the VM card in SD slot 2 .

3. Insert the SD card [C] (PostScript 3) in SD slot 1 with its label face towards the front of the machine. Then push it slowly into SD slot 1 until you hear a click.

4. Attach the "Adobe PostScript 3" decal $[A]$ to the front door.
5. Plug in, and then turn on the machine.
6. Move security applications from the SD card in SD slot 2 to the SD card in SD slot 1 with SP5-873-00 1 .
7. Turn off the machine.
8. Remove the SD card from SD slot 2, and then keep it in a safe place ( 5 Card Appli Move).
9. Insert the VM card in SD slot 2.
10. Attach the SD-card slot cover, and then turn on the machine $(\hat{\theta} \times 1)$.
11. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

## IPDS Unit Type C5501

## $\triangle$ CAUTION

- Unplug the main machine power cord before you do the following procedure.

1. Remove the SD-card slot cover [A] from the SD card slots $\left(\hat{\theta^{\prime}} \times 1\right)$.
2. Move the SD card (security applications) [B] from slot 1 to slot 2 .

- If the VM card is already in slot 2 , first remove the VM card in SD slot 2 .

3. Insert the SD card [C] (IPDS Unit) in SD slot 1 with its label face towards the front of the machine.
4. Plug in, and then turn on the machine.
5. Move security applications from the SD card in SD slot 2 to the SD card in SD slot 1 with SP5-873-00 1 .
6. Turn off the machine.
7. Remove the SD card from SD slot 2, and then keep it in a safe place p. 139 "SD Card Appli Move").
8. Insert the VM card in SD slot 2.
9. Attach the SD-card slot cover, and then turn on the machine $(\hat{\beta} \times 1)$.

## File Format Converter Type E

## $\triangle$ CAUTION

- Unplug the main machine power cord before you do the following procedure.

1. Remove the slot $B$ cover $[A](\hat{\theta} \times 2)$.
2. Install the file format converter $[B]$ into slot $B$ and then fasten it with screws.
3. Plug in and turn on the main power switch.
4. Check or set the following SP codes with the values shown below.

| SP No. | Title | Setting |
| :---: | :--- | :---: |
| SP5-836-001 | Capture Function (0:Off 1:On) | "1" |
| SP5-836-002 | Panel Setting | "0" |

5. Check the operation.
6. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

## IEEE 1284 Interface Board Type A

## Installation Procedure

## CAUTION

- Unplug the main machine power cord before you do the following procedure.

You can only install one of the following network interfaces at a time: (IEEE $802.11 \mathrm{a} / \mathrm{g}$, (Wireless LAN), IEEE 1284, Bluetooth).

d088i404

1. Remove the slot $A$ cover $[A](\hat{\theta} \times 2)$.
2. Install the interface board $[B]$ (Knob-screw $\times 2$ ) into the slot $A$.
3. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

## IEEE 802.1 la/g Interface Unit Type J

## Installation Procedure

## $\triangle$ CAUTION

- Unplug the main machine power cord before you do the following procedure.

You can only install one of the following network interfaces at one time: (IEEE $802.11 \mathrm{a} / \mathrm{g}$, (Wireless LAN), IEEE 1284 , Bluetooth).

1. Remove the slot cover $[\mathrm{A}]$ from the board slot $(\hat{\boldsymbol{\theta}} \times 2)$.
2. Install the wireless LAN board [B] (Knob-screw $\times 2$ ) into the board slot.
3. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

4. Peel off the double-sided tapes on the Velcro fasteners [A], and then attach them [A] at the front left and rear left of the machine.
5. Attach "ANT1" (having a black ferrite core) [B] to the front left of the machine.
6. Attach "ANT2" (having a white ferrite core) [C] to the rear right of the machine.

## Note

- "ANT1" is a transmission/reception antenna and "ANT2" is a reception antenna. Do not attach them at the wrong places.

7. Attach the clamps as shown above.
8. Wire the cables and clamp them (缘 $\times 7$ ).

## Note

- Make sure that the cables are not slack. Keep them wired tightly along the covers.

You may have to move the machine if the reception is not clear.

- Make sure that the machine is not located near an appliance or any type of equipment that generates strong magnetic fields.
- Put the machine as close as possible to the access point.

## Installing Various Hardware Combinations

d027i511

- Refer to the above picture [A] when installing the handset.
- Refer to the above picture $[B]$ when installing the handset and the USB2.0/SD.

## UP Mode Settings for Wireless LAN

Enter the UP mode. Then do the procedure below to perform the initial interface settings for IEEE 802.11 $\mathrm{a} / \mathrm{g}$. These settings take effect every time the machine is powered on.

Note

- You cannot use the wireless LAN if you use Ethernet.

1. Press the "User Tools/Counter" key.
2. On the touch panel, press "System Settings".

## Note

- The Network I/F (default: Ethernet) must be set for either Ethernet or wireless LAN.

3. Select "Interface Settings".
4. Press "Wireless LAN". Only the wireless LAN options show.
5. Communication Mode. Select either "802.11 Ad hoc", "Ad hoc" or "Infrastructure".
6. SSID Setting. Enter the SSID setting. (The setting is case sensitive.)
7. Channel. You need this setting when Ad Hoc Mode is selected.

Range: 1 to 14 (default: 11)

+ Note
- The allowed range for the channel settings may vary for different countries.

8. WEP (Encryption) Setting. The WEP (Wired Equivalent Privacy) setting is designed to protect wireless data transmission. The same WEP key is required on the receiving side in order to unlock encoded data. There are 64 bit and 128 bit WEP keys.

WEP:
Selects "Active" or "Inactive" ("Inactive" is default.).
Range of Allowed Settings:
64 bit: 10 characters
128 bit: 26 characters
9. Transmission Speed. Press the Next button to show more settings. Then select the transmission speed for the mode: Auto, $11 \mathrm{Mbps}, 5.5 \mathrm{Mbps}, 2 \mathrm{Mbps}, 1 \mathrm{Mbps}$ (default: Auto). This setting should match the distance between the closest machine or access point. This depends on which mode is selected.

## Note

- For the Ad Hoc Mode, this is the distance between the machine and the closest PC in the network. For the Infrastructure Mode, this is the distance between the machine and the closest access point.

11 Mbps: 140 m ( 153 yd .)
5.5 Mbps: $200 \mathrm{~m}(219 \mathrm{yd}$.)

2 Mbps: 270 m (295 yd.)
1 Mbps: 400 m (437 yd.)
10. Press "Return to Default" to initialize the wireless LAN settings.

Press "Yes" to initialize the following settings:

- Transmission mode
- Channel
- Transmission Speed
- WEP
- SSID
- WEP Key

## SP Mode and UP Mode Settings for IEEE 802.11 a/g Wireless LAN

The following SP commands and UP modes can be set for IEEE $802.11 \mathrm{a} / \mathrm{g}$.

| SP No. | Name | Function |
| :--- | :--- | :--- |
| $5840-006$ | Channel MAX | Sets the maximum range of the channel settings for the country. |
| $5840-007$ | Channel MIN | Sets the minimum range of the channels settings allowed for your <br> country. |
| $5840-011$ | WEP Key Select | Used to select the WEP key (Default: 00). |
| UP mode | Name | Function |
|  | SSID | Used to confirm the current SSID setting. |
|  | WEP Key | Used to confirm the current WEP key setting. |
|  | WEP Mode | Used to show the maximum length of the string that can be used <br> for the WEP Key entry. |

## Bluetooth Interface Unit Type 3245

## $\triangle$ CAUTION

- Unplug the main machine power cord before you do the following procedure.

You can only install one of the following network interfaces at a time: (IEEE $802.11 \mathrm{a} / \mathrm{g}$ (Wireless LAN), IEEE 1284, Bluetooth).

D027i405

1. Remove the slot cover $[A](\hat{\theta} \times 2)$.
2. Install the Bluetooth board $[B]$ (Knob-screw $\times 2$ ) into the slot $A$.
3. Insert the Bluetooth card into the Bluetooth card adaptor.
4. Install the Bluetooth card adaptor on the Bluetooth board.
5. Attach the antenna cap to the Bluetooth board.
6. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

## Camera Direct Print Card Type I

## $\triangle$ CAUTION

- Unplug the main machine power cord before you do the following procedure.

1. Remove the SD-card slot cover [A] from the SD card slots $(\times 1)$.
2. Move the SD card (security applications) $[B]$ from SD slot 1 to $S D$ slot 2 .

- If the VM SD card is already in SD slot 2, first remove the VM card in SD slot 2 .

3. Insert the SD card [C] (PictBridge) in SD slot 1 with its label face to the front of the machine.
4. Plug in, and then turn on the machine.
5. Move security applications from the SD card in SD slot 2 to the SD card in SD slot 1 with SP5-873-00 1 .
6. Turn off the machine.
7. Remove the SD card from slot SD 2, and then keep it in a safe place.
8. Insert the VM card in SD slot 2.
9. Attach the SD-card slot cover, and then turn on the machine $(\hat{\beta} \times 1)$.
10. Make sure that the machine can recognize the option (see 'Check All Connections' at the end of this section).

## Browser Unit Type E

## Installation Procedure

## CAUTION

- Unplug the main machine power cord before you do the following procedure.

1. Remove the slot cover $[A]$ for $S D \operatorname{cards}(\hat{B} \times 1)$.
2. Remove the VM card $[B]$ from SD slot 2 .
3. Turn the SD-card label face $[C]$ of the browser unit to the front of the machine. Then push it slowly into SD slot 2 until you hear a click.
4. Plug in and turn on the main power switch.
5. Push the "User Tools" key.

- If an administrator setting is registered for the machine, step 5 and 6 are required. Otherwise, skip to the step 7

6. Push the "Login/ Logout" key.
7. Login with the administrator user name and password.
8. Touch "Extended Feature Settings" twice on the LCD.
9. Touch "Install" on the LCD.
10. Touch "SD Card".
11. Touch the "Browser" line.
12. Under "Install to" touch "Machine HDD" and touch "Next".
13. When you see "Ready to Install", check the information on the screen to confirm your previous selection.
14. Touch "OK". You will see "Installing the extended feature... Please wait.", and then "Completed".
15. Touch "Exit" to go back to the setting screen.
16. Touch "Change Allocation".
17. Touch the "Browser" line.
18. Press one of the hard keys, which you want to use for the Browser Unit. In default, this function is assigned to the "Other Functions" key (bottom key of function keys).
19. Touch "OK".
20. Touch "Exit" twice to go back to the copy screen.
21. Turn off the main power switch.
22. Install the key for "Browser Unit" to the place, where you want.
23. Remove the SD card of the browser unit from SD slot 2 .
24. Reinstall the VM card in SD slot 2.
25. Attach the slot cover $[A](\hat{8} \times 1)$.
26. Keep the SD card in the place ( 139 "SD Card Appli Move") after you install the application program from the card to HDD. This is because: The SD card can be the only proof that the user is licensed to use the application program. You may need to check the SD card and its data to solve a problem in the future.

## Gigabit Ethernet Type B

## CAUTION

- Unplug the main machine power cord before you do the following procedure.

d393i101

1. Remove the controller cover $[A](\hat{\theta} \times 3)$.
2. Pull out the controller board $[B]\left(\hat{\theta^{\prime}} \times 5\right)$.

d027i409
3. Remove the slot cover $[A]\left(\hat{\theta^{\prime}} \times 1\right)$.

4. Attach the Gigabit Ethernet controller $[A]$ into the slot $[B](\hat{8} \times 2)$.
5. Reassemble the machine.
6. Check the operation of the Gigabit Ethernet

## Check All Connections

1. Plug in the power cord. Then turn on the main switch.
2. Enter the printer user mode. Then print the configuration page.

User Tools > Printer Settings > List Test Print > Config. Page
All installed options are shown in the "System Reference" column.

## 3. Preventive Maintenance

## Maintenance Tables

See "Appendices" for the following information:

- Preventive Maintenance ltems
- Other Yield Parts

## PM Parts Settings

## Before Removing the Old PM Parts

1. Enter the SP mode.
2. Output the SMC logging data with SP5-990-004.
3. Set the following SPs to " 1 " before you turn the power off. Then, the machine will reset the PM counters automatically. In the case of developer, the developer initialization will also be done automatically.
4. Exit the SP mode.

| Item | SP |
| :--- | :--- |
| Developer | Black: 3902-005 <br> Yellow: 3902-006 <br> Cyan: 3902-007 <br> Magenta: 3902-008 |
|  | Black: 3902-009 <br> Yellow: 3902-010 <br> Cyan: 3902-011 <br> Magenta: 3902-012 |
| Heum Unit | Heating roller: 3902-018 <br> Pressure roller: 3902-019 |
| for complete fusing units; see below) | $3902-015$ |
| Image Transfer Belt Cleaning Unit | $3902-016$ |
| PTR Unit | $3902-017$ |
| Toner Collection Bottle (if not full or near-full) |  |

For the following units, there is a new unit detection mechanism. It is not necessary to reset PM counters.

- PCDU
- Development unit
- Toner Collection Bottle (if full or near-full)
- Fusing unit

## After installing the new PM parts

1. Turn on the main power switch.
2. Output the SMC logging data with SP5-990-004 and check the counter values.
3. Make sure that the PM counters for the replaced units are " 0 " with SP7-803. If the PM counter for a unit was not reset, then reset that counter with SP 7-804.
4. Make sure that the exchange counter counts up with SP7-853.
5. Make sure that the counters for the previous units (SP7-906) on the new SMC logging data list (from step 2 above) are equal to the counters (SP7-803) for these units on the previous SMC logging data list (the list that was output in the "Before removing the old parts" section).
6. Make sure that the unit replacement date is updated with SP7-950.

## Preparation before operation check

1. Clean the exposure glasses (for DF and book scanning).
2. Enter the user tools mode.
3. Do the "Automatic Color Calibration(ACC)" for the copier mode \& printer mode as follows:

- Print the ACC test pattern (User Tools > Maintenance > ACC > Start).
- Put the printout on the exposure glass.
- Put 10 sheets of white paper on the test chart. This ensures the precise ACC adjustment.
- Close the ARDF or the platen cover.
- Press "Start Scanning" on the LCD. Then, the machine starts the ACC.

4. Exit the User Tools mode, and then enter the SP mode.
5. Do the "Forced line position adjustment" as follows.

- First do SP2-111-3 (Mode c).
- Then do SP2-111-1 (Mode a).
- To check if SP 2-111-1 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-10 to -12.

6. Exit the SP mode.

## Operation check

Check if the sample image has been copied normally.

## 4. Replacement and Adjustment

## Beforehand

## © CAUTION

- Before installing options, please do the following:
- If there is a fax unit in the machine, print out all messages stored in the memory, the lists of userprogrammed items, and the system parameter list.
- If there are printer jobs in the machine, print out all jobs in the printer buffer.
- Turn off the main switch and disconnect the power cord, the telephone line, and the network cable.

## Important

- Always touch a grounded surface to discharge static electricity from your hands before you handle SD cards, printed circuit boards, or memory boards.

## Image Adjustment

## Scanning

Check the printing registration/side-to-side adjustment and the blank margin adjustment before you do the following scanner adjustments.

Note

- Use S-2-1 test chart to do the following adjustments.

## Scanner sub-scan magnification

A: Sub-scan magnification

1. Put the test chart on the exposure glass. Then make a copy from one of the feed stations.
2. Check the magnification ratio. Adjust with SP4-008 if necessary. Standard: $\pm 1.0 \%$.

## Scanner leading edge and side-to-side registration

A: Leading Edge Registration

1. Put the test chart on the exposure glass. Then make a copy from one of the feed stations.
2. Check the leading edge and side-to-side registration. Adjust the following SP modes if necessary. Standard: $0 \pm 2 \mathrm{~mm}$ for the leading edge registration, $0 \pm 2.5 \mathrm{~mm}$ for the side-to-side registration.

|  | SP mode |
| :--- | :---: |
| Leading Edge Registration | SP4-010-001 |
| Side-to-Side Registration | SP4-011-001 |

## ARDF

ARDF side-to-side, leading edge registration and trailing edge

## A: Leading edge registration

Use A3/DLT paper to make a temporary test chart as shown above.

1. Put the temporary test chart on the ARDF. Then make a copy from one of the feed stations.
2. Check the registration. Check the leading edge and side-to-side registration. Adjust the following SP modes if necessary.

Standard: $4.2 \pm 2 \mathrm{~mm}$ for the leading edge registration, $2 \pm 1 \mathrm{~mm}$ for the side-to-side registration.
Use the following SP modes to adjust if necessary.

| SP Code | What It Does | Adjustment Range |
| :--- | :--- | :--- |
| SP6-006-001 | Side-to-Side Regist: Front | $\pm 3.0 \mathrm{~mm}$ |
| SP6-006-003 | Leading Edge Registration | $\pm 5.0 \mathrm{~mm}$ |
| SP6-006-005 | Buckle: Duplex Front | $\pm 3.0 \mathrm{~mm}$ |
| SP6-006-006 | Buckle: Duplex Rear | $\pm 2.5 \mathrm{~mm}$ |
| SP6-006-007 | Rear Edge Erase (Trailing Edge) | $\pm 10.0 \mathrm{~mm}$ |

## ARDF sub-scan magnification

1. Put the temporary test chart on the ARDF. Then make a copy from one of the feed stations.
2. Check the magnification ratio. Adjust with SP6-017-001 if necessary.

- Standard: $\pm 5.0 \%$
- Reduction mode: $\pm 1.0 \%$
- Enlargement mode: $\pm 1.0 \%$

## Registration

Image Area

$A=C=5.2 \mathrm{~mm}\left(0.2^{\prime \prime}\right), B=2.0 \mathrm{~mm}$
Make sure that the registration is adjusted within the adjustment standard range as shown below.

## Leading Edge

Adjusts the leading edge registration for each paper type and process line speed.

## Side to Side

Adjusts the side-to-side registration for each paper feed station. Use SP mode (SP1-002) to adjust the side-to-side registration for the optional paper feed unit, LCT, and duplex unit.

## Adjustment Standard

- Leading edge (sub-scan direction): $5.2 \pm 2 \mathrm{~mm}$
- Side to side (main-scan direction): $2 \pm 1 \mathrm{~mm}$

## Paper Registration Standard

The registration in both main- and sub-scan directions can change within the following tolerance.

- Sub-scan direction: $0 \pm 9 \mathrm{~mm}$
- Main-scan direction: $0 \pm 4 \mathrm{~mm}$

## Adjustment Procedure

1. Enter SP2-109-003.
2. Print out the test pattern (14: 1-dot trimming pattern) with SP2-109-003.

## Note

- Registration can change slightly as shown on the previous page. Print some pages of the 1 -dot trimming pattern for step 3 and 4. Then average the leading edge and side-to-side registration values, and adjust each SP mode.

3. Do the leading edge registration adjustment.
1) Check the leading edge registration and adjust it with SP1-001.
2) Select the adjustment conditions (paper type and process line speed).
3) Input the value. Then press the $\oplus$ key.
4) Generate a trim pattern to check the leading edge adjustment.
4. Do the side-to-side registration adjustment.
1) Check the side-to-side registration and adjust it with SP1-002.
2) Select the adjustment conditions (paper feed station).
3) Input the value. Then press the $\oplus$ key.
4) Generate a trim pattern to check the leading edge adjustment.

## Erase Margin Adjustment

## Note

- Adjust the erase margin $C$ and $D$ only if the registration (main scan and sub scan) cannot be adjusted within the standard values. Do the registration adjustment after adjusting the erase margin $C$ and $D$, and then adjust the erase margin $A$ and $B$.

1. Enter SP2-109-003.
2. Print out the test pattern (14: 1-dot trimming pattern) with SP2-109-003.
3. Check the erase margin A and B. Adjust them with SP2-103-001 to -015 if necessary.

- Leading edge: 0.0 to 9.0 mm (default: 4.2 mm )
- Side-to-side: 0.0 to 9.0 mm (default: 2.0 mm )
- Trailing edge: 0.0 to 9.0 mm (default: 4.2 mm )

## Color Registration

## Line Position Adjustment

The automatic line position adjustment usually is done for a specified condition to get the best color prints.
Do the following if color registration shifts:

- Do "Auto Color Registration" as follows to do the forced line position adjustment.

1. First do SP2-111-3.
2. Then do SP2-111-1.

To check if SP 2-111-1 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-10 to -12.

- You should also do the line position adjustment at these times:
- After you transport or move the machine (you should do the forced line position adjustment if you install the machine at the user location.) if the machine is pre-installed at the workshop and moved to the user location,
- When you open the drum positioning plate
- When you remove or replace the motors, clutches, and/or gears related to the drum/ development/transfer sections
- When you remove or replace the image transfer belt, image transfer belt unit or laser optical housing unit

## Printer Gamma Correction

## Note

- The ACC is usually sufficient to adjust the color balance to get the best print output. You only need the printer gamma correction to fine-tune to meet user requirements.

Use SP modes if you want to modify the printer gamma curve created with ACC. You can adjust the gamma data for the following:

- Highlight
- Middle
- Shadow areas
- IDmax.

The adjustable range is from 0 to 30 ( 31 steps).

## Copy Mode

## - KCMY Color Balance Adjustment -

The adjustment uses only "Offset" values.

## Note

- Never change "Option" values (default value is 0 ).

| Highlight (Low ID) | Levels 2 through 5 in the C4 chart 10 -level scale |
| :--- | :--- |
| Middle (Middle ID) | Levels 3 through 7 in the C4 chart 10-level scale |
| Shadow (High ID) | Levels 6 through 9 in the C4 chart 10-level scale |
| ID max | Level 10 in the C4 chart 10-level scale (affects the entire image density.) |
| Offset | The higher the number in the range associated with the low ID, middle ID, <br> high ID, and ID max, the greater the density. |

There are four adjustable modes (can be adjusted with SP4-9 18-009):

- Copy Photo mode
- Copy Letter mode
- Copy Letter (Single Color) mode
- Copy Photo (Single Color) mode

## - Adjustment Procedure -

1. Copy the $\mathrm{C}-4$ chart in the mode that you want to adjust.
2. Enter the SP mode.
3. Select "System SP."
4. Select SP4-918-009.
5. Adjust the offset values until the copy quality conforms to the standard (see the table below).

## Note

- 1. Never change "Option" value (default value is "0").
- 2. Adjust the density in this order: "ID Max", "Middle", "Shadow", "Highlight".

## - Photo Mode, Full Color -

|  | Item to Adjust | Level on the C-4 chart | Adjustment Standard |
| :---: | :---: | :---: | :---: |
| 1 | ID max: $\text { (K, C, M, and } Y \text { ) }$ | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 10 matches that of level 10 on the $\mathrm{C}-4$ chart. |

| 2 | Middle (Middle ID) <br> ( $K, C, M$, and $Y$ ) |  | Adjust the offset value so that the density of level 6 matches that of level 6 on the C-4 chart. |
| :---: | :---: | :---: | :---: |
| 3 | Shadow (High ID) <br> ( $K, C, M$, and $Y$ ) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 8 matches that of level 8 on the C-4 chart. |
| 4 | Highlight (Low ID) <br> ( $K, C, M$, and $Y$ ) |  | Adjust the offset value so that dirty background does not show on the copy and the density of level 3 is slightly lighter than that of level 3 on the C-4 chart. |
| 5 | K Highlight (Low ID) ( $C, M$, and $Y$ ) <on the full color copy> |  | Adjust the offset value so that the color balance of black scale levels 3 through 5 in the copy is seen as gray (no C, M, or $Y$ should be visible). If the black scale contains $C, M$, or $Y$, do steps 1 to 4 again. |

## - Photo Mode, Single Color -

|  | Item to Adjust | Level on the C-4 chart | Adjustment Standard |
| :---: | :---: | :---: | :---: |
| 1 | ID max: (K) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 10 matches that of level 10 on the $\mathrm{C}-4$ chart. |
| 2 | Middle (Middle ID) (K) | 1 2 3 4 5 6 7 8 9 10 | Adjust the offset value so that the density of level 6 matches that of level 6 on the C-4 chart. |
| 3 | Shadow (High ID) (K) |  | Adjust the offset value so that the density of level 8 matches that of level 8 on the C-4 chart. |
| 4 | Highlight (Low ID) (K) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that dirty background does not show on the copy and the density of level 3 is slightly lighter than that of level 3 on the C-4 chart. |

## - Text (Letter) Mode, Full Color -

|  | Item to Adjust | Level on the C-4 chart ( K ) | Adjustment Standard |
| :---: | :---: | :---: | :---: |
| 1 | ID max: (K, C, M, and Y) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 10 matches that of level 10 on the $\mathrm{C}-4$ chart. |
| 2 | Middle (Middle ID) <br> ( $K, C, M$, and $Y$ ) |  | Adjust the offset value so that the density of level 6 matches that of level 6 on the C-4 chart. |
| 3 | Shadow (High ID) ( $K, C, M$, and $Y$ ) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 8 matches that of level 8 on the C-4 chart. |
| 4 | Highlight (Low ID) <br> ( $K, C, M$, and $Y$ ) |  | Adjust the offset value so that dirty background does not show on the copy and the density of level 3 is slightly lighter than that of level 3 on the C-4 chart. |

## - Text (Letter) Mode, Single Color -

|  | Item to Adjust | Level on the C-4 chart ( K ) | Adjustment Standard |
| :---: | :---: | :---: | :---: |
| 1 | ID max: (K) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 10 matches that of level 10 on the $\mathrm{C}-4$ chart. |
| 2 | Middle (Middle ID) (K) | $\begin{array}{\|l\|l\|l\|l\|l\|l\|l\|l\|l\|l\|} \hline 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ \hline \end{array}$ | Adjust the offset value so that the density of level 6 matches that of level 6 on the C-4 chart. |
| 3 | Shadow (High ID) (K) |  | Adjust the offset value so that the density of level 8 matches that of level 8 on the C-4 chart. |
| 4 | Highlight (Low ID) (K) |  | Adjust the offset value so that dirty background does not show on the copy and the density of level 3 is slightly lighter than that of level 3 on the C-4 chart. |

## Note

- Text parts of the test pattern cannot be printed clearly after you adjust "shadow" as shown above. At this time, check if the 5 line/mm pattern at each corner is printed clearly. If it is not, adjust the offset value of "shadow" again until it is.

## Printer Mode

There are six adjustable modes (select these modes with printer SP1-102-001):

- $1200 \times 1200$ photo mode
- $1200 \times 1200$ text mode
- $2400 \times 600$ photo mode
- $2400 \times 600$ text mode
- $1800 \times 600$ photo mode
- $1800 \times 600$ text mode
- $600 \times 600$ photo mode
- $600 \times 600$ text mode

|  | K | C | M |  |
| :--- | :---: | :---: | :---: | :---: |
| Highlight | SP1-104-1 | SP1-104-21 | SP1-104-41 | SP1-104-61 |
| Shadow | SP1-104-2 | SP1-104-22 | SP1-104-42 | SP1-104-62 |
| Middle | SP1-104-3 | SP1-104-23 | SP1-104-43 | SP1-104-63 |
| IDmax | SP1-104-4 | SP1-104-24 | SP1-104-44 | SP1-104-64 |

## - Adjustment Procedure -

1. Do ACC for the printer mode.
2. Turn the main power off and on.
3. Enter SP mode.
4. Select "Printer SP".
5. Select SP1-102-001. Then select the necessary print mode to adjust.
6. Choose SP1-103-1 to print out a tone control test sheet if you want to examine the image quality for these settings.
7. Adjust the color density with SP1-104. Compare the tone control test sheet with the C 4 test chart.

## Note

- Adjust the density in this order: "ID Max", "Shadow", "Middle", "Highlight".

8. Use SP1-105-001 to keep the adjusted settings.

3. SBU cover bracket $[A](\hat{e} \times 9)$

4. Sensor board unit $[A](\hat{\theta} \times 4$, Grand screw $\times 1, \hat{2}] \times 2$, 绿 $\times 2$ )

## When reassembling

Adjust the following SP modes after you replace the sensor board unit:

- SP4-008 (Sub Scan Mag): See "Image Adjustment: Scanning".
- SP4-010 (Sub Mag Reg.): See "Image Adjustment: Scanning".
- SP4-011 (Main Scan Reg): See "Image Adjustment: Scanning".
- SP4-688 (DF: Density Adjustment): Use this to adjust the density level if the ID of outputs made in the DF and Platen mode is different.

## Exposure Lamp Stabilizer

1. Rear cover (174)

2. Exposure lamp stabilizer $[\mathrm{A}]\left(\hat{\boldsymbol{g}^{\prime}} \times 2, \mathrm{El} \times 2\right)$

## Scanner HP Sensor

1. Scanner left cover and scanner rear cover ( 181 "Exposure Lamp")
2. Exposure glass ( N .180 )

d086r111
3. Move the 1 st scanner carriage $[\mathrm{A}]$ to the right side.

4. Remove the mylar $[A]$
5. Remove the scanner HP sensor $[\mathrm{B}](\mathrm{m} \times 1$, three snaps)

Platen Cover Sensor

1. Scanner left cover and scanner rear cover (10. 181 "Exposure Lamp")

## Front Scanner Wire

1. Exposure glass (180)

2. Scanner left stay $[A](\hat{B} \times 3)$
3. Front frame $[B]\left(\hat{\theta^{\prime}} \times 5\right)$

4. Front scanner wire clamp [A]
5. Front scanner wire bracket $[B](\hat{\theta} \times 1)$
6. Front scanner wire and scanner drive pulley $[C](\hat{8} \times 1)$

## Reinstalling the Front Scanner Wire

1. Position the center ball $[A]$ in the middle of the forked holder.
2. Pass the right end (with the ball) $[B]$ through the square hole. Pass the left end (with the ring) [C] through the notch.
3. Wind the right end counterclockwise (shown from the machine's front) five times. Wind the left end clockwise twice.

## (4) Note

- The two red marks [D] come together when you have done this. Stick the wire to the pulley with tape. This lets you easily handle the assembly at the time of installation.

4. Install the drive pulley on the shaft $[A]$.

## Note

- Do not attach the pulley to the shaft with the screw at this time.

5. Insert the left end into the slit [B]. The end should go via the rear track of the left pulley [C] and the rear track of the movable pulley [D].

6. Hook the right end onto the front scanner wire bracket [A]. The end should go via the front track of the right pulley $[B]$ and the front track of the movable pulley $[C]$.

## Note

- Do not attach the scanner wire bracket with the screw at this time.

7. Remove the tape from the drive pulley.
8. Insert a scanner-positioning pin $[A]$ through the 2nd carriage hole $[B]$ and the left holes $[C]$ in the front rail. Insert another scanner positioning pin [D] through the 1st carriage hole [E] and the right holes in the front rail [F].
9. Insert two more scanner positioning pins through the holes in the rear rail.
10. Screw the drive pulley to the shaft [G].
11. Screw the scanner wire bracket to the front rail $[H]$.
12. Install the scanner wire clamp [I].
13. Pull out the positioning pins.

## Note

- Make sure the 1 st and 2 nd carriages move smoothly after you remove the positioning pins. Do steps 8 through 13 again if they do not.

Rear Scanner Wire

1. Exposure glass (180)
2. Scanner left stay ( 188 "Front Scanner Wire")

3. Scanner rear frame $[A](\hat{8} \times 9$, ground screw $\times 2, \ldots$ All)
4. Follow the steps 3 through 5 in the "Reinstalling the Front Scanner Wire" Section. You can remove the rear scanner wire with the same manner for replacing the front scanner wire.

## Reinstalling the Rear Scanner Wire

1. Position the center ball $[A]$ in the middle of the forked holder.
2. Pass the left end (with the ball) [B] through the drive pulley notch. Pass the right end (with the ring) [C] through the drive pulley hole.
3. Wind the left end $[B]$ clockwise (shown from the machine's front) five times. Wind the right end $[C]$ counterclockwise three times.

## Note

- The two red marks [D] come together when you do this. Attach the wire to the pulley with tape. This lets you easily handle the assembly at the time of installation.

4. Install the drive pulley on the shaft.

## Note

- Do not attach the pulley on the shaft with the screw at this time.

5. Install the wire.

## Note

- The winding of the wire on the three pulleys at the rear of the scanner should be the same as the winding on the three pulleys at the front. This must show as a mirror image.

Example: At the front of the machine, the side of the drive pulley with the three windings must face the front of the machine. At the rear of the machine, it must face the rear.
6. Do steps 7 through 13 again in the "Reinstalling the Front Scanner Wire" Section.

## Touch Panel Position Adjustment

## 4 Note

- It is necessary to calibrate touch panel at the following times:
- When you replace the operation panel.
- When you replace the controller board.
- When the touch panel detection function does not operate correctly

Do not use items [2] to [9] on the Self-Diagnostic Menu. These items are for design use only.

1. Press 氰, press " 1 ", " 9 ", " 9 ", " 3 ", then press 5 times to open the Self-Diagnostics menu.

b178r548
2. On the touch screen press "Touch Screen Adjust" (or press " 1 ").
3. Use a pointed (not sharp) tool to press the upper left mark " $\mathbf{k}$ ".

4. Press the lower right mark when " O " shows.
5. Press [\#] OK on the screen (or press $-($ ) when you are finished.
6. Touch [\#] Exit on the screen to close the Self-Diagnostic menu. Save the calibration settings.

## Laser Optics

## \. WARNING

- Turn off the main switch and unplug the machine before beginning any of the procedures in this section. Laser beams can cause serious eye injury.

## Caution Decal Location

Caution decals are placed as shown below.

## $\triangle$ WARNING

- Be sure to turn off the main switch and disconnect the power plug from the power outlet before beginning any disassembly or adjustment of the laser unit. This copier uses a class Illb laser beam with a wavelength of 655 nm and an output of 7 mW . The laser can cause serious eye injury.

## LD Safety Switch

A relay on the PSU ensures technician and user safety. It also prevents the laser beam from turning on during servicing. This relay turns off when the front cover, upper left cover, or right door is opened. At this time it cuts the power ( +5 V ) supplied to the LD board for each color through the BICU.

Two safety switches are turned on or off by the front door or right door, and this opens the relay.

- LD Driver: Precise Pulse Modulation ASIC on C-MOS technology
- LDB: LD Drive Board (included in the LD Unit)

## Error Messages

Along with other switches, the LD safety switches help show error messages related to external covers. When one or more covers are open, the messages, "Cover is open." and "Close the indicated cover," show with a diagram. The diagram shows which cover is open.

## Laser Optics Housing Unit

## $\triangle$ CAUTION

- Before installing a new laser optics housing unit, remove the sponge padding and the tag from the new unit.

## Note

- A new laser optics housing unit has a bracket to protect the LD units. When you install the new unit, do not remove the bracket until near the end of the installation procedure (the correct time is stated in the manual).
- This bracket protects a capacitor on the unit. If the bracket is removed too early, you could break the capacitor on the corner of the main frame when you install the new unit.

## Preparing the new laser optics housing unit

1. Polygon motor cover $[A]$ of the laser optics housing unit $(\hat{\theta} \times 4)$
2. Sponge padding $[B]$
3. $\operatorname{Tag}[C]$
4. Reinstall the polygon motor cover [A].

## Before removing the old laser optics housing unit

Do the following settings before removing the laser optics housing unit. These are adjustments for skew adjustment motors in the laser optics housing unit.

1. Plug in and turn on the main power switch of the copier.
2. Enter the SP mode.
3. Execute SP2220-001 to clear the L2 lens positioning motor setting for Magenta.
4. Execute SP2220-002 to clear the L2 lens positioning motor setting for Cyan.
5. Execute SP2220-003 to clear the L2 lens positioning motor setting for Yellow.
6. Exit the SP mode.
7. Turn off the main power switch and disconnect the power cord of the copier.

## Recovery procedure for no replacement preparation of laser optics housing unit

If you did not do the procedure in 'Before removing the old laser optics housing' before removing the old laser optics housing unit, you must do the following.

1. Turn off the main power switch and disconnect the power cord of the copier.
2. Remove the left cover and harness cover bracket (see the following "Removing the old laser optics housing unit")

3. Disconnect the harness $[\mathrm{A}]$ of the skew correction motor.
4. Do steps 1 to 7 of "Before removing the old laser optics housing unit".
5. Connect the harness [A] and reinstall the harness bracket and left cover.
6. Plug in and turn on the main power switch.

## Removing the old laser optics housing unit

1. Controller cover $[\mathrm{A}](\hat{\boldsymbol{\theta}} \times 3)$
2. Left cover $[B]\left(\hat{\theta^{2}} \times 6\right)$

d086r115
3. Airflow fan bracket $[\mathrm{A}]$ for the laser housing optics unit $\left.\left(\hat{\theta^{2}} \times 4, \hat{C l}\right] \times 2\right)$

## Installing a new Laser Optics Housing Unit

## Note

- A new laser optics housing unit has a bracket to protect the LD units. When you install the new unit, do not remove the bracket until near the end of the installation procedure (the correct time is stated in the manual).
- This bracket protects a capacitor on the unit. If the bracket is removed too early, you could break the capacitor on the corner of the main frame when you install the new unit.

1. Push the new laser optics housing unit $[A]$ slowly into the copier until the bracket $[B]$ bumps against the frame of the copier.
2. Remove the bracket $[B]$, and then push the new laser optics housing unit fully into the copier ( $\times 2$, All $\mathrm{m}^{\mathrm{D}} \mathrm{s}$, 恖 x 3 )
3. Reassemble the machine.

## After installing the new laser optics housing unit

Do the following adjustment after installing the new laser optics housing unit.

1. Plug in and turn on the main power switch.

| Input data for SP modes |  |
| :---: | :---: |
| Main Scan Length Detection Disp. Bk | SP 2-185-001:247975 |
| Color Registration Correction Bk | SP 2-101-001:-031 |
| Prt Mag Adj Bk | SP 2-102-013: 002 |
| Prt Mag Adj M | SP 2-102-014: +002 |
| Prt Mag Adj C | SP 2-102-015: +002 |
| Prt Mag Adj Y | SP 2-102-016: +000 |

2. Adjust the main scan magnification for $K, M, C, Y$.

- Input the standard values [C] provided with a new laser optics housing unit for the main scan magnification adjustment with SP2-102-013, 014, 015, 016.

## ) Note

- The values [C] are different for each laser optics housing unit.

3. Adjust the main scan magnification only for black (K).

- Input the standard value [A] provided with a new laser optics housing unit for the main scan magnification adjustment with SP2-185-001.

## Note

- The value $[\mathrm{A}]$ is different for each laser optics housing unit.
- Print the test pattern (14: 1-dot trimming pattern in the SP2-109-003).
- Check that the left and right trim margin is within $4 \pm 1 \mathrm{~mm}$. If not, change the standard value for the main scan magnification adjustment.

4. Adjust the main scan registration only for black (K).

- Input the registration value $[B]$ provided with a new laser optics housing unit for the main scan registration adjustment with SP2101-001.

## Note

- The value $[B]$ is different for each laser optics housing unit.
- Print the test pattern (14: 1-dot trimming pattern in the SP2-109-003).
- Check that the left trim margin is within $2 \pm 1 \mathrm{~mm}$. If not, change the registration value for the main scan registration adjustment.

5. Select "0" with SP2-109-003 after printing the " 1 -dot trimming pattern.
6. Do the line position adjustment.

- First do SP2-111-3.
- Then do SP2-111-1.

To check if SP 2-111-1 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-10 to -12.
7. Exit the SP mode.

After you replace the housing unit, do the adjustments in the following section of the manual: Image Adjustment - Registration.

## Polygon Mirror Motor and Drive Board

1. Laser optics housing unit [A] p.196)

2. Polygon mirror motor cover $[A]$ of the laser optics housing unit $(\hat{8} \times 4)$

3. Polygon mirror motor holder $[A](\hat{8} \times 2)$
4. Polygon mirror motor $[B](\hat{8} \times 4, ~(1)$

After installing the polygon mirror motor:

- 1) Do the "Forced Line Position Adj. Mode c" (SP2-111-3).
- 2) Then do the "Forced Line Position Adj. Mode a" (SP2-111-1).

To check if SP 2-111-1 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-10 to -12.

After you replace the motor, do the adjustments in the following section of the manual: Image Adjustment - Registration.

## Airflow Fans

1. Controller cover (173)
2. Left cover (173)

3. Airflow fan bracket $[A]$ for the laser housing optics unit ( $\hat{\boldsymbol{\theta}} \times 4, ~ \hat{2}] \times 2$ )

4. Airflow fans [A]

- There are two airflow fans on the baracket.

## Image Creation

## PCDU

## Note

- Do not touch the OPC drum. Do not let metal objects touch the development sleeve.

1. Open the front door.

2. Lever lock $[A](\hat{\theta} \times 1)$
3. Turn the drum positioning plate lever $[\mathrm{B}]$ and the image transfer unit lock lever $[\mathrm{C}]$ counter-clockwise.
4. Open the drum positioning plate [D].

5. Pull out the PCDU (hold the grip while you pull it out).

## Drum Unit and Development Unit

The new drum unit has a front cover and a front joint. When you attach the new drum unit to the development unit, remove a front cover and a front joint at first.

And use them for reassembling the new drum unit and development unit.

1. If you install a new drum unit, set SP 3902-xxx to "1".

- Black: 3902-009
- Yellow: 3902-010
- Cyan: 3902-011
- Magenta: 3902-012

## 」 Note

- If you do this, then the machine will reset the PM counter for the drum unit automatically, after you turn the power on again.

2. Turn the machine power off.
3. PCDU p .205)

4. Front cover $[A](\hat{\theta} \times 2)$

d027r121

## Note

- Do not touch the bearing [A] after removing the front cover. The bearing is properly applied with lubricant.

5. Remove the bushing $[A]$ of the development roller at the rear of the PCDU $(\& \times 1)$.

## Important

- Do not put too much weight on the PCDU. Otherwise, the plastic frame [B] of the development unit may be damaged.

6. Remove the front joint $[A](\hat{\theta} \times 2, \hat{\Omega}) \times 1)$.

## Note

- The front joint $[A]$ is firmly set. Remove it with a flat screwdriver.

d027r124

7. Drum unit [A] and Development Unit [B]

## Note

- When the development unit is removed from the drum unit, clean the entrance mylar [C] with a vacuum.

8. Rotate the development roller [A] five or six times in the counterclockwise direction.

## Note

- This step removes developer that has stuck to the development roller, which would cause color unevenness.

9. If you change the development unit, do the ACC procedure.
10. Execute the drum phase adjustment with SP1902-00 1 twice.

When reassembling the PCDU:

d027r681

- Make sure that the harness $[A]$ is hooked as shown.

## Developer

1. Set SP 3902-xxx to " 1 ".

Black: 3902-005
Yellow: 3902-006
Cyan: 3902-007

Magenta: 3902-008
2. Turn the machine power off.
3. Development unit (206)

4. Hopper cover [A] (4 hooks)

- Release the three hooks first in the correct order (from (1) to (3)).
- Put the head of a screwdriver in the groove gap [B] as shown, and then release the hook (4).

## $\triangle$ CAUTION

- Follow the correct order (1) to (4). Otherwise, the hopper cover may be damaged. The hook (4) breaks easily.

5. Shake a bag of developer and pour it into the development hopper [A].
6. Reattach the hopper cover (hook $\times 3$ ).

## $\triangle$ CAUTION

- Keep the developer off at both ends of the development unit enclosed in red lines in the diagram.

7. Turn the machine power on. The machine initializes the developer and resets the PM counter for the developer. (For details of the developer initialization result, see "Developer Initialization Result" in the "Appendix: Process Control Error Conditions" chapter.
8. Do the ACC procedure.

## Toner Collection Bottle

If you will install a new bottle, and the old bottle is not in a full or near-full condition, then set SP 3902-017 to 1 .

## $\downarrow$ Note

- If you do this, then the machine will reset the PM counter for the bottle automatically, after you turn
- If the bottle is in a full or near-full condition, it is not necessary to do this.

1. Turn off the main power switch.

2. Open the front door and remove the screw $[\mathrm{A}]$.
3. Close the front door.
4. Pull out tray $1[B]$.
5. Open the toner collection bottle door [C].
6. Pull out the toner collection bottle [D].

## Second Duct Fan

1. Rear cover (174)
2. Right rear cover ( N .174 )
3. Open the controller box ( N .309 "Controller Box")

d027r127
4. Second duct $[A](\hat{B} \times 2, \hat{m} \times 1$, 包 $\times 2$ )

5. Split the second duct (4 hooks).

d027r129

## When reinstalling the second duct fan

Make sure that the second duct fan is installed with its decal facing to the front of the machine.

## Third Duct Fan

1. Rear cover (174)
2. Right rear cover (174)
3. Open the controller box ( N .309 "Controller Box")

4. Third duct $[\mathrm{A}]\left(\hat{\mathcal{E}^{2}} \times 2, \mathrm{E}_{\mathrm{Cl}}^{\mathrm{l}} \times 1\right)$

5. Third duct fan [A] (3 hooks)

## When reinstalling the third duct fan

Make sure that the third duct fan is installed with its decal facing to the upper side of the machine.

## Toner Pump Unit

There are four pump units inside the machine. This procedure describes the replacement procedure only for one unit. If you need to replace another unit, do the same as this procedure.

## Note

- Put some sheets of paper on the floor before doing this procedure. Toner may fall on the floor.

1. Rear cover (p.174)
2. Image transfer belt unit ( N .221)
3. All PCDUs ( p .205)
4. Put a sheet of paper (A3/DLT) inside the machine as shown and on the floor.

## Note

- The sheet of paper on the floor is used in a later step.

d027r134

5. Release the harness [A] from the clamp (氨 $x 1$ for $Y C M$, 俭 $\times 2$ for $K$ ) and hook, and then disconnect the harness.

## Note

- Avoid touching these spring terminals [B].

6. Release the toner supply tube [C].

7. Remove the toner pump unit $[A](\hat{\theta} \times 2)$

- Make sure that a sheet of paper is attached to the frame of the rear side. The picture on the left shows a sheet of paper that is correctly set, but the picture on the right shows a sheet of paper that is not correctly set. This sheet of paper prevents toner and screws from falling into the laser optics housing unit through cutouts.

d027r705

8. Slowly remove the toner supply tube [A] from the toner pump unit by pulling the tube right and left.
9. Turn up the openings of the toner pump unit and toner supply tube just after removing the tube.

## Note

- If not, the toner may scatter away and fall down.

10. Put the toner pump unit on the sheet of paper, which has been put in step 4 , with its opening [A] up.

11. Keep the opening $[A]$ of the toner supply tube up, and then clip the opening of the toner supply.

## When you install the new toner pump unit

Before installing the new toner pump unit, mask the opening of the old toner pump unit with tape. Dispose of it following local rules.

1. Put a sheet of paper (A3/DLT) inside the machine.
2. Turn up the opening of the toner supply tube, and then remove the object that was used to clip the opening of the toner supply tube.
3. Insert the opening of the toner pump unit $[A]$ into the opening of the toner supply tube $[B]$ as far as possible.

4. Connect the harness $[\mathrm{A}]$ to the connector of the machine.

## Note

- On the above picture, the magnified picture of the connector shows the easiest way to connect it.

5. Clamp the harness $[A]$ (脃 $x 1$ for $Y C M$, 家 $\times 2$ for $K$ ).

## Note

- Avoid touching these spring terminals [B].

6. Pass the harness of the toner pump unit behind the hook [A], while pressing at [B].
7. Secure the toner supply tube with the holder [C], lifting up the edge of the holder "very gently".

## Note

- Be careful when you lift the edge of the holder, because the holder is easily broken.

8. Insert the toner pump unit $[A]$ into the rear frame of the machine $(\hat{\theta} \times 2)$.

Toner End Sensor

1. Rear cover (174)
2. Open the controller box ( p .309 "Controller Box")
3. Toner end sensor [A] ( $£ 1$, 2 hooks each)

## $\downarrow$ Note

- A toner end sensor is not installed in the entrance of the toner supply tube for black.

## Image Transfer

## Image Transfer Belt Unit

1. Open the right door.
2. Open the front door.
3. Open the drum positioning plate. ( 205 "PCDU")

4. Turn the image transfer belt unit lock lever [A] counterclockwise.
5. Pull out the image transfer belt unit $[B]$ halfway.

6. Grasp the handles [A], and then pull out the image transfer belt unit fully.

## Image Transfer Belt Cleaning Unit

1. If you will install a new belt cleaning unit, then set SP 3902-015 to 1 .

## $\downarrow$ Note

- If you do this, then the machine will reset the PM counter for the belt cleaning unit automatically, after you turn the power on again.
- Do not use SP3902-015 or 013 if you replace the complete ITB unit.

2. Turn off the main power switch.
3. Open the right door.
4. Open the front door.
5. Open the drum positioning plate. (205)

6. Loosen the screw $[\mathrm{A}]$.
7. Turn the lock lever $[B]$ clockwise
8. Pull out the image transfer belt cleaning unit [C].

## Image Transfer Belt

1. Image transfer belt cleaning unit (15.222)
2. Image transfer belt unit (1) p.221)

3. Turn the image transfer unit contact lever [A] counterclockwise (as seen from the rear).
4. Gear [B] (hook x 1)
5. Turn the gear cover $[C]$ clockwise (as seen from the rear) $(\hat{\beta} \times 1)$.

6. Three stays $[A]\left(\hat{\theta^{2}} \times 6\right)$

d027r545
7. Guide plate $[A]$ (as seen from the right side of the machine) $(\hat{\theta} \times 2)$

8. Remove the two screws and then the rear holder bracket [A] (as seen from the rear).

d027r140
9. Remove the two screws and then the front holder bracket [A] (as seen from the front).

10. Put the front side of the image transfer belt unit on a corner of the table or a box as shown.

11. Pull the tension roller [A] as shown.

12. Image transfer belt [A]

## When reinstalling the image transfer belt

- Clean all rollers with dry cloth before installing the image transfer belt.

- There is a rim [A] at each edge of the transfer belt. The ends of all the rollers ([B] for example) in the transfer belt unit must be between the two rims.

## Note

- There are two rims (width [C]: about 5 mm ) on the underside of the front and rear edges of the image transfer belt.

- This belt must be installed the correct way around. When you reinstall the image transfer belt unit, install it with the number [A] on the belt at the rear side of the unit.

- Put "Lubricant Powder" (B132 9700) on the surface of the image transfer belt [A], while you turn the drive gear [B] at a constant speed, as shown. (The straight arrow in the picture shows belt movement direction.) Lubricant powder prevents the image transfer cleaning blade from turning up.

## Note

- Do not put the lubricant powder at the right side of the image transfer belt unit (the above picture is taken from the rear). Otherwise, lubricant powder may damage the encoder sensor.

## Paper Transfer

## Paper Transfer Roller Unit

If you will install a new paper transfer unit, then set SP 3902-016 to 1 .

## $\downarrow$ Note

- If you do this, then the machine will reset the PM counter for the paper transfer unit automatically, after you turn the power on again.

1. Open the right door.

2. Release the white hook.
3. Paper transfer roller unit [A]

## Paper Transfer Unit

If you will install a new paper transfer unit, then set SP3-902-016 to 1 .
Note

- If you do this, then the machine will reset the PM counter for the paper transfer unit automatically, after you turn the power on again.

1. Turn off the main power switch.

2. Open the duplex door $[A]$.
3. Open the by-pass tray $[\mathrm{B}]$
4. Right door cover $[C]\left(\hat{\theta^{2}} \times 4\right)$
5. Open the right door.

6. Right door inner cover $[\mathrm{A}]\left(\hat{\hat{\theta}^{2}} \times 1\right)$

7. Pivot bracket $[\mathrm{A}](\hat{\theta} \times 1)$
8. Paper transfer unit [B] (E2] $\times 1,2$ springs)

## ID Sensor Board

1. K PCDU ( p 205)
2. Open the right door.
3. Fusing unit (1) 257)

6. ID sensor cover $[A]\left(\hat{\theta^{2}} \times 4\right)$
7. ID sensor board $[B](\hat{\theta} \times 2)$

## Cleaning for ID sensors

ID sensors require a cleaning procedure every EM. Do the following steps for ID sensor cleaning.

d027r147

1. K PCDU ( p .205)
2. Fusing unit ( N .257)
3. Image transfer belt unit ( N .221 )
4. Slide the ID sensor shutter $[\mathrm{A}]$ to the left side.
5. Clean the ID sensors keeping the ID sensor shutter to the left.

## After installing a new ID sensor unit/board

Do the following adjustment after installing a new ID sensor unit/board.

1. Plug in and turn on the main power switch of the copier.
2. Enter the SP mode.

3. Input two correction coefficients [A] for the ID sensor with SP3-362-013 and SP3-362-016 on the barcode sheet provided with the new ID sensor unit/board.

## Note

- For example, input " 1.03 " with SP3-362-013.
- SP numbers other than SP3-362-013 and -016 are not required for this procedure.

4. Exit the SP mode.

## Temperature and Humidity Sensor

## When installing the drive unit

b222r573
Make sure that the bushing $[A]$ is fully set in the frame of the gear unit before installing the timing belt and pulley to the shaft [B].

## Adjustment after replacing the gear unit

Do the following procedures after replacing the gear unit.

1. Turn on the main power switch.
2. Enter "System SP" in the SP mode.
3. Do "Amplitude Control" with SP1-902-001.
4. Check the result of the Amplitude Control with SP1-902-002.

0: Success, 2: Failure due to no sampling data,
3: Failure due to insufficient number of pattern detections
When the result of this adjustment is "2" or "3":

- Check that all the PCUs are correctly set and that the image transfer belt unit is correctly set.
- Do "Amplitude Control " again after checking the PCUs and image transfer belt unit.

When the result is still "2" or "3" after checking the PCUs and image transfer belt unit:

- Check that the gear unit is installed correctly.

5. Exit the SP mode.

## Fusing

## Fusing Unit Maintenance Parts

In the fusing unit, there are some maintenance parts. However, these parts are defined as EM parts. Refer to the following list to check the maintenance parts.

| Maintenance Parts | Replacement Procedure |
| :--- | :--- |
| Heating Roller | p. 260 |
| -Bearing | p. 260 |
| Pressure Roller | p. 268 |
| -Bearing | p. 268 |

## Fusing Unit

## $\triangle$ CAUTION

- Turn off the main switch and wait until the fusing unit cools down before beginning any of the procedures in this section. The fusing unit can cause serious burns.

1. If you will replace the heating roller or pressure roller in the fusing unit (at PM for example), then reset each counter.

- Set SP 3902-018 to " 1 " for the heating roller replacement.
- Set SP 3902-019 to " 1 " for the pressure roller replacement.

## Note

- If you do this, then the machine will reset the PM counter for the heating roller or pressure roller automatically, after you turn the power on again.
- It is not necessary to clear the PM counter for the fusing unit with SP mode when you replace the fusing unit. This is because the fusing unit has a new unit detection mechanism.

2. Turn off the main power switch.
3. Open the right door.

4. Front fusing stopper $[\mathrm{A}](\hat{\theta} \times 1)$
5. Rear fusing stopper $[B](\hat{8} \times 1)$

6. Release the lock levers [A].
7. Hold the fusing unit handles $[B]$, and then pull out the fusing unit.

## Fusing Entrance Guide Plate

1. Fusing unit p (257)

2. Fusing entrance guide plate $[A]\left(\hat{\boldsymbol{\theta}^{\prime}} \times 2\right)$

## Cleaning Requirement

d088r374
The fusing entrance guide plate requires cleaning maintenance every fusing unit maintenance interval. Clean the fusing entrance guide plate at the place shown above with a dry cloth, and then clean the fusing entrance guide plate again with a cloth moistened with alcohol.

## Fusing Exit Guide Plate Cleaning Procedure

The fusing exit guide plate requires cleaning maintenance every fusing unit maintenance interval.

1. Fusing unit (257)

2. Open the exit guide plate $[\mathrm{A}]$.
3. Clean the exit guide plate with a dry cloth, and then clean the exit guide plate again with a cloth moistened with alcohol at the points shown above.

## Heating Roller and Heating Roller Bearing

1. Fusing unit ( m .257)

2. Open the jam removal door [A].
3. Front fusing cover $[\mathrm{B}](\hat{\boldsymbol{\theta}} \times 2$; Stepped screws)
4. Rear fusing cover $[C](\hat{\theta} \times 2$; Stepped screws)

6. Pressure roller contact shaft actuator $[A]$ and pressure roller contact shaft gear $[B](\hat{8} \times 1, E \times 1)$

7. Turn both pressure levers $[A][B]$, and pull out pins $[C][D]$.

## $\triangle$ CAUTION

- If the pins $[C][D]$ are not pulled out in this step, the fusing unit frames may become bent.

8. Front bracket $[\mathrm{A}]\left(\hat{\boldsymbol{\theta}^{2}} \times 4\right)$

9. Rear bracket $[A](\hat{\theta} \times 4)$

10. Top stay $[A](\hat{\theta} \times 4)$

11. Heating roller bearing $[\mathrm{A}]$ at the front side (C-ring $\times 1$ )

12. Fusing drive gear [A]
13. Heating roller gear $[A]$ (C-ring $\times 1)$

14. Heating roller bearing $[\mathrm{A}]$ at the rear side

15. Keep the heating roller stripper plate $[A]$ open, and then remove the heating roller $[B]$.

d086r210
16. Heating roller $[A]$

## Note

- The surface of the heating roller is fragile, so the heating roller must be covered with a sheet of paper when it is placed on a table or floor.

## When re-installing the heating roller

1. Apply three spots of "Barrierta S552R" (the diameter of each spot must be about 3 mm in diameter, and approximately 0.1 g in weight) to the front shaft of the heating roller at 2.3 mm from the notch [A].
2. Apply three spots of "Barrierta S552R" (the diameter of each spot must be about 3 mm in diameter, and approximately 0.1 g in weight) to the rear shaft of the heating roller at $2-3 \mathrm{~mm}$ from the edge $[B]$ (rear side of the heating roller).

## Note

- Do not wipe off the grease of the new fusing drive gear when replacing the fusing drive gear [A].

## Heating Roller Stripper Plate Installation

The heating roller stripper plate may come off the fusing unit frame after removing the heating roller.
When reinstalling the heating roller stripper plate:

1. Set the heating roller stripper plate $[A]$ on the fusing frame first.
2. Attach the springs [B] (front and rear) correctly as shown above.
3. Turn the springs as shown above so that the springs hook the fusing unit frame and heating roller stripper plate.
4. Hold the heating roller stripper plate, and then install the heating roller.

- The heating roller stripper plate is not supported before installing the heating roller in the fusing unit frame. If you stop holding, the heating roller stripper plate can fall down.

## Fusing Cleaning Felt

1. Fusing unit (257)
2. Heating roller (p.260)

3. Remove the fusing cleaning felt $[\mathrm{A}]$.

## When attaching a new fusing cleaning felt

Attach the fusing cleaning felt [A], aligning both edges of the fusing cleaning felt with the red lines on the bottom cover.

## Note

- Make sure that the fusing cleaning felt is correctly attached to the frame. Otherwise, dust from the IH coil unit may fall on the paper in the fusing unit and the output becomes dirty.

## Fusing Lamp

1. Fusing unit (1)257)
2. Front bracket (260)
3. Rear bracket (260)

6. Fusing lamp rear bracket $[\mathrm{A}]\left(\begin{array}{l}\hat{8} \times 1)\end{array}\right.$

7. Fusing lamp [A]

## $\triangle$ CAUTION

- Remove the fusing lamp without touching the glass part [B].
- Pay attention to the direction of the fusing lamp during the re-installation.

7. Lamp holder front bracket $[B](\hat{8} \times 1)$
8. Pressure roller bearing [C] at the front side (C-ring $\times 1$ )

9. Keep the pressure roller stripper plate $[A]$ open.
10. Pressure roller [B]

When re-installing the pressure roller

1. Apply "Barrierta $S 552 R$ " to the front shaft of the pressure roller at 2 mm from the notch $[A]$, and to the rear shaft of the pressure roller at 2 mm from the edge [B]. (Apply the lubricant to half of the circumference of the pressure roller, as shown in the lower of the three above diagrams.)

2. Make sure that pressure roller bearing [C] at the front side is set as shown above.

## Pressure Roller Stripper Plate Installation

When reinstalling the pressure roller stripper plate:

1. Set the springs [A] (front and rear) correctly as shown above.
2. Install the pressure roller stripper plate $[B]$ in the fusing unit frame as shown above.

d086r740a
3. Turn the pressure roller stripper plate $[B]$.
4. Hold the pressure roller stripper plate, and then install the pressure roller.

- The pressure roller stripper plate is not supported before installing the pressure roller in the fusing unit frame. If you stop holding, the pressure roller stripper plate can fall down.

## Note

- Make sure the NVRAM is correctly installed on the BICU. Insert the NVRAM in the NVRAM slot with the "half-moon" pointing $[B]$ to the upward side.

## When installing the new BICU

Remove the NVRAM from the old BICU. Then install it on the new BICU after you replace the BICU. Replace the NVRAM ( "NVRAM Replacement Procedure" in the Appendices) if the NVRAM on the old BICU is defective.

## Note

- Make sure you print out the SMC reports ("SP Mode Data" and "Logging Data") before you replace the NVRAM.

## CAUTION

- Keep NVRAMs away from any objects that can cause static electricity. Static electricity can damage NVRAM data.
- Make sure that the DIP-switch settings on the old BICU are the same for the new BICU when. Do not change the DIP switches on the BICU in the field.
- Make sure the serial number is input in the machine for the NVRAM data; if not, SC 995-001 occurs.

## When installing the new controller board

Remove the NVRAM from the old controller board. Then install it on the new controller board after you replace the controller board. Replace the NVRAM if the NVRAM on the old controller board is defective.

## $\downarrow$ Note

- Make sure you print out the SMC reports ("SP Mode Data" and "Logging Data") before you replace the NVRAM.

## $\triangle$ CAUTION

- Keep NVRAMs away from any objects that can cause static electricity. Static electricity can damage NVRAM data.
- Make sure the NVRAM is correctly installed on the controller board.
- Make sure that the DIP-switch settings on the old controller board are the same for the new controller board. Do not change the DIP switches on the controller board in the field.

## HDD Fan

2. Remove the HDD $[A]$ with the bracket $(\hat{8} \times 4,2) \times 2)$.

3. Remove the HDD from the bracket $[A](\hat{\theta} \times 4)$.

## When installing a new HDD unit

1. Turn the main power switch on. The disk is automatically formatted.
2. Install the stamp data using "SP5853".
3. Switch the machine off and on to enable the fixed stamps for use.

## Disposal of HDD Units

- Never remove an HDD unit from the work site without the consent of the client.
- If the customer has any concerns about the security of any information on the HDD, the HDD must remain with the customer for disposal or safe keeping.
- The HDD may contain proprietary or classified (Confidential, Secret) information. Specifically, the HDD contains document server documents and data stored in temporary files created automatically
during copy job sorting and jam recovery. Such data is stored on the HDD in a special format so it cannot normally be read but can be recovered with illegal methods.

## Reinstallation

Explain to the customer that the following information stored on the HDD is lost when the HDD is replaced:

- Document server documents
- Custom-made stamps
- Document server address book

The address book and document server documents (if needed) must be input again.
If you previously backed up the address book to an SD card with SP5846 051, you can use SP 5846 052 to copy the data from the SD card to the hard disk.

If the customer is using the Data Overwrite Security feature, the DOS function must be set up again. For more, see Section 1 (Installation).

If the customer is using the optional Browser Unit, this unit must be installed again. For more, see Section 1 (Installation).

## NVRAM Replacement Procedure

## RTB 14

## NVRAM on the BICU

Replace this procedure

1. Make sure that you have the SMC report (factory settings). This report comes with the machine.
2. Output the SMC data ( SP5-990-001) if possible.
3. Turn the main switch off.
4. Install an SD card into SD card slot 3. Then turn the main power on.
5. Copy the NVRAM data to an SD card ( SP5-824-001) if possible.
6. Turn off the main switch. Then unplug the power cord.
7. Replace the NVRAM on the BICU and reassemble the machine.
8. Plug in the power cord. Then turn the main switch on.
9. Select a paper-size type ( SP5-131-001).
10. Specify the serial number and destination code of the machine.

## ( Note

- Contact your supervisor for details on how to enter the serial number and destination code.
- SC 999 or "Fusing Unit Setting Error" can be shown until the serial number and destination code are correctly programmed.

11. Turn the main switch off and on.
12. Copy the data from the SD card to the NVRAM (SP5-825-001) if you have successfully copied them to the SD card.
13. Turn the main switch off. Then remove the SD card from SD card slot 3 .
14. Turn the main switch on.
15. Specify the SP and UP mode settings.
16. Do the process control self-check.
17. Do ACC for the copier application program.
18. Do ACC for the printer application program.

## Using Dip Switches

## 5. System Maintenance

## Service Program Mode

## CAUTION

- Make sure that the data-in LED $(\vartheta)$ is not on before you go into the SP mode. This LED indicates that some data is coming to the machine. When the LED is on, wait for the copier to process the data.

## SP Tables

See "Appendices" for the following information:

- System SP Tables
- Printer SP Tables
- Scanner SP Tables

## Enabling and Disabling Service Program Mode

## Note

- The Service Program Mode is for use by service representatives only. If this mode is used by anyone other than service representatives for any reason, data might be deleted or settings might be changed. In such case, product quality cannot be guaranteed any more.

## Entering SP Mode

For details, ask your supervisor.

## Exiting SP Mode

- Press "Exit" on the LCD twice to return to the copy window.

## Types of SP Modes

- System SP: SP modes related to the engine functions
- Printer SP: SP modes related to the controller functions
- Scanner SP: SP modes related to the scanner functions
- Fax SP: SP modes related to the fax functions

Select one of the Service Program modes (System, Printer, Scanner, or Fax) from the touch panel as shown in the diagram below after you access the SP mode. This section explains the functions of the System/ Printer/Scanner SP modes. Refer to the Fax service manual for the Fax SP modes.

## SP Mode Button Summary

Here is a short summary of the touch-panel buttons.

| 1 | Opens all SP groups and sublevels. |
| :---: | :--- |
| 2 | Closes all open groups and sublevels and restores the initial SP mode display. |

| 3 | Opens the copy window (copy mode) so you can make test copies. Press SP Mode (highlighted) <br> in the copy window to return to the SP mode screen, |
| :---: | :--- |
| 4 | Enter the SP code directly with the number keys if you know the SP number. Then press <br> required SP Mode number will be highlighted when pressing $\oplus$ ( <br> S. If not, just press the required <br> SP Mode number.) |
| 5 | Press two times to leave the SP mode and return to the copy window to resume normal operation. |
| 6 | Press any Class 1 number to open a list of Class 2 SP modes. |
| 7 | Press to scroll the show to the previous or next group. |
| 8 | Press to scroll to the previous or next display in segments the size of the screen display (page). |
| 9 | Press to scroll the show the previous or next line (line by line). |
| 10 | Press to move the highlight on the left to the previous or next selection in the list. |

## Switching Between SP Mode and Copy Mode for Test Printing

1. In the SP mode, select the test print. Then press "Copy Window".
2. Use the copy window (copier mode), to select the appropriate settings (paper size, etc.) for the test print.
3. Press Start ${ }^{(9)}$ to start the test print.
4. Press SP Mode (highlighted) to return to the SP mode screen and repeat from step 1 .

## Selecting the Program Number

Program numbers have two or three levels.

1. Refer to the Service Tables to find the SP that you want to adjust before you begin.
2. Press the Group number on the left side SP Mode window that contains the SP that you want to adjust.
3. Use the scrolling buttons in the center of the SP mode window to show the SP number that you want to open. Then press that number to expand the list.
4. Use the center touch-panel buttons to scroll to the number and title of the item that you want to set and press it. The small entry box on the right activates and shows the below default or the current settings.

## Note

- Refer to the Service Tables for the range of allowed settings.

5. Do this procedure to enter a setting:

- Press to toggle between plus and minus and use the keypad to enter the appropriate number. The number you enter writes over the previous setting.
- Press $\oplus$ to enter the setting. (The value is not registered if you enter a number that is out of range.)
- Press "Yes" when you are prompted to complete the selection.

6. If you need to perform a test print, press Copy Window to open the copy window and select the settings for the test print. Press Start ${ }^{(9)}$ and then press SP Mode (highlighted) in the copy window to return to the SP mode display.
7. Press Exit two times to return to the copy window when you are finished.

## Exiting Service Mode

- Press the Exit key on the touch-panel.

## Service Mode Lock/Unlock

At locations where the machine contains sensitive data, the customer engineer cannot operate the machine until the Administrator turns the service mode lock off. This function makes sure that work on the machine is always done with the permission of the Administrator.

1. If you cannot go into the SP mode, ask the Administrator to log in with the User Tool and then set
"Service Mode Lock" to OFF after he or she logs in:
User Tools > System Settings > Administrator Tools > Service Mode Lock > OFF

- This unlocks the machine and lets you get access to all the SP codes.
- The CE can service the machine and furn the machine off and on. It is not necessary to ask the Administrator to log in again each time the machine is turned on.

2. Go into the SP mode and set SP5 169 to " 1 " if you must use the printer bit switches.
3. After machine servicing is completed:

- Change SP5 169 from " 1 " to "0".
- Turn the machine off and on. Tell the administrator that you have completed servicing the machine.
- The Administrator will then set the "Service Mode Lock" to ON.

## Remarks

## Display on the Control Panel Screen

The maximum number of characters which can show on the control panel screen is limited to 30 characters. For this reason, some of the SP modes shown on the screen need to be abbreviated. The following are abbreviations used for the SP modes for which the full description is over 20 characters.

## Paper Weight

Thin paper: $52-59 \mathrm{~g} / \mathrm{m}^{2}$
Plain Paper: $60-90 \mathrm{~g} / \mathrm{m}^{2}, 16-24 \mathrm{lb}$.
Middle Thick: 91-105 g/m², 24-28lb.
Thick Paper 1: $106-169 \mathrm{~g} / \mathrm{m}^{2}, 28.5-44.9 \mathrm{lb}$.
Thick Paper 2: $170-220 \mathrm{~g} / \mathrm{m}^{2}, 45-58 \mathrm{lb}$.
Thick Paper 3: $221-256 \mathrm{~g} / \mathrm{m}^{2}$, 59lb-68lb
Thick 4: $257 \mathrm{~g} / \mathrm{m}^{2}-300 \mathrm{~g} / \mathrm{m}^{2}, 68.4-79.8 \mathrm{lb}$

## Paper Type

N : Normal paper
MTH: Middle thick paper
TH: Thick paper

## Paper Feed Station

P: Paper tray
B: By-pass table

## Color Mode [Color]

[K]: Black in B\&W mode
[Y], [M], or [C]: Yellow, Magenta, or Cyan in Full Color mode
[YMC]: Only for Yellow, Magenta, and Cyan
[FC]: Full Color mode
[FC, K], [FC, Y], [FC, M], or [FC, C]: Black, Yellow, Magenta, or Cyan in full color mode

| Print Mode | Process Speed |
| :--- | :--- |
| S: Simplex | L: Low speed $(77 \mathrm{~mm} / \mathrm{s})$ |
| D: Duplex | M: Middle speed $(154 \mathrm{~mm} / \mathrm{s})$ |

## Others

The following symbols are used in the SP mode tables.
FA: Factory setting
(Data may be adjusted from the default setting at the factory. Refer to the factory setting sheets enclosed. You can find it under the jammed paper removal decal.)

DFU: Design/Factory Use only
Do not touch these SP modes in the field.
A sharp (\#) to the right hand side of the mode number column means that the main switch must be turned off and on to effect the setting change.
An asterisk (*) to the right hand side of the mode number column means that this mode is stored in the NVRAM. If you do a RAM clear, this SP mode will be reset to the default value. "ENG" and "CTL" show which NVRAM contains the data.

- ENG: NVRAM on the BICU board
- CTL: NVRAM on the controller board

The settings of each SP mode are explained in the right-hand column of the SP table in the following way.
[Adjustable range / Default setting / Step] Alphanumeric

## $\downarrow$ Note

- If "Alphanumeric" is written to the right of the bracket as shown above, the setting of the SP mode shows on the screen using alphanumeric characters instead of only numbers. However, the settings in the bracket in the SP mode table are explained by using only the numbers.

SSP: This denotes a "Special Service Program" mode setting.

| 062 | Use Proxy | This SP setting determines if the proxy server is used when the machine communicates with the service center. |
|  | Proxy Host |  |
| 063 | This SP sets the address of the proxy server used for communication between the RCG device and the gateway. Use this SP to set up or display the customer proxy server address. <br> The address is necessary to set up the embedded RCG-N. <br> + Note <br> - The address display is limited to 128 characters. Characters beyond the 128 character are ignored. <br> - This address is customer information and is not printed in the SMC report. |  |
|  | Proxy PortNumber |  |
| 064 | This SP sets the port number of the proxy server used for communication between the embedded RCG-N and the gateway. This setting is necessary to set up the embedded RCG-N. <br> Note <br> - This port number is customer information and is not printed in the SMC report. |  |
|  | Proxy User Name |  |
| 065 | This SP sets the HTTP proxy certification user name. <br> Note <br> - The length of the name is limited to 31 characters. Any character beyond the 31 st character is ignored. <br> - This name is customer information and is not printed in the SMC report. |  |

| 067 | CERT:Up State |  |
|  | Displays the status of the certification update. |  |
|  | 0 | The cerrification used by RCG-N is set correctly. |
|  | 1 | The cerrification request (setAuthKey) for update has been received from the GW URL and certification is presently being updated. |
|  | 2 | The certification update is completed and the GW URL is being notified of the successful update. |
|  | 3 | The certification update failed, and the GW URL is being notified of the failed update. |
|  | 4 | The period of the certification has expired and new request for an update is being sent to the GW URL. |
|  | 11 | A rescue update for certification has been issued and a rescue cerrification setting is in progress for the rescue GW connection. |
|  | 12 | The rescue certification setting is completed and the GW URL is being notified of the cerrification update request. |
|  | 13 | The notification of the request for certification update has completed successfully, and the system is waiting for the cerification update request from the rescue GW URL. |
|  | 14 | The notification of the certification request has been received from the rescue GW controller, and the certification is being stored. |
|  | 15 | The certification has been stored, and the GW URL is being notified of the successful completion of this event. |
|  | 16 | The storing of the certification has failed, and the GW URL is being notified of the failure of this event. |

|  | 17 | The certification update request has been received from the GW URL, the GW URL was notified of the results of the update after it was completed, but an certification error has been received, and the rescue certification is being recorded. |  |
| :---: | :---: | :---: | :---: |
|  | 18 | The rescue certification of No. 17 has been recorded, and the GW URL is being notified of the failure of the certification update. |  |
| CERT:Error |  |  |  |
| 068 | Displays a number code that describes the reason for the request for update of the certification. |  |  |
|  | 0 | Normal. There is no request for cerrification update in progress. |  |
|  | 1 | Request for certif | ion update in progress. The current certification has expired. |
|  | 2 | An SSL error notif | tion has been issued. Issued after the cerrification has expired. |
|  | 3 | Notification of s | rom a common authentication to an individual cerrification. |
|  | 4 | Notification of a | mon certification without ID2. |
|  | 5 | Notification that | certification was issued. |
|  | 6 | Notification that | URL does not exist. |
| 069 | CERT:Up ID |  | The ID of the request for certification. |
| 083 | FirmUp Status |  | Displays the status of the firmware update. |
| 085 | Firm Up User Check |  | This SP setting determines if the operator can confirm the previous version of the firmware before the firmware update execution. If the option to confirm the previous version is selected, a notification is sent to the system manager and the firmware update is done with the firmware files from the URL. |
| 086 | Firmware Size |  | Allows the service technician to confirm the size of the firmware data files during the firmware update execution. |
| 087 | CERT: Macro Version |  | Displays the macro version of the @Remote certification. |
| 088 | CERT: PAC Version |  | Displays the PAC version of the @Remote cerrification. |
| 089 | CERT: ID2 Code |  | Displays ID2 for the @Remote certification. Spaces are displayed as underscores (_). Asteriskes (****) indicate that no @Remote certification exists. |

| 090 | CERT: Subject | Displays the common name of the @Remote cerrification subject. $\mathrm{CN}=$ the following 17 bytes. Spaces are displayed as underscores (_). Asterisks (****) indicate that no DESS exists. |
| :---: | :---: | :---: |
| 091 | CERT: Serial Number | Displays serial number for the NRS certification. Asterisks (****) indicate that no DESS exists. |
| 092 | CERT: Issuer | Displays the common name of the issuer of the @Remote certification. CN = the following 30 bytes. Asteriskes (****) indicate that no DESS exists. |
| 093 | CERT: Valid Start | Displays the start time of the period for which the current @Remote certification is enabled. |
| 094 | CERT: Valid End | Displays the end time of the period for which the current @Remote certification is enabled. |
|  | Selection Country |  |
| 150 | Select the country where embedded RCG-M is installed in the machine. After selecting the country, you must also set the following SP codes for embedded RCG-M: <br> - SP5816-153 <br> - SP5816-154 <br> - SP5816-161 <br> 0: Japan, 1: USA, 2: Canada, 3: UK, 4: Germany, 5: France, 6: Italy, <br> 7: Netherlands, 8: Belgium, 9: Luxembourg, 10: Spain |  |
|  | Line Type AutomaticJudgment |  |
| 151 | Press [Execute]. <br> Setting this SP classifies the telephone line where embedded RCG-M is connected as either dial-up (pulse dial) or push (DTMF tone) type, so embedded RCG-M can automatically distinguish the number that connects to the outside line. <br> - The current progress, success, or failure of this execution can be displayed with SP5816-152. <br> - If the execution succeeded, SP5816-153 will display the result for confirmation and SP5816-154 will display the telephone number for the connection to the outside line. |  |

|  | Line Type Judgment Result |
| :--- | :--- |
|  | Displays a number to show the result of the execution of SP5816 151. Here is a list of what <br> the numbers mean. <br> 0: Success <br> 152 <br> 1: In progress (no result yet). Please wait. <br> 2: Line abnormal <br> 3: Cannot detect dial tone automatically <br> 4: Line is disconnected <br> 5: Insufficient electrical power supply <br> 6: Line classification not supported <br> 7: Error because fax transmission in progress - ioctl() occurred. <br> 8: Other error occurred <br> 9: Line classification still in progress. Please wait. |
|  | Selection Dial/Push <br> 153This SP displays the classification (tone or pulse) of the telephone line to the access point <br> for embedded RCG-M. The number displayed (0 or 1) is the result of the execution of <br> SP5816-15 1. However, this setting can also be changed manually. <br> [0 or 1 / 0 / 1 / step] <br> 0: Tone Dialing Phone <br> 1: Pulse Dialing Phone <br> Inside Japan "2" may also be displayed: <br> 0: Tone Dialing Phone <br> 1: Pulse Dialing Phone 10PPS <br> 2: Pulse Dialing Phone 20PPS |

| 154 | Outside LineOutgoing Number |
| :---: | :---: |
|  | The SP sets the number that switches to PSTN for the outside connection for embedded RCG-M in a system that employs a PBX (internal line). <br> - If the execution of SP5816-151 has succeeded and embedded RCG-M has connected to the external line, this SP display is completely blank. <br> - If embedded RCG-M has connected to an internal line, then the number of the connection to the external line is displayed. <br> - If embedded RCG-M has connected to an external line, a comma is displayed with the number. The comma is inserted for a 2 sec. pause. <br> - The number setting for the external line can be entered manually (including commas). |
| 156 | Dial Up User Name |
|  | Use this SP to set a user name for access to remote dial up. Follow these rules when setting a user name: <br> - Name length: Up to 32 characters <br> - Spaces and \# allowed but the entire entry must be enclosed by double quotation marks ("). |
| 157 | Dial Up Password |
|  | Use this SP to set a password for access to remote dial up. Follow these rules when setting a user name: <br> - Name length: Up to 32 characters <br> - Spaces and \# allowed but the entire entry must be enclosed by double quotation marks ("). |
| 161 | Local Phone Number |
|  | Use this SP to set the telephone number of the line where embedded RCG-M is connected. This number is transmitted to and used by the Call Center to return calls. <br> Limit: 24 numbers (numbers only) |
| 162 | Connection Timing Adjustment: Incoming |
|  | When the Call Center calls out to an embedded RCG-M modem, it sends a repeating ID tone (*\#1 \#). This SP sets the time the line remains open to send these ID tones after the number of the embedded RCG-M modem is dialed up and connected. <br> [ 0 to $24 / 1 / 1 /$ step] <br> The actual amount of time is this setting $\times 2 \mathrm{sec}$. For example, if you set " 2 " the line will remain open for 4 sec . |

|  | Access Point |  |  |
| :---: | :---: | :---: | :---: |
| 163 | This is the number of the dial-up access point for RCG-M. If no setting is done for this SP code, then a preset value (determined by the country selected) is used. <br> Default: 0 <br> Allowed: Up to 16 alphanumeric characters |  |  |
| 164 | Line Connecting |  |  |
|  | This SP sets the connection conditions for the customer. This setting dedicates the line to RCG-M only, or sets the line for sharing between RCG-M and a fax unit. <br> [0 to $1 / 0 / 1 /$ step] <br> 0 : Sharing Fax <br> 1: No Sharing Fax <br> Note <br> - If this setting is changed, the copier must be cycled off and on. <br> - SP5816 187 determines whether the off-hook button can be used to interrupt a RCG$M$ transmission in progress to open the line for fax transaction. |  |  |
| 173 | Modem Serial Number |  | plays the serial number registered for the RCG-M. |
|  | Retransmission Limit |  |  |
| 174 | Normally, it is best to allow unlimited time for certification and ID2 update requests, and for the notification that the certification has been completed. However, RCG-M generates charges based on transmission time for the customer, so a limit is placed upon the time allowed for these transactions. <br> If these transactions cannot be completed within the allowed time, do this SP to cancel the time restriction. |  |  |
|  | FAX TX Priority |  |  |
| 187 | This SP determines whether pushing the off-hook button will interrupt a RCG-M transmission in progress to open the line for fax transaction. This SP can be used only if SP5816 164 is set to "0". <br> [0 or 1/0/-] <br> 0 : Disable, 1: Enable |  |  |
| 200 | Manual Polling |  | Executes the manual polling. |

| 201 | Regist: Status |  |
| :---: | :---: | :---: |
|  | Displays a number that indicates the status of the @Remote service device. <br> 0 : Neither the registered device by the external nor embedded RCG device is set. <br> 1:The embedded RCG device is being set. Only Box registration is completed. In this status, this unit cannot answer a polling request from the external RCG. <br> 2. The embedded RCG device is set. In this status, the external RCG unit cannot answer a polling request. <br> 3. The registered device by the external RCG is being set. In this status the embedded RCG device cannot be set. <br> 4 The registered module by the external RCG has not started. |  |
| 202 | Letter Number | Allows entry of the number of the request needed for the RCGN device. |
| 203 | Confirm Execute | Executes the inquiry request to the @Remote GW URL. |
| 204 | Confirm Result |  |
|  | Displays a number that indicates the result of the inquiry executed with SP5816 203. <br> 0: Succeeded <br> 1: Inquiry number error <br> 2: Registration in progress <br> 3: Proxy error (proxy enabled) <br> 4: Proxy error (proxy disabled) <br> 5: Proxy error (Illegal user name or password) <br> 6: Communication error <br> 7: Certification update error <br> 8: Other error <br> 9: Inquiry executing |  |
|  | Confirm Place |  |
| 205 | Displays the result of the notification sent to the device from the GW URL in answer to the inquiry request. Displayed only when the result is registered at the GW URL. |  |
| 206 | Register Execute | Executes "Embedded RCG Registration". |

| 207 | Register Result |  |  |
| :---: | :---: | :---: | :---: |
|  | Displays a number that indicates the registration result. <br> 0: Succeeded <br> 2: Registration in progress <br> 3: Proxy error (proxy enabled) <br> 4: Proxy error (proxy disabled) <br> 5: Proxy error (Illegal user name or password) <br> 6: Communication error <br> 7: Certification update error <br> 8: Other error <br> 9: Registration executing |  |  |

|  |  | -12003 | Attempted registration without execution of an inquiry and no previous registration. |
|  |  | -12004 | Attempted setting with illegal entries for certification and ID2. |
|  |  | -12005 | @Remote communication is prohibited. The device has an Embedded RC gate-related problem. |

|  | Operation Error, Incorrect Setting | -12006 | A confirmation request was made after the confirmation had been already completed. |
| :---: | :---: | :---: | :---: |
|  |  | -12007 | The request number used at registration was different from the one used at confirmation. |

## Main SP Tables-8

## SP8-xxx: Data Log2

Many of these counters are provided for features that are currently not available, such as sending color faxes, and so on. However, here are some Group 8 codes that when used in combination with others, can provide useful information.

| SP Numbers | What They Do |
| :--- | :--- |
| SP8211 to SP8216 | The number of pages scanned to the document server. |
| SP8401 to SP8406 | The number of pages printed from the document server |
| SP8691 to SP8696 | The number of pages sent from the document server |

Specifically, the following questions can be answered:

- How is the document server actually being used?
- What application is using the document server most frequently?
- What data in the document server is being reused?

Most of the SPs in this group are prefixed with a letter that indicates the mode of operation (the mode of operation is referred to as an "application"). Before reading the Group 8 Service Table, make sure that you understand what these prefixes mean.

| Prefixes | What it means |  |
| :--- | :--- | :--- |
| T: | Total: (Grand Total). | Grand total of the items counted for all applications (C, F, P, <br> etc.). |
| C: | Copy application. |  |
| F: | Fax application. | Totals (pages, iobs, etc.) executed for each application when <br> the job was not stored on the document server. |
| P: | Print application. |  |

|  |  | Totals (jobs, pages, etc.) for the document server. The L: <br> counters work differently case by case. Sometimes, they <br> count jobs/pages stored on the document server; this can be <br> in document server mode (from the document server <br> window), or from another mode, such as from a printer driver <br> or by pressing the Store File button in the Copy mode <br> window. Sometimes, they include occasions when the user <br> uses a file that is already on the document server. Each <br> counter will be discussed case by case. |
| :--- | :--- | :--- |
| O: Local storage (document |  |  |
| server) | Other applications <br> (external network <br> applications, for <br> example) | Refers to network applications such as Web Image Monitor. <br> Utilities developed with the SDK (Software Development Kit) <br> will also be counted with this group in the future. |

The Group 8 SP codes are limited to 17 characters, forced by the necessity of displaying them on the small LCDs of printers and faxes that also use these SPs. Read over the list of abbreviations below and refer to it again if you see the name of an SP that you do not understand.

## Key for Abbreviations

| Abbreviation | What it means |
| :--- | :--- |
| $/$ | "By", e.g. "T:Jobs/Apl" = Total Jobs "by" Application |
| $>$ | More (2> "2 or more", 4> "4 or more" |
| AddBook | Address Book |
| Apl | Application |
| B/W | Black \& White |
| Bk | Black |
| C | Cyan |
| ColCr | Color Create |
| ColMode | Combine |
| Comb | Compression |
| Comp | Delivery |
| Deliv |  |

| Abbreviation | What it means |
| :---: | :---: |
| DesApl | Designated Application. The application (Copy, Fax, Scan, Print) used to store the job on the document server, for example. |
| Dev Counter | Development Count, no. of pages developed. |
| Dup, Duplex | Duplex, printing on both sides |
| Emul | Emulation |
| FC | Full Color |
| FIN | Post-print processing, i.e. finishing (punching, stapling, etc.) |
| Full Bleed | No Margins |
| GenCopy | Generation Copy Mode |
| GPC | Get Print Counter. For jobs 10 pages or less, this counter does not count up. For jobs larger than 10 pages, this counter counts up by the number that is in excess of 10 (e.g., for an 11 -page job, the counter counts up $11-10=1$ ) |
| IFax | Internet Fax |
| ImgEdt | Image Edit performed on the original with the copier GUI, e.g. border removal, adding stamps, page numbers, etc. |
| K | Black (YMCK) |
| LS | Local Storage. Refers to the document server. |
| LSize | Large (paper) Size |
| Mag | Magnification |
| MC | One color (monochrome) |
| NRS | New Remote Service, which allows a service center to monitor machines remotely. "NRS" is used overseas, "CSS" is used in Japan. |
| Org | Original for scanning |
| OrgJam | Original Jam |
| Palm 2 | Print Job Manager/Desk Top Editor: A pair of utilities that allows print jobs to be distributed evenly among the printers on the network, and allows files to moved around, combined, and converted to different formats. |

| Abbreviation | What it means |
| :--- | :--- |
| PC | Personal Computer |
| PGS | Pages. A page is the total scanned surface of the original. Duplex pages <br> count as two pages, and A3 simplex count as two pages if the A3/DLT <br> counter SP is switched ON. |
| PJob | Print Jobs |
| Ppr | Paper |
| PrtJam | Printer (plotter) Jam |
| PrtPGS | Print Pages |
| Red (Toner Remaining). Applies to the wide format model A2 only. This |  |
| machine is under development and currently not available. |  |
| Rez | Resolution |
| SC | Service Code (Error SC code displayed) |
| Scn | Scan |
| Sim, Simplex | Simplex, printing on 1 side. |
| S-to-Email | Scan-to-E-mail |
| SMC | SMC report printed with SP5990. All of the Group 8 counters are recorded <br> in the SMC report. |
| Svr | Server |
| TonEnd | Toner End |
| TonSave | Yend, Transmission |
| TXJob | Yellow, Mage Magenta, Cyan |
| YMC | YMCK |

- These SPs reveal the number of times an application is used, not the number of pages processed.
- When an application is opened for image input or output, this counts as one job.
- Interrupted jobs (paper jams, etc.) are counted, even though they do not finish.
- Only jobs executed by the customer are counted. Jobs executed by the customer engineer using the SP modes are not counted.
- When using secure printing (when a password is required to start the print job), the job is counted at the time when either "Delete Data" or "Specify Output" is specified.
- A job is counted as a fax job when the job is stored for sending.
- When a fax is received to fax memory, the F: counter increments but the L: counter does not (the document server is not used).
- A fax broadcast counts as one job for the F: counter (the fax destinations in the broadcast are not counted separately).
- A fax broadcast is counted only after all the faxes have been sent to their destinations. If one transmission generates an error, then the broadcast will not be counted until the transmission has been completed.
- A printed fax report counts as one job for the F: counter.
- The F: counter does not distinguish between fax sending or receiving.
- When a copy iob on the document server is printed, SP8022 also increments, and when a print job stored on the document server is printed, SP8024 also increments.
- When an original is both copied and stored on the document server, the C : and L : counters both increment.
- When a print job is stored on the document server, only the $L$ : counter increments.
- When the user presses the Document Server button to store the job on the document server, only the L: counter increments.
- When the user enters document server mode and prints data stored on the document server, only the L: counter increments.
- When an image received from Palm 2 is received and stored, the $L$ : counter increments.
- When the customer prints a report (user code list, for example), the O: counter increments. However, for fax reports and reports executed from the fax application, the F: counter increments.

- When an application like DeskTopBinder merges a copy job that was stored on the document server with a print job that was stored on the document server, the C : and P : counters both increment.
- When a job already on the document server is printed with another application, the L: counter increments.
- When a scanner job stored on the document server is printed with another application, the S : counter increments. If the original was scanned from within document server mode, then the $L$ : counter increments.
- When images stored on the document server by a network application (including Palm 2), are printed with another application, the O: counter increments.

| $807 \times 7$ | 11 to 20 Pages | $807 \times 14$ | 1001 to Pages |

- For example: When a copy job stored on the document server is printed in document server mode, the appropriate L: counter (SP8076 0xx) increments.
- Printing a fax report counts as a job and increments the F: counter (SP 8073).
- Interrupted jobs (paper jam, etc.) are counted, even though they do not finish.
- If a job is paused and re-started, it counts as one job.
- If the finisher runs out of staples during a print and staple job, then the job is counted at the time the error occurs.
- For copy jobs (SP 8072) and scan jobs (SP 8075), the total is calculated by multiplying the number of sets of copies by the number of pages scanned. (One duplex page counts as 2 .)
- The first test print and subsequent test prints to adjust settings are added to the number of pages of the copy job (SP 8072).
- When printing the first page of a job from within the document server screen, the page is counted.

| 8111 | T:FAX TX Jobs | *CTL | [0 to 9999999/ 0 / 1] |
| :---: | :---: | :---: | :---: |
|  | These SPs count the total number of jobs (color or black-and-white) sent by fax, either directly or using a file stored on the document server, on a telephone line. <br> Note: Color fax sending is not available at this time. |  |  |
|  | F: FAX TX Jobs | *CTL | [0 to 9999999/0 / 1] |

| $811 \times 1$ | B/W |  |  |
| $811 \times 2$ | Color |  |  |

- These counters count jobs, not pages.
- This SP counts fax jobs sent over a telephone line with a fax application, including documents stored on the document server.
- If the mode is changed during the job, the job will count with the mode set when the job started.
- If the same document is faxed to both a public fax line and an I-Fax at a destination where both are available, then this counter increments, and the I-Fax counter (8 12x) also increments.
- The fax job is counted when the job is scanned for sending, not when the job is sent.

| $813 \times 1$ | B/W |  |  |
| $813 \times 2$ | Color |  |  |
| $813 \times 3$ | ACS |  |  |

- These counters count jobs, not pages.
- If the job is stored on the document server, after the job is stored it is determined to be color or black-and-white then counted.
- If the job is cancelled during scanning, or if the job is cancelled while the document is waiting to be sent, the job is not counted.
- If the job is cancelled during sending, it may or may not be counted, depending on what stage of the process had been reached when the job was cancelled.
- If several jobs are combined for sending to the Scan Router, Scan-to-Email, or Scan-to-PC, or if one job is sent to more than one destination. each send is counted separately. For example, if the same document is sent by Scan-to-Email as well as Scan-to-PC, then it is counted twice (once for Scan-toEmail and once for Scan-to-PC).

ACS

- These counters count jobs, not pages.
- The jobs are counted even though the arrival and reception of the jobs at the Scan Router server cannot be confirmed.
- If even one color image is mixed with black-and-white images, then the job is counted as a "Color" job.
- If the job is cancelled during scanning, or if the job is cancelled while the document is waiting to be delivered, the job is not counted.
- If the job is cancelled during sending, it may or may not be counted, depending on what stage of the process had been reached when the job was cancelled.
- Even if several files are combined for sending, the transmission counts as one job.

- SP 8191 to 8196 count the number of scanned sides of pages, not the number of physical pages.
- These counters do not count reading user stamp data, or reading color charts to adjust color.
- Previews done with a scanner driver are not counted.
- A count is done only after all images of a job have been scanned.
- Scans made in SP mode are not counted.

## Examples

- If 3 B5 pages and 1 A3 page are scanned with the scanner application but not stored, the S : count is 4 .
- If both sides of 3 A4 sheets are copied and stored to the document server using the Store File button in the Copy mode window, the C : count is 6 and the L : count is 6 .
- If both sides of 3 A 4 sheets are copied but not stored, the C : count is 6 .
- If you enter document server mode then scan 6 pages, the $L$ : count is 6 .

- Reading user stamp data is not counted.
- If a job is cancelled, the pages output as far as the cancellation are counted.
- If the scanner application scans and stores 3 B 5 sheets and 1 A 4 sheet, the S : count is 4 .
- If pages are copied but not stored on the document server, these counters do not change.
- If both sides of 3 A4 sheets are copied and stored to the document server, the C : count is 6 and the L : count is 6 .

| 8221 | ADF | eeds | *CTL | [0 to 9999999/0 / 1] |
| :---: | :---: | :---: | :---: | :---: |
|  | These SPs count the number of pages fed through the ADF for front and back side scanning. |  |  |  |
| 82211 | Front | Number of front sides fed for scanning: <br> With an ADF that can scan both sides simultaneously, the Front side count is the same as the number of pages fed for either simplex or duplex scanning. <br> With an ADF that cannot scan both sides simultaneously, the Front side count is the same as the number of pages fed for duplex front side scanning. (The front side is determined by which side the user loads face up.) |  |  |
| 82212 | Back | Number of rear sides fed for scanning: <br> With an ADF that can scan both sides simultaneously, the Back count is the same as the number of pages fed for duplex scanning. <br> With an ADF that cannot scan both sides simultaneously, the Back count is the same as the number of pages fed for duplex rear-side scanning. |  |  |

- When 1 sheet is fed for duplex scanning the Front count is 1 and the Back count is 1 .
- If a jam occurs during the job, recovery processing is not counted to avoid double counting. Also, the pages are not counted if the jam occurs before the first sheet is output.

| 8231 | Scan PGS/Mode | *CTL | [0 to 9999999/0 / 1] |

| 82315 | Platen | Book mode. Raising the ADF and placing the original <br> directly on the platen. |  |
| 82316 | Mixed 1 side/ 2side | Simplex and Duplex mode. |  |

- If the scan mode is changed during the job, for example, if the user switches from ADF to Platen mode, the count is done for the last selected mode.
- The user cannot select mixed sizes or non-standard sizes with the fax application so if the original's page sizes are mixed or non-standard, these are not counted.
- If the user selects "Mixed Sizes" for copying in the platen mode, the Mixed Size count is enabled.
- In the SADF mode if the user copies 1 page in platen mode and then copies 2 pages with SADF, the Platen count is 1 and the SADF count is 3 .

- These counters are used primarily to calculate charges on use of the machine, so the following pages are not counted as printed pages:
- Blank pages in a duplex printing job.
- Blank pages inserted as document covers, chapter title sheets, and slip sheets.
- Reports printed to confirm counts.
- All reports done in the service mode (service summaries, engine maintenance reports, etc.)
- Test prints for machine image adjustment.

- The count for $B / W$ and Color pages is done after the document is stored on the HDD. If the job is cancelled before it is stored, the pages are not counted.
- If Scan-to-Email is used to send a 10 -page document to 5 addresses, the count is 10 (the pages are sent to the same SMTP server together).
- If Scan-to-PC is used to send a 10 -page document to 5 folders, the count is 50 (the document is sent to each destination of the SMB/FTP server).
- Due to restrictions on some devices, if Scan-to-Email is used to send a 10 -page document to a large number of destinations, the count may be divided and counted separately. For example, if a 10-page document is sent to 200 addresses, the count is 10 for the first 100 destinations and the count is also 10 for the second 100 destinations, for a total of 20.).

- This counts pages sent from a PC using a PC fax application, from the PC through the copier to the destination.
- When sending the same message to more than one place using broadcasting, the pages are only counted once. (For example, a 10-page fax is sent to location A and location B. The counter goes up by 10, not 20.)

| 8691 | T:TX PGS/LS | ${ }^{*}$ CTL | These SPs count the number of pages sent from the <br> document server. The counter for the application that was <br> used to store the pages is incremented. <br> [0 to 9999999/0 / 1] <br> 8692 |

| C:TX PGS/LS | ${ }^{*}$ CTL |  |  |

## Note

- Print jobs done with Web Image Monitor and Desk Top Binder are added to the count.
- If several documents are merged for sending, the number of pages stored are counted for the application that stored them.
- When several documents are sent by a Fax broadcast, the F: count is done for the number of pages sent to each destination.

## Firmware Update

To update the firmware for this machine, you must have the new version of the firmware downloaded onto an SD (Secure Digital) Card. The SD Card is inserted into SD Card Slot 2 on the left rear side of the controller box.

## Type of Firmware

There are several types of firmware as shown below.

| Type of firmware | Function | Location of firmware | Message shown |
| :--- | :--- | :--- | :--- |
| Engine | Printer engine control | BICU Flash ROM | Engine |

## Before You Begin

An SD card is a precision device. Always observe the following precautions when you handle SD cards:

- Always switch the machine off before you insert an SD card. Never insert the SD card into the slot with the power on.
- Do not remove the SD card from the service slot after the power has been switched on.
- Never switch the machine off while the firmware is downloading from the SD card.
- Keep SD cards in a safe location where they are not exposed to high temperature, high humidity, or exposure to direct sunlight.
- Always handle SD cards with care. Do not bend or scratch them. Do not let the SD card get exposed to shock or vibration.
- Make sure that the write protection of an SD card is unlocked when you download an application to it. If not, downloading fails and a download error (e.g. Error Code 44) occurs during a firmware upgrade.

Keep the following points in mind when you use the firmware update software:

- "Upload" means to send data from the machine to the SD card. "Download" means to send data from the SD card to the machine.
- To select an item on the LCD, touch the appropriate button on the soff touch-screen of the LCD, or, press the appropriate number key on the 10 -key pad of the operation panel. For example, when "Exit (0)" shows on the screen you can touch the Exit button on the screen, or, press the "0" button on the operation panel of the copier.
- Make sure that the machine is disconnected from the network to prevent a print job for arriving while the firmware update is in progress before you start the firmware update procedure.

## Updating Firmware

## Preparation

- If the SD card is blank, copy the entire "romdata" folder onto the SD card.
- If the card already contains the "romdata" folder, copy the "D086" folder onto the card.

If the card already contains folders up to "D086", copy the necessary firmware files (e.g. D086xxxx.fwu) into this folder.

## 4) Note

- Do not put multiple machine firmware programs on the same SD card. Copy the only model firmware you want.

## Updating Procedure

1. Turn the main power switch off.
2. Remove the slot cover $(\hat{8} \times 1)$.
3. Insert the SD card into SD Card Slot 2. Make sure the label on the SD card faces the front side of the machine.
4. Slowly push the SD card into the slot so it locks in place. You will hear it click. Make sure the SD card locks in place.

## ( Note

- To remove the SD, push it in to unlock the spring lock. Then release it so it pops out of the slot.

5. Disconnect the network cable from the copier if the machine is connected to a network.
6. Switch the main power switch on. After about 45 seconds, the initial version update screen appears on the LCD in English.
7. On the screen, touch the button or press the corresponding number key on the operation panel to select the item in the menu that you want to update.

| ROM/NEW | What it means |
| :--- | :--- |
| ROM: | Tells you the number of the module and name of the version currently installed. <br> The first line is the module number, the second line the version name. |
| NEW: | Tells you the number of the module and name version on the SD card. The first <br> line is the module number, the second line the version name. |

## 4 Note

- Controller, engine and operation panel firmware cannot be updated at the same time. It is recommended to update firmware modules one by one.

8. Touch "UpDate (\#)" (or $\oplus$ ) to start the update.

## Note

- The progress bar does not show for the operation panel firmware after you touch "OpPanel". The power on key flashes on and off at 0.5 s intervals when the LCDC firmware is updating. The power key flashes on and off at 3 s intervals when the update is finished.

9. The "Update is Done" message appears on the operation panel after completing the updating. The message differs depending on the firmware that has been updated.
10. Switch the copier main power switch off when you see the "Update is Done" message or follow the procedure that is displayed on the operation panel.
11. Press in the SD card to release it. Then remove it from the slot.
12. Switch the copier on for normal operation.

## Error Messages

An error message shows in the first line if an error occurs during the download.
The error code consists of the letter "E" and a number. The example above shows error "E24" displayed. For details, refer to the Error Message Table. (") "Handling Firmware Update Error")

## Firmware Update Error

If a firmware update error occurs, this means the update was cancelled during the update because the module selected for update was not on the SD card.

## Recovery after Power Loss

If the ROM update is interrupted as a result of accidental loss of power while the firmware is updating, then the correct operation of the machine cannot be guaranteed after the machine is switched on again. If the ROM update does not complete successfully for any reason, then in order to ensure the correct operation of the machine, the ROM update error will continue to show until the ROM is updated successfully.

In this case, insert the card again and switch on the machine to continue the firmware download automatically from the card without the menu display.

## Updating the LCDC for the Operation Panel

Do the following procedure to update the LCDC (LCD Control Board).

1. Turn the copier main switch off.
2. Remove the SD slot cover $(\hat{\theta} \times 1)$.
3. Insert the SD card into SD Card Slot 2.
4. Switch the copier main switch on.
5. The initial screen opens in English after about 45 seconds.
6. Touch "Ope Panel.xx".
7. "xx" differs depending on the destination.
8. Touch "UpDate(\#) or ( $\left(\begin{array}{l}\text { ( ) to start the update. }\end{array}\right.$
9. Downloading starts after about 9 seconds.
10. The operation panel goes off and the main power on key flashes in red at 0.5 s intervals when the data is downloading. The same key starts flashing in green at 1 sintervals when the update is finished.
11. Switch the copier main power switch off and remove the SD card. Then switch the copier on.

## Update Procedure for App2Me Provider

Follow this procedure to update App 2 Me if a new version is available.

1. Push the [User/Tools] key on the operation panel.
2. If an administrator setting is registered for the machine, Step 3 and Step 4 are required. Otherwise, skip to step 5 .
3. Push [Login/Logout] on the operation panel.
4. Login with the administrator user name and password.
5. Touch "Extended Feature Settings" twice on the LCD.
6. Touch each of the applications until the status changes to "Stop".
7. Turn the machine off, and then remove the VM Card.

- ${ }^{8}$ My Computer
$\pm \leqslant$ Preload (C)
- B $^{\text {S }}$ SD_Card (D)

337051920
$\oplus$ work
ralat
8. Prepare the newer App2Me Provider zip file from the Firmware Download Center, and then unzip the zip file. (The folder name is "337051920".)
9. Copy the App2Me Provider folder into the specified path for the VM card. The path is:
"SD_Card Drive\sdk\dsdk\dist \337051920"
10. Turn the SD card label face to the front of the machine, and then push it slowly into Slot 2 (lower slot) until you hear a click.
11. Turn the main power switch on.
12. Press [User Tools] on the operation panel.
13. Touch the "Extended Feature Settings" button twice.
14. Touch the "Extended Feature Info" tab on the LCD.
15. Touch the "App2Me" line.
16. Set the setting of the "Auto Start" to "On".
17. Touch the "Exit" button.
18. Exit the [User Tools/Counter] settings.

## * Important

- App2Me and all other running applications on the VM card must be shut down before removing the VM card in order to update the firmware, back up NVRAM, install the browser unit, or execute application move or undo with SP5873.
- After the VM card is re-inserted, App2Me (and any other VM card applications used by the customer) must be switched on after the machine is switched on.

## Browser Unit Update Procedure

1. Remove the $V M$ card $[B]$ from slot 2 .
2. Turn the SD-card label face of the browser unit to the front of the machine. Then push it slowly into slot 2 [C] until you hear a click.
3. Plug in and turn on the main power switch.
4. Push the "User Tools" key.

- If an administrator setting is registered for the machine, step 5 and 6 are required. Otherwise, skip to the step 7

5. Push the "Login/ Logout" key.
6. Login with the administrator user name and password.
7. Touch "Extended Feature Settings" twice on the LCD.
8. Touch "Uninstall" on the LCD.
9. Touch the "Browser" line
10. Confirmation message appears on the LCD.
11. Touch "Yes" to proceed.
12. Reconfirmation message appears on the LCD.
13. Touch "Yes" to uninstall the browser unit.
14. You will see "Uninstalling the extended feature... Please wait.", and then "Completed".
15. Touch "Exit" to go back to the setting screen.
16. Exit "User/Tools" setting, and then turn off the main power switch.
17. Remove the SD card of the browser unit from SD card slot 2 .
18. Overwrite the updated program in the "sdk" folder of the browser unit application with PC.
19. Do the "Installation Procedure" to install the browser unit.

## Handling Firmware Update Errors

An error message shows in the first line if an error occurs during a download. The error code consists of the letter "E" and a number ("E2O", for example).

## Error Message Table

| Code | Meaning | Solution |
| :---: | :--- | :--- |

## Installing Another Language

Many languages are available. But you can only switch between two languages at a time. Do the following procedure to select the two languages you want. You can select both of the languages you want from the user interface on the operation panel.

1. Switch the copier main power switch off.
2. Remove the SD slot cover $(\hat{\theta} \times 1)$.
3. Insert the SD card with the language data into SD Card Slot 2.
4. Switch the copier main power switch on. The initial screen opens after about 45 seconds.
5. Touch "Language Data (2)" on the screen (or press the " 2 " key).

6. Touch "LANG. 1(1)" or "LANG. 2(2)"

| Key | What it does |
| :--- | :--- |
| LANG. 1(1) | Touch this button on the screen (or press the "1" key on the 10-key pad) to <br> open the next screen so you can select the 1st language. |
| LANG. 1(2) | Touch this button on the screen (or press the "2" key on the 10-key pad) to <br> open the next screen so you can select the 2nd language. |
| Exit (0) | Touch this key on the screen (or press the "0" key on the 10-key pad) to <br> quit the update procedure and return to normal screen. |

7. Touch "LANG $1(1)$ " to select the 1 st Language. Touch "LANG (2)" to select the 2 nd Language.

8. Touch the appropriate button on the screen (or press the number on the 10 -keypad) to select a language as the 1 st (or 2nd) language.

- If a language is already selected, it will show in reverse.
- Touching "Exit ( 0 )" returns you to the previous screen.

9. If you do not see the language that you want to select, touch " $\uparrow(7)$ " or $" \downarrow(9)$ " on the screen (or press the "7" or "9" key) to show more choices.

The Download Screen opens after you select a language.
The 1 st or 2 nd language selected for updating shows.
The following show to right of the selection:

- 1. The first column shows the language currently selected.
- 2. The 2nd column shows the language selected to replace that language.

The example below shows that the download will replace "Japanese" with "Italian" as the 1 st language.

10. Touch "Update(\#)" on the screen (or press (\#) to start the download.

Another screen with a progress bar does not show when the language is downloading.
The following occur at the time the language is downloading:

- The operation panel switches off.
- The LED on the power on key flashes rapidly.

11. After the message of installation completed has shown on the LCD, switch the copier main power switch off. Then remove the SD card from the slot.
12. Switch the copier main power switch on to resume normal operation.

## Reboot/System Setting Reset

## Software Reset

You can reboot the software with one of the following two procedures:

1. Turn the main power switch off and on.
2. Press and hold down $\odot$ and $\oplus$ together for over 10 seconds. When the machine beeps once, release both buttons. After "Now loading. Please wait" shows for a few seconds, the copy window will open. The machine is ready for normal operation.

## System Settings and Copy Setting Reset

## System Setting Reset

The system settings in the UP mode can be reset to their defaults. Use the following procedure.

2. Hold down ${ }^{(+1)}$ and then press System Settings.

- You must press ${ }^{(+1)}$ first.

3. Press yes when the message prompts you to confirm that you want to reset the system settings.
4. Press exit when the message tells you that the settings have been reset.

## Copier Setting Reset

Use the following procedure to reset the copy settings in the UP mode to their defaults.

1. Press User Tools/Counter
2. Hold down $\oplus$ and then press Copier/Document Server Settings.

## Note

- You must press ${ }^{(+1}$ first.

3. Press "Yes" when the message prompts you to confirm that you want to reset the Copier Document Server settings.
4. Press exit when the message tells you that the settings have been reset.

## Downloading Stamp Data

The stamp data should be downloaded from the controller firmware to the hard disks at the following times:

- After the hard disks have been replaced.

The print data contains the controller software. Execute SP 5853 to download the fixed stamp data required by the hard disks.

1. Enter the SP mode.
2. Select SP5853 and then press "EXECUTE". The following screen opens while the stamp data is downloading.

The download is finished when the message prompts you to close.

3. Press the "Exit" button. Then turn the copier off and on again.

## NVRAM Data Upload/Download

## Uploading Content of NVRAM to an SD card

Do the following procedure to upload SP code settings from NVRAM to an SD card.

## $\downarrow$ Note

- This data should always be uploaded to an SD card before the NVRAM is replaced.
- Make sure that the write protection of an SD card is unlocked

1. Do SP5990-00 1 (SMC Print) before you switch the machine off. You will need a record of the NVRAM settings if the upload fails.
2. Switch the copier main power switch off.
3. Remove the SD slot cover $(\hat{\theta} \times 1)$.
4. Insert the SD card into SD card slot 2. Then switch the copier on.
5. Execute SP5824-001 (NVRAM Data Upload) and then press the "Execute" key.
6. The following files are coped to an NVRAM folder on the SD card when the upload procedure is finished. The file is saved to the path and the following filename:

## NVRAM\<serial number>.NV

Here is an example with Serial Number "K5000017114":
NVRAM K $5000017114 . N V$
7. In order to prevent an error during the download, be sure to mark the SD card that holds the uploaded data with the number of the machine from which the data was uploaded.

## Note

- You can upload NVRAM data from more than one machine to the same SD card.

## Downloading an SD Card to NVRAM

Do the following procedure to download SP data from an SD card to the NVRAM in the machine.

- The NVRAM data down load may fail if the SD card with the NVRAM data is damaged, or if the connection between the controller and BICU is defective.
- Do the download procedure again if the download fails.
- Do the following procedure if the second attempt fails:

Enter the NVRAM data manually using the SMC print you created before uploading the NVRAM data.

1. Switch the copier main power switch off.
2. Remove the SD slot cover $\left(\hat{\theta^{\prime}} \times 1\right)$.
3. Insert the SD card with the NVRAM data into SD Card Slot 2.
4. Switch the copier main power switch on.
5. Do SP5825-001 (NVRAM Data Download) and press the "Execute" key.

## $\downarrow$ Note

- The serial number of the file on the SD card must match the serial number of the machine for the NVRAM data to download successfully. The download fails if the serial numbers do not match. This procedure does not download the following data to the NVRAM:
- Total Count
- C/O, P/O Count

## Address Book Upload/Download

## Information List

The following information is possible to be uploaded and downloaded.

| Information |  |
| :--- | :--- |
| - Registration No. | - Select Title |
| - User Code | - Folder |
| - E-mail | - Local Authentication |
| - Protection Code | - Folder Authentication |
| - Fax Destination | - Account ACL |
| - Fax Option | - New Document Initial ACL |
| - Group Name | - LDAP Authentication |
| - Key Display |  |

## Download

1. Prepare a formatted SD card.
2. Make sure that the write-protection on the SD card is off.
3. Turn off the main power switch of the main machine.
4. Remove the SD slot cover at the left rear side of the machine $\left(\hat{\theta^{\prime}} \times 1\right)$.
5. Install the SD card into the SD card slot 2 (for service use).
6. Turn on the main power switch.
7. Enter the SP mode.
8. Do SP5-846-05 1 (Backup All Addr Book).
9. Exit the SP mode, and then turn off the main power switch.
10. Remove the SD card form the SD card slot 2 .
11. Install the SD slot cover.

Note

- If the capacity of SD card is not enough to store the local user information, an error message is displayed.
- Carefully handle the SD card, which contains user information. Do not take it back to your location.

## Upload

1. Turn off the main power switch of the main machine.
2. Remove the SD slot cover at the left rear side of the machine ( $\times 1$ ).
3. Install the SD card, which has already been uploaded, into the SD card slot 2.
4. Turn on the main power switch.
5. Enter the SP mode.
6. Do SP5-846-052 (Restore All Addr Book).
7. Exit the SP mode, and then turn off the main power switch.
8. Remove the SD card form the SD card slot 2.
9. Install the SD slot cover.

## Note

- The counter in the user code information is initialized after uploading.
- The information of an administrator and supervisor cannot be downloaded nor uploaded.
- If there is no data of address book information in the SD card, an error message is displayed.

## Using the Debug Log

## Overview

This machine provides a Save Debug Log feature that allows the Customer Engineer to save and retrieve error information for analysis.

Every time an error occurs, debug information is recorded in volatile memory. But this information is lost when the machine is switched off and on.

To capture this debug information, the Save Debug Log feature provides two main features:

- Switching on the debug feature so error information is saved directly to the HDD for later retrieval.
- Copying the error information from the HDD to an SD card.

Do the following procedure below to set up the machine so the error information is saved automatically to the HDD when a user has problems with the machine. Then ask the user to reproduce the problem.

## Switching ON and Setting UP Save Debug Log

The debug information cannot be saved until the "Save Debug Log" function has been switched on and a target has been selected.

1. Enter the SP mode and switch the Save Debug Log feature on.

- Enter the SP mode.
- Touch "System SP".
- On the LCD panel, open SP5857.

2. Under "5857 Save Debug Log", touch " 1 On/Off".

3. On the control panel keypad, press " 1 ". Then press ${ }^{\oplus}$. This switches the Save Debug Log feature on.

## Note

- The default setting is " 0 " (OFF). This feature must be switched on in order for the debug information to be saved.

```
COPY : SP-5-857-002
    Save Debug Log
    Target (2:HDD 3:SD)
```

## 2

```
Initial 2
b178s002
```

4. Select the target destination where the debug information will be saved. Under " 5857 Save Debug Log", touch " 2 Target", enter " 2 " with the operation panel key to select the hard disk as the target destination. Then press $\oplus$.

## Note

- Select "3 SD Card" to save the debug information directly to the SD card if it is inserted in the service slot.

5. Now touch "5858" and specify the events that you want to record in the debug log. SP5858 (Debug Save When) provides the following items for selection.

| $\mathbf{1}$ | Engine SC Error | Saves data when an engine-related SC code is <br> generated. |
| :---: | :--- | :--- |
| $\mathbf{2}$ | Controller SC Error | Saves debug data when a controller-related SC Code <br> is generated. |
| $\mathbf{3}$ | Any SC Error | Saves data only for the SC code that you specify by <br> entering code number. |
| $\mathbf{4}$ | Jam | Saves data for jams. |

## Note

- More than one event can be selected.

## Example 1: To Select Items 1, 2, 4

Touch the appropriate items(s). Press "ON" for each selection. This example shows "Engine SC Error" selected.

## Example 2: To Specify an SC Code

Touch "3 Any SC Error", enter the 3-digit SC code number with the control panel number keys. Then press ${ }^{\oplus}{ }^{\oplus}$. This example shows an entry for SC670.

## Note

- For details about SC code numbers, please refer to the SC tables in Section 4. "Troubleshooting".

6. Select one or more memory modules for reading and recording debug information. Touch "5859".

Under "5859" press the necessary key item for the module that you want to record.
Enter the appropriate 4-digit number. Then press ${ }^{\oplus}$.

## Note

- Refer to the two tables below for the 4-digit numbers to enter for each key.

The example below shows "Key 1" with "2222" entered.

The following keys can be set with the corresponding numbers. (The initials in parentheses indicate the names of the modules.)

4-Digit Entries for Keys 1 to 10

| Key No. | Copy | Printer | Scanner | Web |
| :---: | :--- | :--- | :--- | :--- |
| 1 | 2222 (SCS) |  |  |  |
| 2 | 14000 (SRM) |  |  |  |
| 3 |  | 256 (IMH) |  |  |
| 4 |  | 1000 (ECS) |  |  |
| 5 |  | 1025 (MCS) |  |  |
| 6 | 4848 (COPY) | 4400 (GPS) | 5375 (Scan) | 5682 (NFA) |
| 7 | 2224 (BICU) | 4500 (PDL) | 5682 (NFA) | 6600 (WebDB) |
| 8 |  | 4600 (GPS-PM) | 3000 (UCS) | 3300 (PTS) |
| 9 |  | 2000 (NCS) | 2000 (NCS) | 6666 (WebSys) |
| 10 |  | 2224 (BICU) | 4126 (DCS) | 2000 (NCS) |

Note

- The default settings for Keys 1 to 10 are all zero (" 0 ").

## Key to Acronyms

| Acronym | Meaning | Acronym | Meaning |
| :--- | :--- | :--- | :--- |
| ECS | Engine Control Service | NFA | Net File Application |
| GPS | GW Print Service | PDL | Printer Design Language |
| GSP-PM | GW Print Service - Print Module | PTS | Print Server |
| IMH | Image Memory Handler | SCS | System Control Service |
| MCS | Memory Control Service | SRM | System Resource <br> Management |
| NCS | Network Control Service | WebDB | Web Document Box <br> (Document Server) |

7. The machine is now set to record the debugging information automatically on the HDD (the target selected with SP5857-002) for the events that you selected with SP5858 and the memory modules selected with SP5859.

Please keep the following important points in mind when you do this setting:

- Note that the number entries for Keys 1 to 5 are the same for the Copy, Printer, Scanner, and Web memory modules.
- The initial settings are all zero.
- These settings remain in effect until you change them. Be sure to check all the settings, especially the settings for Keys 6 to 10 . To switch off a key setting, enter a zero for that key.
- You can select any number of keys from 1 to 10 (or all) by entering the corresponding 4-digit numbers from the table.
- You cannot mix settings for the groups (COPY, PRINTER, etc.) for 006 to 010 . For example, if you want to create a PRINTER debug log you must select the settings from the 9 available selections for the "PRINTER" column only.
- One area of the disk is reserved to store the debug log. The size of this area is limited to 4 MB .

## Retrieving the Debug Log from the HDD

Retrieve the debug log by copying it from the hard disk to an SD card.

1. Insert the SD card into slot 2 (service slot) of the copier.
2. Enter the SP mode and execute SP5857-009 (Copy HDD to SD Card (Latest 4 MB )) to write the debugging data to the SD card.
3. Use a card reader to copy the file and send it for analysis to your local Ricoh representative by email. You can also send the SD card by regular mail if you want.

## Recording Errors Manually

SC errors and jams only are recorded to the debug log automatically. Please instruct the user to do the following immediately after occurrence to save the debug data for any other errors that occur while the customer engineer is not on site. Such problems also include a controller or panel freeze.

## Note

- You must previously switch on the Save Debug Feature (SP5857-001) and select the hard disk as the save destination (SP5857-002) if you want to use this feature.

1. Press (Clear Modes).on the operation panel when the error occurs.
2. On the control panel, enter " 01 ". Then hold down © for at least 3 seconds until the machine beeps and then release it. This saves the debug log to the hard disk for later retrieval with an SD card by the service representatives.
3. Switch the machine off and on to resume operation.

The debug information for the error is saved on the hard disk. This lets the service representative retrieve it on their next visit by copying it from the HDD to an SD card.

## Debug Log Codes

## SP5857-015 Copy SD Card-to-SD Card: Any Desired Key

This SP copies the log on an SD card (the file that contains the information written directly from shared memory) to a log specified by key number. The copy operation is executed in the log directory of the SD card inserted in the same slot. (This function does not copy from one slot to another.) Each SD card can hold up to 4 MB of file data. Unique file names are created for the data during the copy operation to prevent overwriting files of the same name. This means that log data from more than one machine can be copied onto the same SD card. This command does not execute if there is no log on the HDD for the name of the specified key.

## SP5857-016 Create a File on HDD to Store a Log

This SP creates a 32 MB file to store a log on the HDD. However, this is not a completely empty file. The created file will hold the number " 2225 " as the SCS key number and other non-volatile information. Even if this SP is not executed, a file is created on the HDD when the first log is stored on the HDD (it takes some time to complete this operation). This creates the possibility that the machine may be switched off and on before the log can be created completely. If you execute this SP to create the log file beforehand, this will greatly reduce the amount of time required to acquire the log information and save onto the HDD. With the file already created on the HDD for the log file, the data only needs to be recorded. A new log file does not need to be created. To create a new log file, do SP5857-0 11 to delete the debug log data from the HDD. Then do SP5857-016.

## SP5857-017 Create a File on SD Card to Store a Log

This SP creates a 4 MB file to store a log on an SD card. However, this is not a completely empty file. The created file will hold the number " 2225 " as the SCS key number and other non-volatile information. Even if this SP is not executed, a file is created on the SD card when the first log is stored on the SD card (it takes some time to complete this operation). This creates the possibility that the machine may be switched off and on before the log can be created completely. If you execute this SP to create the log file beforehand, this will greatly reduce the amount of time required to acquire the log information and save onto the SD card. With the file already created on the SD card for the log file, the data only needs to be recorded; a new log file does not require creation. To create a new log file, do SP5857-0 12 to delete the debug log data from the SD card. Then do SP5857-017.

## Card Save Function

## Overview

## Card Save:

- The Card Save function is used to save print jobs received by the printer on an SD card with no print output. Card Save mode is toggled using printer Bit Switch \#1 bit number 4. Card Save will remain enabled until the SD card becomes full, or until all file names have been used.
- Captures are stored on the SD card in the folder /prt/cardsave. File names are assigned sequentially from PRT00000. prn to PRT99999.prn. An additional file PRT.CTL will be created. This file contains a list of all files created on the card by the card save function.
- Previously stored files on the SD card can be overwritten or left intact. Card Save SD has "Add" and "New" menu items.
- Card Save (Add): Appends files to the SD Card. Does not overwrite existing files. If the card becomes full or if all file names are used, an error will be displayed on the operation panel. Subsequent jobs will not be stored.
- Card Save (New): Overwrites files in the card's / prt/cardsave directory.

## Limitation:

- Card Save cannot be used with PJL Status Readback commands. PJL Status Readbacks will not work. In addition they will cause the Card Save to fail.

## Procedure

1. Turn the main power switch OFF.
2. Insert the SD card into slot 2. Then turn the power ON.
3. Enter SP mode.
4. Select the "Printer $S p$ ".
5. Select SP-1001 "Bit Switch".

6. Select "Bit Switch 1 Settings" and use the numeric keypad to turn bit 4 ON and then press the "\#" button to register the change. The result should look like: 00010000. By doing this, Card Save option will appear in the "List/Test Print" menu.

7. Press "Exit" to exit SP Mode.
8. Press the "User Tools/Counter" button.

9. Select "Printer Features".

10. Card Save (Add) and Card Save (New) should be displayed on the screen. Select Card Save (Add) or Card Save (New).

Select one of the following tems.

Select one of the following tems.

d027t106
11. Press "OK" and then exit the "User Tools/Counter" menu.

12. Press the "Printer" button.

d027t108
13. Card Save should be displayed in the top left of the display panel.

14. Send a job to the printer. The Communicating light should start blinking as shown below.

d027t110
15. As soon as the printer receives the data, it will be stored on the SD card automatically with no print output. Nothing is displayed on the screen, indicating that a Card Save operation was successful.
16. Press "Offline" and then the "Clear/Stop" button to exit Card Save mode.

17. Change the Bit Switch Settings back to the default 00000000. Press the "\#" button in the numeric keypad to register the changes.
18. Remove the SD card after the main power switch is turned off.

## Error Messages

Card Save error messages:

- Init error: A card save process (e.g. card detection, change to kernel mode) failed to initialize.
- Card not found: Card cannot be detected in the slot.
- No memory: Insufficient working memory to process the job.
- Write error: Failed to write to the card.
- Other error: An unknown error occurred.

If an error occurs, pressing "OK" will cause the device to discard the job and return to the ready state.

## 6. Troubleshooting

## SC Tables

## Service Call Conditions

## Summary

The 'SC Table' section shows the SC codes for controller errors and other errors. The latter (not controller errors) are put into four types. The type is determined by their reset procedures. The table shows the classification of the SC codes.

|  | Key | Definition | Reset Procedure |
| :---: | :---: | :---: | :---: |
| Controller errors | CTL | The error has occurred in the controller. | See "Troubleshooting Procedure" in the table. |
| Other errors | A | The error involves the fusing unit. The machine operation is disabled. The user cannot reset the error. | Turn the main switch off and on. Reset the SC (set SP5-810-1). Turn the main switch off and on. |
|  | B | The error involves one or some specific units. The machine operates as usual, excluding the related units. | Turn the operation switch off and on. |
|  | C | The error is logged. The SC-code history is updated. The machine operates as usual. | The SC will not show. Only the SC history is updated. |
|  | D | The machine operation is disabled. You can reset the machine by turning the operation switch or main switch off and on. If the error occurs again, the same SC code is displayed. | Turn the operation switch or main power switch off and on. |

After you turn the main power switch off, wait for one second or more before you turn the main power switch on (5C 672). All SCs are logged. The print log data (SP5-990-004) in SP mode can check the latest 10 SC codes detected and total counters when the SC code is detected.

## $\downarrow$ Note

- If the problem concerns electrical circuit boards, first disconnect then reconnect the connectors before you replace the PCBs.
- If the problem concerns a motor lock, first check the mechanical load before you replace motors or sensors.

## SC Code Classification

The table shows the classification of the SC codes:

| Class 1 | Section | SC Code | Detailed section |
| :---: | :---: | :---: | :---: |
| 1 XX | Scanning | 100- | Scanner |

## Note 1

If a problem always occurs in a specific condition (for example. printer driver setting, image file), the problem may be caused by a software error. In this case, the following data and information needs to be sent back to your product specialist. Please understand that it may take some time to get a reply on how to solve the problem, because in some cases the design staff in Japan must analyze the data.

- Symptom / Possible Causes / Action taken
- Summary sheet (SP mode "Printer SP", SP1-004 [Print Summary])
- SMC - All (SP5-990-001)
- SMC - Logging (SP5-990-004)
- Printer driver settings used when the problem occurs
- All data displayed on the screen (SC code, error code, and program address where the problem is logged.)
- Image file which causes the problem, if possible

## Note

- The machine starts developer initialization after you set "Enable" in SP3-902-005, 006, 007, or 008. Developer initialization automatically resumes when you open and close the front door or turn the main switch off and on if an error other than Error 8 occurs.

## Line Position Adjustment Result

SP2-194-010 to -012 (Line Position Adjustment Result: M, C, Y)
This SP shows the number as a line position adjustment result on the LCD. It shows which color has an error ( $M, Y$ or $C$ ).

| No. | Result | Description | Note |
| :---: | :--- | :--- | :--- |
| 0 | Not done | Line position adjustment has not been done. | - |
| 1 | Completed <br> successfully | Line position adjustment has correctly been done, | - |
| 2 | Cannot detect <br> patterns | ID sensors have not detected the patterns for line position <br> adjustment. | See Note |
| 3 | Fewer lines on the <br> pattern than the <br> target | The patterns, which ID sensors have detected, are not <br> enough for line position adjustment. | See Note |
| 4 | More lines on the <br> pattern than the <br> target | Not used in this machine. | - |
| 5 | Out of the <br> adjustment range | ID sensors have correctly detected the patterns for line <br> position adjustment, but a shift of patterns is out of <br> adjustable range. | See Note |
| $6-9$ | Not used | - | - |

## Troubleshooting Guide

## Image Quality

The following work-flow shows the basic troubleshooting steps for the image quality problems on this product.

| Considerable Symptoms |
| :--- |
| - Toner blasting |
| Check which colour is blasting and adjust the toner limit or transfer bias. |
| - Image density change |
| Check when the problem is reported and follow the necessary steps. |
| - Dirty Background |
| Check in which condition the problem is reported, and follow the required procedure. |
| - Colour vertical bands/lines/dirty background |
| Check the OPC drum and/or development unit. |
| - Colour shift |
| Check the level of the colour shift and follow the troubleshooting guide if required. |
| - Colour lines/bands/dirty background |
| When the PCU/development unit is close to its life end, the developer or the cleaning blade of the |
| PCU wears out, causing vertical colour lines, bands, or dirty background. Check the related colour |
| unit and replace it if necessary. |

## Line Position Adjustment

When there are color registration errors on the output, do the line position adjustment as follows.

## $\downarrow$ Note

- Use A3/DLT size paper for this adjustment.

## Test

1. Do SP2-111-003 (Mode c: rough adjustment).
2. Use SP2-194-007 to check if the result of the line position adjustment is correct ( 0 : Completed successfully, 1 : Not completed). If the result is " 1 ", refer to 'Countermeasure list for color registration errors'.
3. Do SP2-111-001 (Mode a: fine adjustment twice).
4. Use SP2-194-007 to check if the result of the line position adjustment is correct ( 0 : Completed successfully, 1: Not completed). If the result is " 1 ", refer to 'Countermeasure list for color registration errors'.
5. Put some A3/DLT paper on the by-pass tray.

- When you print a test pattern, use the by-pass tray to feed the paper.

6. Print out test pattern "7" with SP2-109-003.
7. Check the printed output with a loupe.
8. If there are no color registration errors on the output, the line position adjustment is correctly done. If not, refer to the countermeasure list for color registration errors.

## Countermeasure list for color registration errors

## Stain on the Outputs

If a stain appears at the edge of the output, do the following procedure.

1. Execute the fusing cleaning mode with SP1123-002.

## Note

- It takes 160 seconds to complete the fusing cleaning mode.

2. Make a sample copy, and then check if a stain appears on the output.

## Stack Problem in the 1-Bin Tray

If a stack problem occurs on the 1-bin tray, raise the guide on the 1-bin tray.

## If a stack problem occurs;

- Push the guide to lift the guide [A].

If another type or size of paper is used;

- Press down the guide $[B]$.

## Problem at Regular Intervals

Image problems may appear at regular intervals that depend on the circumference of certain components. The following diagram shows the possible symptoms (black or white dots at regular intervals).

[A]: Paper feed direction
[B]: Problems at regular intervals

- Colored spots at 47 -mm intervals: Development roller
- Abnormal image at $51-\mathrm{mm}$ intervals: ITB drive or bias roller
- Abnormal image at $85-\mathrm{mm}$ intervals: Paper transfer roller
- Colored spots at 119-mm intervals: Drum
- Abnormal image at 101 -mm intervals: Fusing unit (Pressure roller)
- Abnormal image at 107 -mm intervals: Fusing unit (Heating roller)

## Toner End Recovery Error

If the toner end message on the LCD is displayed in the following conditions, there are some possible causes. Check the machine referring to the flow chart for the toner end recovery error.

- After a new toner bottle has been installed in the machine
- When a displayed color toner bottle still has toner inside

Flow Chart for the Toner End Recovery Error

## Countermeasure 1

1. Check if the toner supply tube is bent or disconnected.
2. Straighten the toner supply tube or connect it correctly.

## Countermeasure 2

1. Remove the target color toner bottle.
2. Disconnect the toner supply tube from the toner pump unit.
3. Remove the blocked toner in the toner supply tube with a vacuum cleaner.

## Countermeasure 3

- Replace the toner pump unit p.214).

## Countermeasure 4

- Replace the PCDU ( N .205).

## Solid Image or Halftone Image Error

The toner density of a solid image or halftone image may not be uniform ([A]: problem output, [B]: normal output) if a large amount of sheets is printed at low coverage. If this occurs, follow the countermeasure below.

## Recovery Procedure

1. Enter the SP mode.
2. Set SP3-044-xxx (Toner Supply Type) to " 1 : PID (Vref Fixed)".

- Chose a target color SP number from -001 (Bk), -002 (Magenta), -003 (Cyan), and -004 (Yellow).

2. Set SP3-222-xxx (Vtref: Display/Set) to "4V".

- Chose a target color SP number from -001 (Bk), -002 (Magenta), -003 (Cyan), and -004 (Yellow).

3. Set SP2-109-003 (Test Pattern; Pattern Selection) to "23: Full Dot Pattern".
4. Set SP2-109-005 (Test Pattern; Color Selection) to "1: All Color (black)", "2: Magenta", "3: Cyan", or "4: Yellow".

- Chose a target color selection number.

5. Press "Copy Window" on the LCD.
6. Copy 20 sheets for A4 size or 30 sheets for A3 size, and then check the setting of SP3-222-xxx (Vtref: Display/Set).

- If the setting of this $S P$ is more than 4 V , go to next step. If not, copy again until the setting of this SP is more than 4 V .

7. Return the setting of SP3-044-xxx (Toner Supply Type) to "4: MBD (Vref_Control)".

- Return the setting of the SP which you have changed in step 2 before.

8. Execute SP3-015-xxx (Forced Toner Supply: Execute) twice.

- Chose a target color SP number from -003 (Bk), -004 (Magenta), -005 (Cyan) and -006 (Yellow).

9. Execute the SP3-011-002 (Process Cont. Manual Execution; Density Adjustment).

## Problem Prevention Procedure

- Set the setting of SP3-516-025 (Refresh Mode; Job End Area Coefficient) to "0.5".

## Faulty Cleaning

Black or color lines (2-3mm)

## Possible Cause:

Wear of the cleaning blade at a specific point by image creation in the same place many times.

## Solution:

Replace the drum unit.

Band Image Between 20 mm and 30 mm

## Possible Cause:

Developer wear with time

## Solution:

Replace the developer or the development unit.

## Jam Detection

## Paper Jam Display

SP7-507 shows the paper jam history.

CODE :011
SIZE :05h
TOTAL:000034
DATE :Fri Feb 15 11:44:50 2006

- CODE: Indicates the jam code.
- SIZE: Indicates the paper Size Code.
- TOTAL: Indicates the total counter (SP7-502-001).
- DATE: indicates the date when the jam occurred.

## Jam Codes and Display Codes

SP7-504 shows how many jams occurred at each location.

## $\triangle$ CAUTION

- For continued protection against risk of fire, replace only with same type and rating of fuse.

## Scanner Test Mode

## SBU Test Mode

Output the SBU test pattern with SP4-807-001 to make sure the scanner SBU control operates correctly. The SBU test pattern prints out after you have set the SP mode settings and pressed the start key.

- The CCD on the SBU board may be defective if the copy is abnormal and the SBU test pattern is normal.
- The followings can be the cause if the copy is normal and the SBU test pattern is abnormal:
- The harness may not be correctly connected between the SBU and the BICU.
- The BICU or SBU board may be defective.

## 7. Energy Saving

## Energy Save

## Energy Saver Modes

Customers should use energy saver modes properly, to save energy and protect the environment.

## Power

Consump.

d082d911
The area shaded grey in this diagram represents the amount of energy that is saved when the timers are at the default settings. If the timers are changed, then the energy saved will be different. For example, if the timers are all set to 240 min ., the grey area will disappear, and no energy is saved before 240 min . expires.

## Timer Settings

The user can set these timers with User Tools (System settings > Timer setting)

- Panel off timer ( $10 \mathrm{sec}-240 \mathrm{~min}$ ): Panel Off Mode. Default setting: 60 sec .
- Energy saver timer ( 1 - 240 min ): Low Power Mode. Default setting: 15 min .
- Auto off timer ( 1 - 240 min ): Off/Sleep Mode. Default setting: 30 min .

Normally, Panel Off timer < Energy Saver timer < Auto Off timer. But, for example, if Auto Off timer < or = Panel Off timer and Energy Saver timer, the machine goes immediately to Off mode when the Auto Off timer expires. It skips the Panel Off and Energy Saver modes.

## Example

- Panel off: 1 min.
- Low power: 15 min.
- Auto Off: 1 min.
- The machine goes to Off mode after 1 minute. Panel Off and Low Power modes are not used.

## Return to Stand-by Mode

## Low Power Mode

The recovery time depends on the model and the region.

- 10 to 15.7 sec .

## Off/Sleep Mode

Recovery time.

- 15 sec .

## Recommendation

We recommend that the default settings should be kept.

- If the customer requests that these settings should be changed, please explain that their energy costs could increase, and that they should consider the effects on the environment of extra energy use.
- If it is necessary to change the settings, please try to make sure that the Auto Off timer is not too long. Try with a shorter setting first, such as 30 min ., then go to a longer one (such as 60 min .) if the customer is not satisfied.
- If the timers are all set to the maximum value, the machine will not begin saving energy until 240 minutes has expired after the last job. This means that after the customer has finished using the machine for the day, energy will be consumed that could otherwise be saved.
- Ifyou change the settings, the energy consumed can be measured using SP8941, as explained below.

## Energy Save Effectiveness

SP 8941 (Machine Status) keeps a record of the amount of time that the machine spends in each mode.

- 8941-001: Operating mode
- 8941-002: Standby mode
- 8941-003: Panel off mode
- 8941-004: Low power mode
- 8941-005: Off/sleep mode

With this data, and the power consumption values from the specifications, we can estimate the amount of energy that is used by the machine.

This should only be used as a reference value, because the power consumption specifications are measured in a controlled environment with a constant power supply.

To get an exact measurement at the customers site, a watt meter must be used to measure the actual energy consumed.

To use SP8941 to calculate the energy consumed:

- At the start of the measurement period, read the values of SP8941 001 to 005.
- At the end of the measurement period, read the values of SP8941 001 to 005 again.
- Find the amount of time spent in each mode (subtract the earlier measurement from the later measurement).
- Multiply this by the power consumption spec for each mode.
- Convert the result to kWh (kilowatt hours)

Here is an example calculation.

| Machine <br> Condition |  | Time at Start (min.) | Time at End (min.) | Running <br> time (hour) (르-(1))/ $60=3$ | Power consumption Spec. (W) | Power consumption (KWH) $\begin{gathered} (3) \times(4)) / 1000 \\ =\text { © } \end{gathered}$ |

## Paper Save

## Effectiveness of Duplex/Combine Function

Duplexing and the combine functions reduce the amount of paper used. This means that less energy overall is used for paper production, which improves the environment.

## 1. Duplex:

Reduce paper volume in half!

## 2. Combine mode:

Reduce paper volume in half!

d062d100

## 3. Duplex + Combine:

Using both features together can further reduce paper volume by $3 / 4$ !

d062d101
To check the paper consumption, look at the total counter and the duplex counter.
The total counter counts all pages printed.

- For one duplex page, the total counter goes up by 2.
- For a duplex job of a three-page original, the total counter goes up by 3.

The duplex counter counts pages that have images on both sides.

- For one duplex page, the duplex counter goes up by 1 .
- For a duplex job of a three-page original, the duplex counter will only increase by 1 , even though two sheets are used.

## How to calculate the paper reduction ratio

How to calculate the paper reduction ratio, when compared with Single-sided copying, with no 2-in-1 combine mode

Paper reduction ratio (\%) = Number of sheets reduced: A/Number of printed original images: B $\times 100$

- Number of sheets reduced: A
$=$ Output pages in duplex mode/2 + Number of pages in Single-sided with combine mode + Number of pages in Duplex with combine mode $\times 3 / 2$
$A=((2)+(3)+(4)) / 2+(5)+(6) \times 3 / 2$
- Number of printed original images: $B$
$=$ Total counter6 + Number of pages in Single-sided with combine mode + Number of pages in Duplex with combine mode
$B=(1)+(5)+(6)$
- (1) Total counter: SP 8581001 (pages)
- (2) Single-sided with duplex mode: SP 8421001 (pages)
- (3) Double-sided with duplex mode: SP 8421002 (pages)
- (4) Book with duplex mode: SP 8421003 (pages)
- (5) Single-sided with combine mode: SP 8421004 (pages)
- (6) Duplex with combine mode: SP 8421005 (pages)

## Software Accessories

The printer drivers and utility software are provided as following two CD-ROMs
1: Printer Drivers and Utilities CD-ROM
2: Scanner/PostScript® Drivers and Utilities CD-ROM.
An auto-run installer lets you to select the components you want to install.

## Printer Drivers

| Printer Language | Windows 2000, XP, Server 2003, Vista, <br> Server 2008, 7 | MacOS8.6 to 9.x, <br> MacOSX10.1 <br> or later |
| :---: | :---: | :---: |
| PCL5c <br> $/$ PCL6 | Yes | No |
| PS3 | Yes | Yes |
| RPCS | No | No |

## Note

- The PCL5c/6 and PS3 drivers are provided on the printer drivers CD-ROM
- The PS3 drivers are all genuine Adobe PS drivers, except for Windows 2000/XP/2003/Vista/7. Windows 2000 uses Microsoft PS. A PPD file for each operating system is provided with the driver.
- The PPD installer for Macintosh supports Mac OS X 10.1 or later versions.
- The LAN Fax driver lets you fax documents directly form your PC. Address Book Editor and Cover Sheet Editor are to be installed as well. (These require the optional fax unit.)

## Scanner and LAN Fax drivers

## Others Yield Parts

The parts mentioned in these tables have a target yield. However, the total copy/print volume made by the machine will not reach the target yield within the machine's targeted lifetime if the machine is used under the target usage conditions ( ACV , color ratio, $\mathrm{P} / \mathrm{J}$, and $\mathrm{C} / \mathrm{O}$ ). So, these parts are categorized not as PM parts but as yield parts (EM parts).

[Area Shad. Correct. Setting] FA
Adjusts the area correction value for each LD power.
The main scan is divided into 16 areas. However, the image areas are limited from area 1 to area 14 .

For BK and Magenta, area 1 is at the rear side of the machine (left side of the image) and area 14 is at the front side of the machine (right side of the image).

For Cyan and Yellow, area 1 is at the front side of the machine (right side of the image) and area 14 is at the rear side of the machine (left side of the image).

| 061 | Cert. Expire Timing DFU | Proximity of the expiration of the cerrification. |
| 062 | Use Proxy | This SP setting determines if the proxy server is used when the machine communicates with the service center. |
|  | Proxy Host |  |
| 063 | This SP sets the address of the proxy server used for communication between the RCG device and the gateway. Use this SP to set up or display the customer proxy server address. <br> The address is necessary to set up the embedded RCG-N. <br> Note <br> - The address display is limited to 128 characters. Characters beyond the 128 character are ignored. <br> - This address is customer information and is not printed in the SMC report. |  |

| 064 | Proxy PortNumber |  |
| :---: | :---: | :---: |

| 067 | CERT:Up State |  |
|  | Displays the status of the certification update. |  |
|  | 0 | The certification used by RCG-N is set correctly. |
|  | 1 | The cerrification request (setAuthKey) for update has been received from the GW URL and cerrification is presently being updated. |
|  | 2 | The cerrification update is completed and the GW URL is being notified of the successful update. |
|  | 3 | The certification update failed, and the GW URL is being notified of the failed update. |
|  | 4 | The period of the certification has expired and new request for an update is being sent to the GW URL. |
|  | 11 | A rescue update for certification has been issued and a rescue certification setting is in progress for the rescue GW connection. |

|  | 12 | The rescue certification setting is completed and the GW URL is being notified of the certification update request. |  |
| :---: | :---: | :---: | :---: |
|  | 13 | The notification of the request for certification update has completed successfully, and the system is waiting for the cerrification update request from the rescue GW URL. |  |
|  | 14 | The notification of the certification request has been received from the rescue GW controller, and the certification is being stored. |  |
|  | 15 | The certification has been stored, and the GW URL is being notified of the successful completion of this event. |  |
|  | 16 | The storing of the certification has failed, and the GW URL is being notified of the failure of this event. |  |
|  | 17 | The cerrification update request has been received from the GW URL, the GW URL was notified of the results of the update after it was completed, but an certification error has been received, and the rescue certification is being recorded. |  |
|  | 18 | The rescue certification of No. 17 has been recorded, and the GW URL is being notified of the failure of the certification update. |  |
| CERT:Error |  |  |  |
|  | Displays a number code that describes the reason for the request for update of the certification. |  |  |
|  | 0 | Normal. There is no request for cerrification update in progress. |  |
|  | 1 | Request for cerrification update in progress. The current certification has expired. |  |
| 068 | 2 | An SSL error notification has been issued. Issued after the cerrification has expired. |  |
|  | 3 | Notification of shiff from a common authentication to an individual certification. |  |
|  | 4 | Notification of a common certification without ID2. |  |
|  | 5 | Notification that no certification was issued. |  |
|  | 6 | Notification that GW URL does not exist. |  |
| 069 | CERT:Up ID |  | The ID of the request for certification. |
| 083 | FirmUp Status |  | Displays the status of the firmware update. |

| 085 | Firm Up User Check | This SP setting determines if the operator can confirm the previous version of the firmware before the firmware update execution. If the option to confirm the previous version is selected, a notification is sent to the system manager and the firmware update is done with the firmware files from the URL. |
| :---: | :---: | :---: |
| 086 | Firmware Size | Allows the service technician to confirm the size of the firmware data files during the firmware update execution. |
| 087 | CERT: Macro Version | Displays the macro version of the @Remote certification. |
| 088 | CERT: PAC Version | Displays the PAC version of the @Remote certification. |
| 089 | CERT: ID2 Code | Displays ID2 for the @Remote certification. Spaces are displayed as underscores (_). Asteriskes (****) indicate that no @Remote certification exists. |
| 090 | CERT: Subject | Displays the common name of the @Remote cerrification subject. $\mathrm{CN}=$ the following 17 bytes. Spaces are displayed as underscores (_). Asterisks (****) indicate that no DESS exists. |
| 091 | CERT: Serial Number | Displays serial number for the NRS certification. Asterisks (****) indicate that no DESS exists. |
| 092 | CERT: Issuer | Displays the common name of the issuer of the @Remote certification. $\mathrm{CN}=$ the following 30 bytes. Asteriskes (****) indicate that no DESS exists. |
| 093 | CERT: Valid Start | Displays the start time of the period for which the current @Remote certification is enabled. |
| 094 | CERT: Valid End | Displays the end time of the period for which the current @Remote cerrification is enabled. |
| Selection Country |  |  |
| 150 | Select the country where embedded RCG-M is installed in the machine. After selecting the country, you must also set the following SP codes for embedded RCG-M: <br> - SP5816-153 <br> - SP5816-154 <br> - SP5816-161 <br> 0: Japan, 1: USA, 2: Canada, 3: UK, 4: Germany, 5: France, 6: Italy, <br> 7: Netherlands, 8: Belgium, 9: Luxembourg, 10: Spain |  |

| 151 | Line Type AutomaticJudgment |
| :---: | :---: |
|  | Press [Execute]. <br> Setting this SP classifies the telephone line where embedded RCG-M is connected as either dial-up (pulse dial) or push (DTMF tone) type, so embedded RCG-M can automatically distinguish the number that connects to the outside line. <br> - The current progress, success, or failure of this execution can be displayed with SP5816-152. <br> - If the execution succeeded, SP5816-153 will display the result for confirmation and SP5816-154 will display the telephone number for the connection to the outside line. |
| 152 | Line Type Judgment Result |
|  | Displays a number to show the result of the execution of SP5816 151. Here is a list of what the numbers mean. <br> 0: Success <br> 1: In progress (no result yet). Please wait. <br> 2: Line abnormal <br> 3: Cannot detect dial tone automatically <br> 4: Line is disconnected <br> 5: Insufficient electrical power supply <br> 6: Line classification not supported <br> 7: Error because fax transmission in progress - ioctl() occurred. <br> 8: Other error occurred <br> 9: Line classification still in progress. Please wait. |
| 153 | Selection Dial/Push |
|  | This SP displays the classification (tone or pulse) of the telephone line to the access point for embedded RCG-M. The number displayed ( 0 or 1 ) is the result of the execution of SP5816-151. However, this setting can also be changed manually. <br> [0 or $1 / 0 / 1 /$ step] <br> 0 : Tone Dialing Phone <br> 1: Pulse Dialing Phone <br> Inside Japan "2" may also be displayed: <br> 0 : Tone Dialing Phone <br> 1: Pulse Dialing Phone 10PPS <br> 2: Pulse Dialing Phone 20PPS |

| 154 | Outside LineOutgoing Number |
| :---: | :---: |
|  | The SP sets the number that switches to PSTN for the outside connection for embedded RCG-M in a system that employs a PBX (internal line). <br> - If the execution of SP5816-151 has succeeded and embedded RCG-M has connected to the external line, this SP display is completely blank. <br> - If embedded RCG-M has connected to an internal line, then the number of the connection to the external line is displayed. <br> - If embedded RCG-M has connected to an external line, a comma is displayed with the number. The comma is inserted for a 2 sec. pause. <br> - The number setting for the external line can be entered manually (including commas). |
| 156 | Dial Up User Name |
|  | Use this SP to set a user name for access to remote dial up. Follow these rules when setting a user name: <br> - Name length: Up to 32 characters <br> - Spaces and \# allowed but the entire entry must be enclosed by double quotation marks ("). |
| 157 | Dial Up Password |
|  | Use this SP to set a password for access to remote dial up. Follow these rules when setting a user name: <br> - Name length: Up to 32 characters <br> - Spaces and \# allowed but the entire entry must be enclosed by double quotation marks ("). |
| 161 | Local Phone Number |
|  | Use this SP to set the telephone number of the line where embedded RCG-M is connected. This number is transmitted to and used by the Call Center to return calls. <br> Limit: 24 numbers (numbers only) |
| 162 | Connection Timing Adjustment: Incoming |
|  | When the Call Center calls out to an embedded RCG-M modem, it sends a repeating ID tone (*\#1 \#). This SP sets the time the line remains open to send these ID tones after the number of the embedded RCG-M modem is dialed up and connected. <br> [ 0 to $24 / 1 / 1 /$ step] <br> The actual amount of time is this setting $\times 2 \mathrm{sec}$. For example, if you set " 2 " the line will remain open for 4 sec . |

|  | Access Point |  |  |
| :---: | :---: | :---: | :---: |
| 163 | This is the number of the dial-up access point for RCG-M. If no setting is done for this SP code, then a preset value (determined by the country selected) is used. <br> Default: 0 <br> Allowed: Up to 16 alphanumeric characters |  |  |
| 164 | Line Connecting |  |  |
|  | This SP sets the connection conditions for the customer. This setting dedicates the line to RCG-M only, or sets the line for sharing between RCG-M and a fax unit. <br> [0 to $1 / 0 / 1 /$ step] <br> 0 : Sharing Fax <br> 1: No Sharing Fax <br> Note <br> - If this setting is changed, the copier must be cycled off and on. <br> - SP5816 187 determines whether the off-hook button can be used to interrupt a RCG $M$ transmission in progress to open the line for fax transaction. |  |  |
| 173 | Modem Serial Number |  | plays the serial number registered for the RCG-M. |
|  | Retransmission Limit |  |  |
| 174 | Normally, it is best to allow unlimited time for certification and ID2 update requests, and for the notification that the certification has been completed. However, RCG-M generates charges based on transmission time for the customer, so a limit is placed upon the time allowed for these transactions. <br> If these transactions cannot be completed within the allowed time, do this SP to cancel the time restriction. |  |  |
|  | FAX TX Priority |  |  |
| 187 | This SP determines whether pushing the off-hook button will interrupt a RCG-M transmission in progress to open the line for fax transaction. This SP can be used only if SP5816 164 is set to " 0 ". <br> [0 or 1/0/-] <br> 0 : Disable, 1: Enable |  |  |
| 200 | Manual Polling | - | Executes the manual polling. |

| 201 | Regist: Status |  |
| :---: | :---: | :---: |
|  | Displays a number that indicates the status of the @Remote service device. <br> 0 : Neither the registered device by the external nor embedded RCG device is set. <br> 1:The embedded RCG device is being set. Only Box registration is completed. In this status, this unit cannot answer a polling request from the external RCG. <br> 2. The embedded RCG device is set. In this status, the external RCG unit cannot answer a polling request. <br> 3. The registered device by the external RCG is being set. In this status the embedded RCG device cannot be set. <br> 4 The registered module by the external RCG has not started. |  |
| 202 | Letter Number | Allows entry of the number of the request needed for the RCGN device. |
| 203 | Confirm Execute | Executes the inquiry request to the @Remote GW URL. |
| 204 | Confirm Result |  |
|  | Displays a number that indicates the result of the inquiry executed with SP5816 203. <br> 0: Succeeded <br> 1: Inquiry number error <br> 2: Registration in progress <br> 3: Proxy error (proxy enabled) <br> 4: Proxy error (proxy disabled) <br> 5: Proxy error (Illegal user name or password) <br> 6: Communication error <br> 7: Certification update error <br> 8: Other error <br> 9: Inquiry executing |  |
|  | Confirm Place |  |
| 205 | Displays the result of the notification sent to the device from the GW URL in answer to the inquiry request. Displayed only when the result is registered at the GW URL. |  |
| 206 | Register Execute | Executes "Embedded RCG Registration". |

| 207 | Register Result |  |  |
| :---: | :---: | :---: | :---: |

|  | Provides items for delivery server settings. |  |  |
| 001 | FTP Port No. |  | [0 to 65535 / 3670 / 1 /step] |
|  | Sets the FTP port number used when image files to the Scan Router Server. |  |  |
| 002 | IP Address (Primary) |  | Range: 000.000.000.000 to 255.255.255.255 |
|  | Use this SP to set the Scan Router Server address. The IP address under the transfer tab can be referenced by the initial system setting. |  |  |
| 006 | Delivery Error Display Time |  | [0 to 999 / 300 / 1 second /step] |
|  | Use this setting to determine the length of time the prompt message is displayed when a test error occurs during document transfer with the NetFile application and an external device. |  |  |
| 008 | IP Address (Secondary) |  | Range: 000.000.000.000 to 255.255.255.255 |
|  | Specifies the IP address assigned to the computer designated to function as the secondary delivery server of Scan Router. This SP allows only the setting of the IP address without reference to the DNS setting. |  |  |

| 015 | Server URL Path (Primary) DFU |
| :---: | :---: |

| 5846 | [UCS Settings] | *CTL |  |
| :---: | :---: | :---: | :---: |
| 001 | Machine ID (For Delivery Server) |  | Displays ID |
|  | Displays the unique device ID in use by the delivery server directory. The value is only displayed and cannot be changed. This ID is created from the NIC MAC or IEEE 1394 EUI. The ID is displayed as either 6-byle or 8-byte binary. |  |  |
| 002 | Machine ID Clear (For Delivery Server) |  | Clears ID |
|  | Clears the unique ID of the device used as the name in the file transfer directory. Execute this $S P$ if the connection of the device to the delivery server is unstable. After clearing the ID, the ID will be established again automatically by cycling the machine off and on. |  |  |
| 003 | Maximum Entries |  | [2000 to 20000/2000/1/step] |
|  | Changes the maximum number of entries that UCS can handle. <br> If a value smaller than the present value is set, the UCS managed data is cleared, and the data (excluding user code information) is displayed. |  |  |
| 006 | Delivery Server Retry Timer |  | [0 to $255 / 0 / 1 /$ step] |
|  | Sets the interval for retry attempts when the delivery server fails to acquire the delivery server address book. |  |  |

| 007 | Delivery Server Retry Times | [ 0 to $255 / 0 / 1 /$ step] |
| :---: | :---: | :---: |
|  | Sets the number of retry attempts when the delivery server fails to acquire the delivery server address book. |  |
| 008 | Delivery Server Maximum Entries | $\begin{aligned} & \text { [2000 to } 50000 / 2000 / 1 / \\ & \text { step] } \end{aligned}$ |
|  | Sets the maximum number account entries of the delivery server user information managed by UCS. |  |
| 010 | LDAP Search Timeout | [1 to $255 / 60 / 1 /$ step] |
|  | Sets the length of the timeout for the search of the LDAP server. |  |
| 020 | WSD Maximum Entries | [ 5 to $250 / 250 / 1 /$ step] |
|  | Sets the maximum entries for the address book of the WSD (WS-scanner). |  |
| 040 | Addr Book Migration (USB => HDD) |  |
|  | Not used in this machine. |  |
| 041 | Fill Addr Acl Info. |  |
|  | This SP must be executed immediately after installation of an HDD unit in a basic machine that previously had no HDD. The first time the machine is powered on with the new HDD installed, the system automatically takes the address book from the NVRAM and writes it onto the new HDD. However, the new address book on the HDD can be accessed only by the system administrator at this stage. Executing this SP by the service technician immediately after power on grants full address book access to all users. <br> Procedure <br> 1. Turn the machine off. <br> 2. Install the new HDD. <br> 3. Turn the machine on. <br> 4. The address book and its initial data are created on the HDD automatically. <br> 5. However, at this point the address book can be accessed by only the system administrator or key operator. <br> 6. Enter the SP mode and do SP5846 041. After this SP executes successfully, any user can access the address book. |  |

| 047 | Initialize Local Addr Book | Clears the local address book information, including the user code. |
| 048 | Initialize Delivery Addr Book | Clears the distribution address book information, except the user code. |
| 049 | Initialize LDAP Addr Book | Clears the LDAP address book information, except the user code. |
| 050 | Initialize All Addr Book | Clears all directory information managed by UCS, including all user codes. |
| 051 | Backup All Addr Book | Uploads all directory information to the SD card. |
| 052 | Restore All Addr Book | Downloads all directory information from the SD card. |
| 053 | Clear Backup Info | Deletes the address book data from the SD card in the service slot. <br> Deletes only the files that were uploaded from this machine. <br> This feature does not work if the card is write-protected. <br> Note <br> - After you do this SP, go out of the SP mode, and then turn the power off. <br> - Do not remove the SD card until the Power LED stops flashing. |

| 060 | Search Option |  |

|  | Displays the value given by the following formula: <br> (Current printouts \| Target printouts) • 100. This shows how much of the unit's expected lifetime has been used up. <br> The Page\% counter is based on printouts, not revolutions. If the number of printouts reaches the limit, the machine enters the end condition for that unit. If the revolution count lifetime is reached first, the machine also enters the end condition, even though the Page\% counter is still less than $100 \%$. |  |  |

## System SP8-xxx

## SP8-xxx: Data Log2

Many of these counters are provided for features that are currently not available, such as sending color faxes, and so on. However, here are some Group 8 codes that when used in combination with others, can provide useful information.

| SP Numbers | What They Do |
| :---: | :--- |
| SP8 211 to SP8 216 | The number of pages scanned to the document server. |
| SP8 401 to SP8 406 | The number of pages printed from the document server |
| SP8 691 to SP8 696 | The number of pages sent from the document server |

Specifically, the following questions can be answered:

- How is the document server actually being used?
- What application is using the document server most frequently?
- What data in the document server is being reused?

Most of the SPs in this group are prefixed with a letter that indicates the mode of operation (the mode of operation is referred to as an "application"). Before reading the Group 8 Service Table, make sure that you understand what these prefixes mean.

| Prefixes | What it means |  |
| :--- | :--- | :--- |
| T: | Total: (Grand Total). | Grand total of the items counted for all applications (C, F, P, <br> etc.). |
| C: | Copy application. |  |
| F: | Fax application. | Totals (pages, jobs, etc.) executed for each application when <br> the job was not stored on the document server. |
| P: | Print application. |  |
| S: |  |  |

|  |  | Totals (jobs, pages, etc.) for the document server. The L: <br> counters work differently case by case. Sometimes, they <br> count jobs/pages stored on the document server; this can be <br> in document server mode (from the document server <br> window), or from another mode, such as from a printer driver <br> or by pressing the Store File button in the Copy mode <br> window. Sometimes, they include occasions when the user <br> uses a file that is already on the document server. Each <br> counter will be discussed case by case. |
| :--- | :--- | :--- |
| O: $\quad$Local storage (document <br> server) |  |  |
| Other applications <br> (external network <br> applications, for <br> example) | Refers to network applications such as Web Image Monitor. <br> Utilities developed with the SDK (Software Development Kit) <br> will also be counted with this group in the future. |  |

The Group 8 SP codes are limited to 17 characters, forced by the necessity of displaying them on the small LCDs of printers and faxes that also use these SPs. Read over the list of abbreviations below and refer to it again if you see the name of an SP that you do not understand.

## Key for Abbreviations

| Abbreviation | What it means |
| :--- | :--- |
| $/$ | "By", e.g. "T:Jobs/Apl" = Total Jobs "by" Application |
| $>$ | More (2> "2 or more", 4> "4 or more" |
| AddBook | Address Book |
| Apl | Application |
| B/W | Black \& White |
| Bk | Black |
| C | Cyan |
| ColCr | Color Create |
| ColMode | Combine |
| Comb | Compression |
| Comp | Delivery |
| Deliv |  |

| Abbreviation | What it means |
| :---: | :---: |
| DesApl | Designated Application. The application (Copy, Fax, Scan, Print) used to store the job on the document server, for example. |
| Dev Counter | Development Count, no. of pages developed. |
| Dup, Duplex | Duplex, printing on both sides |
| Emul | Emulation |
| FC | Full Color |
| FIN | Post-print processing, i.e. finishing (punching, stapling, etc.) |
| Full Bleed | No Margins |
| GenCopy | Generation Copy Mode |
| GPC | Get Print Counter. For jobs 10 pages or less, this counter does not count up. For jobs larger than 10 pages, this counter counts up by the number that is in excess of 10 (e.g., for an 11 -page job, the counter counts up $11-10=1$ ) |
| IFax | Internet Fax |
| ImgEdt | Image Edit performed on the original with the copier GUI, e.g. border removal, adding stamps, page numbers, etc. |
| K | Black (YMCK) |
| LS | Local Storage. Refers to the document server. |
| LSize | Large (paper) Size |
| Mag | Magnification |
| MC | One color (monochrome) |
| NRS | New Remote Service, which allows a service center to monitor machines remotely. "NRS" is used overseas, "CSS" is used in Japan. |
| Org | Original for scanning |
| OrgJam | Original Jam |
| Palm 2 | Print Job Manager/Desk Top Editor: A pair of utilities that allows print jobs to be distributed evenly among the printers on the network, and allows files to moved around, combined, and converted to different formats. |

| Abbreviation | What it means |
| :--- | :--- |
| PC | Personal Computer |
| PGS | Pages. A page is the total scanned surface of the original. Duplex pages <br> count as two pages, and A3 simplex count as two pages if the A3/DLT <br> counter SP is switched ON. |
| PJob | Print Jobs |
| Ppr | Paper |
| PrtJam | Printer (plotter) Jam |
| PrtPGS | Print Pages |
| Red (Toner Remaining). Applies to the wide format model A2 only. This |  |
| machine is under development and currently not available. |  |
| Rez | Resolution |
| SC | Service Code (Error SC code displayed) |
| Scn | Scan |
| Sim, Simplex | Simplex, printing on 1 side. |
| S-to-Email | Scan-to-E-mail |
| SMC | SMC report printed with SP5990. All of the Group 8 counters are recorded <br> in the SMC report. |
| Toner Save |  |
| TonEnd | Server |
| TonSave | Yend, Transmission |
| YMob | Yellow, Mage Magenta, Cyan |
| YMCK | Tonta, Cyan, Black |

## Note

- All of the Group 8 SPs are reset with SP5 8011 Memory All Clear.

| 8001 | T:Total Jobs | ${ }^{*}$ CTL |  |

| 8002 | C:Total Jobs | ${ }^{*}$ CTL | These SPs count the number of times each application is used <br> to do a job. <br> [0 to $9999999 / 0 / 1]$ <br> Note: The L: counter is the total number of times the other <br> applications are used to send a job to the document server, <br> plus the number of times a file already on the document server <br> is used. |
| 8003 | F:Total Jobs | ${ }^{*}$ CTL |  |

- These SPs reveal the number of times an application is used, not the number of pages processed.
- When an application is opened for image input or output, this counts as one job.
- Interrupted jobs (paper jams, etc.) are counted, even though they do not finish.
- Only jobs executed by the customer are counted. Jobs executed by the customer engineer using the SP modes are not counted.
- When using secure printing (when a password is required to start the print job), the job is counted at the time when either "Delete Data" or "Specify Output" is specified.
- A job is counted as a fax job when the job is stored for sending.
- When a fax is received to fax memory, the F: counter increments but the L: counter does not (the document server is not used).
- A fax broadcast counts as one job for the F: counter (the fax destinations in the broadcast are not counted separately).
- A fax broadcast is counted only after all the faxes have been sent to their destinations. If one transmission generates an error, then the broadcast will not be counted until the transmission has been completed.
- A printed fax report counts as one job for the F: counter.
- The F: counter does not distinguish between fax sending or receiving.
- When a copy job on the document server is printed, SP8022 also increments, and when a print job stored on the document server is printed, SP8024 also increments.
- When an original is both copied and stored on the document server, the C : and L : counters both increment.
- When a print job is stored on the document server, only the $L$ : counter increments.
- When the user presses the Document Server button to store the job on the document server, only the L: counter increments.
- When the user enters document server mode and prints data stored on the document server, only the L: counter increments.
- When an image received from Palm 2 is received and stored, the $L$ : counter increments.
- When the customer prints a report (user code list, for example), the O: counter increments. However, for fax reports and reports executed from the fax application, the F: counter increments.

- When a scan job is sent to the document server, the $S$ : counter increments. When you enter document server mode and then scan an original, the L: counter increments.
- When a print job is sent to the document server, the P: counter increments.
- When a network application sends data to the document server, the O: counter increments.
- When an image from Palm 2 is stored on the document server, the O : counter increments.
- When a fax is sent to the document server, the F: counter increments.

- When an application like DeskTopBinder merges a copy job that was stored on the document server with a print job that was stored on the document server, the C : and P : counters both increment.
- When a job already on the document server is printed with another application, the L: counter increments.
- When a scanner job stored on the document server is printed with another application, the S : counter increments. If the original was scanned from within document server mode, then the L: counter increments.
- When images stored on the document server by a network application (including Palm 2), are printed with another application, the O: counter increments.
- When a copy job stored on the document server is printed with a network application (Web Image Monitor, for example), the C : counter increments.
- When a fax on the document server is printed, the F: counter increments.

| 8067 | O:FIN Jobs | *CTL | [0 to 9999999/0 / 1] |
|  | These SPs total finishing methods for jobs executed by an external application, over the network. The finishing method is specified by the application. |  |  |
| $806 \times 1$ | Sort | Number of jobs started in Sort mode. When a stored copy job is set for Sort and then stored on the document server, the L : counter increments. (See SP8 066 1) |  |
| $806 \times 2$ | Stack | Number of jobs started out of Sort mode. |  |
| $806 \times 3$ | Staple | Number of jobs started in Staple mode. |  |
| $806 \times 4$ | Booklet | Number of jobs started in Booklet mode. If the machine is in staple mode, the Staple counter also increments. |  |
| $806 \times 5$ | Z-Fold | Number of jobs started In any mode other than the Booklet mode and set for folding (Z-fold). |  |
| $806 \times 6$ | Punch | Number of jobs started in Punch mode. When Punch is set for a print job, the P: counter increments. (See SP8 064 6.) |  |

| 8076 | L:Jobs/PGS | *CTL | [0 to 9999999/0 / 1] |  |
|  | These SPs count and calculate the number of jobs printed from within the document server mode window at the operation panel, by the number of pages in the job. |  |  |  |
| 8077 | O:Jobs/PGS | *CTL | [0 to 9999999/0/1] |  |
|  | These SPs count and calculate the number of "Other" application jobs (Web Image Monitor, Palm 2, etc.) by size based on the number of pages in the job. |  |  |  |
| $807 \times 1$ | 1 Page | $807 \times 8$ |  | 21 to 50 Pages |
| $807 \times 2$ | 2 Pages | $807 \times 9$ |  | 51 to 100 Pages |
| $807 \times 3$ | 3 Pages | $807 \times 10$ |  | 101 to 300 Pages |
| $807 \times 4$ | 4 Pages | $807 \times 11$ |  | 301 to 500 Pages |
| $807 \times 5$ | 5 Pages | $807 \times 12$ |  | 501 to 700 Pages |
| $807 \times 6$ | 6 to 10 Pages | $807 \times 13$ |  | 701 to 1000 Pages |
| $807 \times 7$ | 11 to 20 Pages | $807 \times 14$ |  | 1001 to Pages |

- For example: When a copy job stored on the document server is printed in document server mode, the appropriate L: counter (SP8076 0xx) increments.
- Printing a fax report counts as a job and increments the F: counter (SP 8073).
- Interrupted jobs (paper jam, etc.) are counted, even though they do not finish.
- If a job is paused and re-started, it counts as one job.
- If the finisher runs out of staples during a print and staple job, then the job is counted at the time the error occurs.
- For copy jobs (SP 8072) and scan jobs (SP 8075), the total is calculated by multiplying the number of sets of copies by the number of pages scanned. (One duplex page counts as 2 .)
- The first test print and subsequent test prints to adjust settings are added to the number of pages of the copy job (SP 8072).
- When printing the first page of a job from within the document server screen, the page is counted.

| 8111 | T:FAX TX Jobs | *CTL | [0 to 9999999/0 / 1] |
| :---: | :---: | :---: | :---: |
|  | These SPs count the total number of jobs (color or black-and-white) sent by fax, either directly or using a file stored on the document server, on a telephone line. <br> Note: Color fax sending is not available at this time. |  |  |
|  | F: FAX TX Jobs | *CTL | [0 to 9999999 / 0 / 1] |
| 8113 | These SPs count the total number of jobs (color or black-and-white) sent by fax directly on a telephone line. <br> Note: Color fax sending is not available at this time. |  |  |
| $811 \times 1$ | B/W |  |  |
| $811 \times 2$ | Color |  |  |

- These counters count jobs, not pages.
- This SP counts fax jobs sent over a telephone line with a fax application, including documents stored on the document server.
- If the mode is changed during the job, the job will count with the mode set when the job started.
- If the same document is faxed to both a public fax line and an I-Fax at a destination where both are available, then this counter increments, and the I-Fax counter ( 812 l ) also increments.
- The fax job is counted when the job is scanned for sending, not when the job is sent.

| 8121 | T:IFAX TX Jobs | $*$ CTL | [0 to 9999999/0/1] |
| :--- | :--- | :---: | :--- |
|  | These SPs count the total number of jobs (color or black-and-white) sent, either directly <br> or using a file stored on the document server, as fax images using I-Fax. <br> Note: Color fax sending is not available at this time. |  |  |

| 8123 | F: IFAX TX Jobs | *CTL | [0 to $9999999 / 0 / 1]$ |

| Note: Color fax sending is not available at this time. |

- These counters count jobs, not pages.
- The counters for color are provided for future use; the color fax feature is not available at this time.
- The fax job is counted when the job is scanned for sending, not when the job is sent.

| 8131 | T:S-to-Email Jobs | *CTL | [0 to 9999999/0 / 1] |
| :---: | :---: | :---: | :---: |
|  | These SPs count the total number of jobs (color or black-and-white) scanned and attached to an e-mail, regardless of whether the document server was used or not. |  |  |
| 8135 | S: S-to-Email Jobs | *CTL | [0 to 9999999/0 / 1] |
|  | These SPs count the number of jobs (color or black-and-white) scanned and attached to e-mail, without storing the original on the document server. |  |  |
| $813 \times 1$ | B/W |  |  |
| $813 \times 2$ | Color |  |  |
| $813 \times 3$ | ACS |  |  |

- These counters count jobs, not pages.
- If the job is stored on the document server, after the job is stored it is determined to be color or black-and-white then counted.
- If the job is cancelled during scanning, or if the job is cancelled while the document is waiting to be sent, the job is not counted.
- If the job is cancelled during sending, it may or may not be counted, depending on what stage of the process had been reached when the job was cancelled.
- If several jobs are combined for sending to the Scan Router, Scan-to-Email, or Scan-to-PC, or if one job is sent to more than one destination. each send is counted separately. For example, if the same document is sent by Scan-to-Email as well as Scan-to-PC, then it is counted twice (once for Scan-toEmail and once for Scan-to-PC).

| $814 \times 1$ | B/W |  |  |
| $814 \times 2$ | Color |  |  |
| $814 \times 3$ | ACS |  |  |

- These counters count jobs, not pages.
- The jobs are counted even though the arrival and reception of the jobs at the Scan Router server cannot be confirmed.
- If even one color image is mixed with black-and-white images, then the job is counted as a "Color" job.
- If the job is cancelled during scanning, or if the job is cancelled while the document is waiting to be delivered, the job is not counted.
- If the job is cancelled during sending, it may or may not be counted, depending on what stage of the process had been reached when the job was cancelled.
- Even if several files are combined for sending, the transmission counts as one job.

- SP 8191 to 8196 count the number of scanned sides of pages, not the number of physical pages.
- These counters do not count reading user stamp data, or reading color charts to adjust color.
- Previews done with a scanner driver are not counted.
- A count is done only after all images of a job have been scanned.
- Scans made in SP mode are not counted.

## Examples

- If 3 B5 pages and 1 A3 page are scanned with the scanner application but not stored, the S : count is 4 .
- If both sides of 3 A4 sheets are copied and stored to the document server using the Store File button in the Copy mode window, the C: count is 6 and the $L$ : count is 6 .
- If both sides of 3 A 4 sheets are copied but not stored, the C : count is 6 .
- If you enter document server mode then scan 6 pages, the $L$ : count is 6 .

| 82316 | Mixed 1 side/ 2side | Simplex and Duplex mode. |  |

- If the scan mode is changed during the job, for example, if the user switches from ADF to Platen mode, the count is done for the last selected mode.
- The user cannot select mixed sizes or non-standard sizes with the fax application so if the original's page sizes are mixed or non-standard, these are not counted.
- If the user selects "Mixed Sizes" for copying in the platen mode, the Mixed Size count is enabled.
- In the SADF mode if the user copies 1 page in platen mode and then copies 2 pages with SADF, the Platen count is 1 and the SADF count is 3 .

- When several documents are merged for a print job, the number of pages stored are counted for the application that stored them.
- These counters are used primarily to calculate charges on use of the machine, so the following pages are not counted as printed pages:
- Blank pages in a duplex printing job.
- Blank pages inserted as document covers, chapter title sheets, and slip sheets.
- Reports printed to confirm counts.
- All reports done in the service mode (service summaries, engine maintenance reports, etc.)
- Test prints for machine image adjustment.
- Error notification reports.
- Partially printed pages as the result of a copier jam.

## 4) Note

- The count for $B / W$ and Color pages is done after the document is stored on the HDD. If the job is cancelled before it is stored, the pages are not counted.
- If Scan-to-Email is used to send a 10 -page document to 5 addresses, the count is 10 (the pages are sent to the same SMTP server together).
- If Scan-to-PC is used to send a 10 -page document to 5 folders, the count is 50 (the document is sent to each destination of the SMB/FTP server).
- Due to restrictions on some devices, if Scan-to-Email is used to send a 10 -page document to a large number of destinations, the count may be divided and counted separately. For example, if a 10-page document is sent to 200 addresses, the count is 10 for the first 100 destinations and the count is also 10 for the second 100 destinations, for a total of 20.).

## Test Pattern Printing

Printing Test pattern: SP2-109
Some of these test patterns are used for copy image adjustments but most are used primarily for design testing.

## $\downarrow$ Note

- Do not operate the machine until the test pattern is printed out completely. Otherwise, an SC occurs.

1. Enter the SP mode and select SP2-109-003.
2. Enter the number for the test pattern that you want to print and press [\#].
3. When you want to select the single color of Magenta, Yellow or Cyan for printing a test pattern, select the color with SP2-109-005 (2: Magenta, 3: Yellow, 4: Cyan).
4. When you want to change the density of printing a test pattern, select the density with SP2-109-006 to -009 for each color.

## Note

- If you select " 0 " with SP2-109-006 to -009, the color to be adjusted to " 0 " does not come up on a test pattern.

5. When you are prompted to confirm your selection, touch "Yes" to select the test pattern for printing.
6. Touch "Copy Window" to open the copy window, then select the settings for the test print (paper size etc.).

## + Note

- If you want to use black and white printing, touch "Black \& White" on the LCD. If you want to use color printing, touch "Full Colour" on the LCD.

7. Press the "Start" key to start the test print.
8. After checking the test pattern, touch "SP Mode" on the LCD to return to the SP mode display.
9. Reset all settings to the default values.
10. Touch "Exit" twice to exit SP mode.
